Risk Factors

Please see the Preliminary Offering Documents for a description of certain risks related to this investment, including, but not limited to, the following:

- Depending on the performance of the Market Measure as measured shortly before the maturity date, your investment may
 result in a loss; there is no guaranteed return of principal.
- Payments on the notes are subject to the credit risk of BofA Finance and the credit risk of BAC, and actual or perceived changes in the creditworthiness of BofA Finance or BAC are expected to affect the value of the notes. If BofA Finance and BAC become insolvent or are unable to pay their respective obligations, you may lose your entire investment.
- Your investment return is limited to the return represented by the Capped Value and may be less than a comparable
 investment directly in the Market Measure or the asset held by the Market Measure.
- The initial estimated value of the notes on the pricing date will be less than their public offering price.
- If you attempt to sell the notes prior to maturity, their market value may be lower than both the public offering price and the
 initial estimated value of the notes on the pricing date.
- You will have no rights of a holder of the Market Measure or the asset held by the Market Measure, and you will not be
 entitled to receive securities or dividends or other distributions on the Market Measure.
- There are liquidity and management risks associated with the Market Measure.
- The performance of the Market Measure may not correlate with the performance of the asset held by the Underlying Fund as well as the net asset value per share of the Market Measure, especially during periods of market volatility.
- The notes will not be regulated by the U.S. Commodity Futures Trading Commission.

Final terms will be set on the pricing date within the given range for the specified Market-Linked Investment. Please see the Preliminary Offering Documents for complete product disclosure, including related risks and tax disclosure.
