NOTE 1 - ORGANIZATION

Cleartronic, Inc. (the "Company") was incorporated in Florida on November 15, 1999. All current operations are conducted through the Company's wholly owned subsidiary, ReadyOp Communications, Inc. ("ReadyOp"), a Florida corporation incorporated on September 15, 2014. ReadyOp facilitates the marketing and sales of subscriptions to the *ReadyOp*™ and *ReadyMed* ™ platforms and the AudioMate IP gateways discussed below.

In October 2019, the Company acquired the ReadyMed software platform from Collabria LLC. ReadyMed is a web-based secure communications platform initially designed for the healthcare industry. This includes hospitals, clinics, doctor's offices, health insurance companies, workers compensation insurance companies and many other segments of the healthcare industry. The Company offers both the ReadyOp and ReadyMed capabilities to clients and usually refers to the platforms as ReadyOp to avoid confusion in the marketplace of two platforms.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

PRINCIPLES OF CONSOLIDATION

The accompanying consolidated financial statements contain the consolidated accounts of Cleartronic, Inc. and its subsidiary, ReadyOp Communications, Inc. All material intercompany transactions and balances have been eliminated.

BASIS OF PRESENTATION

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q of Regulation S-K. They may not include all information and footnotes required by United States generally accepted accounting principles for complete financial statements. However, except as disclosed herein, there have been no material changes in the information disclosed in the notes to the financial statements for the year ended September 30, 2021 included in the Company's Annual Report on Form 10-K filed with the United States Securities and Exchange Commission. The unaudited interim consolidated financial statements should be read in conjunction with those financial statements included in the Form 10-K. In the opinion of management, all adjustments considered necessary for a fair presentation, consisting solely of normal and recurring adjustments have been made. Operating results for the three and nine months ended June 30, 2022 are not necessarily indicative of the results that may be expected for the fiscal year ended September 30, 2022.

USE OF ESTIMATES

In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and operations for the reporting period.

Although these estimates are based on management's knowledge of current events and actions it may undertake in the future, they may ultimately differ from actual results.

Significant estimates include the assumptions used in valuation of deferred tax assets, estimated useful life of property and equipment, valuation of inventory and allowance for doubtful accounts.

CASH AND CASH EQUIVALENTS

For financial statement purposes, the Company considers all highly liquid investments purchased with original maturities of three months or less to be cash equivalents. The Company did not own any cash equivalents on June 30, 2022 and September 30, 2021.

ACCOUNTS RECEIVABLE

The Company provides an allowance for uncollectible accounts based upon a periodic review and analysis of outstanding accounts receivable balances. Uncollectible receivables are charged to the allowance when deemed uncollectible. Recoveries of accounts previously written off are used to credit the allowance account in the periods in which the recoveries are made. When a client is invoiced, the amount is recorded as an asset in Accounts Receivable and as Deferred Revenue in Current Liabilities. When payment is received the amount is moved to Cash on the balance sheet and Accounts Receivables are reduced. The amount listed as Deferred Revenue is amortized monthly over the license period.

The Company provided $18,000 and $10,000 allowances for doubtful accounts as of June 30, 2022 and September 30, 2021, respectively.

PROPERTY AND EQUIPMENT

Property and equipment are recorded at cost and depreciated or amortized using the straight-line method over the estimated useful life of the asset or the underlying lease term for leasehold improvements, whichever is shorter or when the property and equipment is put into service.

CONCENTRATION OF CREDIT RISK

The Company currently maintains cash balances at one FDIC-insured banking institution. Deposits held in non interest-bearing transaction accounts are insured up to a maximum of $250,000 at all FDIC-insured institutions. As of June 30, 2022 and September 30, 2021, the Company had $0 and $139,577, respectively, in excess of FDIC insurance limits.

RESEARCH AND DEVELOPMENT COSTS

The Company expenses research and development costs as incurred.

For the nine months ended June 30, 2022 and 2021, the Company had $143,199 and $118,612 respectively, in research and development costs.

For the three months ended June 30, 2022 and 2021, the Company had $46,923 and $48,285, respectively, in research and development costs.

REVENUE RECOGNITION AND DEFERRED REVENUES

The Company revenue recognition policy follows guidance from Accounting Standards Codification (ASC) 606, Revenue from contract with customers. Revenue is recognized when the Company has transferred promised goods and services to the customer and in the amount that reflects the consideration to which the company expects to be entitled in exchange for those goods and services.

The Company applies the following five-step model in order to determine this amount:

i. Identification of Contact with a customer
ii. Identify the performance obligation of the contract
iii. Determine transaction price
iv. Allocation of the transaction price to the performance obligations, and
v. Recognition of revenue when (or as) the Company satisfies each performance obligation.

The Company generates revenue primarily through the sale of integrated hardware and software licenses. The portion of the contract that is associated with ongoing hosting and related customer service is amortized monthly over the license period. The Company incurs certain incremental contract costs (referred to as deferred subscriber acquisition costs, net) including selling expenses (primarily commissions) related to acquiring customers. Deferred subscriber acquisition costs, net are included in prepaid and expenses and other current assets on the consolidated balance sheet. Commissions paid in connection with acquiring new customers are determined based on the value of the contractual fees. Deferred subscriber acquisition costs will be expensed as incurred on the date the revenue associated with the cost is recognized. As of June 30, 2022 and September 30, 2021, respectively, the Company recorded $0 and $41,283, respectively, in deferred subscriber costs, which are included as a component of prepaid expense.

In transactions in which hardware is sold to a customer, the Company recognizes the revenue when the hardware has been shipped to the customer. The hardware supplied by the Company does not require a related software license and can be operated and fully functional without the Company's software.

From time to time clients request special training meetings. We send employees to these meeting and charge our clients on a per diem basis. These charges are recorded as consulting fees on our income statement.

The Company allocates the transaction price to each performance obligation based on a relative stand alone selling price. Revenue associated with the sale and installation of system licenses is recognized once installation is complete.

Customer billings for services not yet rendered are deferred and recognized as revenue as services are provided. These fees are recorded as current deferred revenue on the consolidated balance sheet as the Company expects to satisfy any remaining performance obligations as well as recognize the related revenue within the next twelve months. Accordingly, the Company has applied the practical expedient regarding deferred revenue to exclude the value of remaining performance obligations if (i) the contract has an original expected term of one year or less or (ii) the Company recognizes revenue in proportion to the amount it has the right to invoice for services performed.

EARNINGS PER SHARE

Earnings per share ("EPS") are the amount of earnings attributable to each share of common stock. For convenience, the term is used to refer to either earnings or loss per share. EPS is computed pursuant to section 260-10-45 of the FASB Accounting Standards Codification. Pursuant to ASC Paragraphs 260-10-45-10 through 260-10-45-16, basic EPS shall be computed by dividing income available to common stockholders (the numerator) by the weighted-average number of common shares outstanding (the denominator) during the period. Income available to common stockholders shall be computed by deducting both the dividends declared in the period on preferred stock (whether or not paid) and the dividends accumulated for the period on cumulative preferred stock (whether or not earned) from income from continuing operations (if that amount appears in the income statement) and also from net income. The computation of diluted EPS is similar to the computation of basic EPS except that the denominator is increased to include the number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued during the period to reflect the potential dilution that could occur from common shares issuable through contingent shares issuance arrangement, stock options or warrants.

Pursuant to ASC Paragraphs 260-10-45-45-21 through 260-10-45-45-23 Diluted EPS shall be based on the most advantageous conversion rate or exercise price from the standpoint of the security holder. The dilutive effect of outstanding call options and warrants (and their equivalents) issued by the reporting entity shall be reflected in diluted EPS by application of the treasury stock method unless the provisions of paragraphs 260-10-45-35 through 45-36 and 260-10-55-8 through 55-11 require that another method be applied. Equivalents of options and warrants include non-vested stock granted to employees, stock purchase contracts, and partially paid stock subscriptions (see paragraph 260–10–55–23). Anti-dilutive contracts, such as purchased put options and purchased call options, shall be excluded from diluted EPS. Under the treasury stock method: a. Exercise of options and warrants shall be assumed at the beginning of the period (or at time of issuance, if later) and common shares shall be assumed to be issued. b. The proceeds from exercise shall be assumed to be used to purchase common stock at the average market price during the period. (See paragraphs 260-10-45-29 and 260-10-55-4 through 55-5.) c. The incremental shares (the difference between the number of shares assumed issued and the number of shares assumed purchased) shall be included in the denominator of the diluted EPS computation.

As of June 30, 2022 and 2021, we had no options and warrants outstanding.

As of June 30, 2022 and 2021, we had512,996 shares of Series A Convertible Preferred stock outstanding, which are convertible into51,299,600 shares of common stock.

As of June 30, 2022 and 2021, we had3,341,503 and 3,911,715 shares of Series C Convertible Preferred stock outstanding, respectively, which are convertible into16,707,515 and 19,558,575 shares of common stock, respectively.

FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company measures the fair value of its assets and liabilities under ASC topic 820, "Fair Value Measurements and Disclosures". ASC 820 defines "fair value" as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There was no impact relating to the adoption of ASC 820 to the Company's consolidated financial statements.

ASC 820 also describes three levels of inputs that may be used to measure fair value:

- Level 1: Observable inputs that reflect unadjusted quoted prices for identical assets or liabilities traded in active markets.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: Inputs that are generally observable. These inputs may be used with internally developed methodologies that result in management's best estimate of fair value.

Financial instruments consist principally of cash, accounts receivable, prepaid expenses and other current assets, accounts payable, accrued expenses and deferred revenue. The carrying amounts of such financial instruments in the accompanying consolidated balance sheet approximate their fair values due to their relatively short-term nature. The fair value of long-term debt is based on current rates at which the Company could borrow funds with similar remaining maturities. The carrying amounts approximate fair value. It is management's opinion that the Company is not exposed to any significant currency or credit risks arising from these financial instruments.

This includes hospitals, clinics, doctor's offices, health insurance companies, workers compensation insurance companies and many other segments of the healthcare industry. The platform provides caregivers with patient tracking capability and allows physicians and other healthcare entities to track patient progress after medical treatment and/or release from hospital care. The software also enables monitoring and reporting of patients in medium and long-term care. Additionally, the platform provides secure communications capabilities and record keeping to track the healing process of patients, record their recovery and monitor their medications. ReadyMed has proved beneficial for multiple clients in the healthcare industry due to the impact of the COVID-19 pandemic. The Company offers both the ReadyOp and ReadyMed capabilities to clients and usually refers to the platform as ReadyOp to avoid confusion in the marketplace of two products.
