SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

Form 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For Fiscal Year Ended December 31, 2015

000-53488

Commission file number

PROPELL TECHNOLOGIES GROUP, INC.
(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

26-1856569

(I.R.S. Employer Identification No.)

10655 Bammel North Houston Road
Suite 100, Houston, Texas 77086
(Address of principal executive offices)

(713) 227- 0480

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Common Stock

(Title of Class)

None

(Name of each exchange on which registered)

Securities registered pursuant to Section 12 (g) of the Act:

Common Stock, \$0.001 par value

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 of Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every interactive data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T (section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the Registrant's common stock held by non-affiliates of the Registrant as of June 30, 2015, the last business day of the registrant's recently completed second quarter, was approximately \$57,508,350 based on the closing price at which the common stock was last sold on that date.

The Registrant has 268,558,931 shares of common stock outstanding as of March 15, 2016.

Documents incorporated by reference: None

CAUTIONARY STATEMENT RELATING TO THE SAFE HARBOR PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This Annual Report on Form 10-K includes “forward-looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). We intend those forward looking-statements to be covered by the safe harbor provisions for forward-looking statements. All statements regarding our expected financial position and operating results, our business strategy, our financing plans and the outcome of any contingencies are forward-looking statements. Any such forward-looking statements are based on current expectations, estimates, and projections about our industry and our business and are subject to a number of risks and uncertainties, many of which are difficult to predict and generally beyond our control, that could cause actual results to differ materially from those expressed, projected or implied in or by the forward-looking statements. Words such as “anticipates,” “expects,” “intends,” “plans,” “believes,” “seeks,” “estimates,” or variations of those words and similar expressions are intended to identify such forward-looking statements. Forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those stated in or implied by any forward-looking statements.

Such risks and uncertainties include the risks noted under “You should refer to Item 1A. “Risk Factors.” section of this Annual Report on Form 10-K for a discussion of important factors that may cause our actual results to differ materially from those expressed or implied by our forward-looking statements. As a result of these factors, we cannot assure you that the forward-looking statements in this Annual Report will prove to be accurate. Furthermore, if our forward-looking statements prove to be inaccurate, the inaccuracy may be material. In light of the significant uncertainties in these forward-looking statements, you should not regard these statements as a representation or warranty by us or any other person that we will achieve our objectives and plans in any specified time frame, or at all. We do not undertake any obligation to update any forward-looking statements.

Unless the context requires otherwise, references to “we,” “us,” “our,” and “Propell,” refer to Propell Technologies Group, Inc., Inc. and its subsidiaries.

Item 1. Business

Overview

Our Company

Propell Technologies, Inc. intends to be an oil exploration and production (“E&P”) acquisition company with the intention to build and grow a base of producing assets by leveraging M&A and operational expertise, and by using advanced technology including Plasma Pulse well treatment which uses no acidization, hydrofracking or other chemicals. Through its wholly owned subsidiary, Novas Energy USA, Inc., and now through its indirect majority owned subsidiary, Novas Energy North America, LLC (“NENA”), the intention is to improve oil production using (the “Plasma Pulse Technology”). Novas has an exclusive, perpetual license to engage significantly in the commercial application of a unique proprietary Plasma-Pulse Treatment (the “Plasma Pulse Technology”) technology in the United States and Mexico, which it licenses from Novas Energy Group Limited (“Licensor”) and sublicenses on an exclusive basis to its majority owned subsidiary, NENA, for use in the United States and Canada. The Plasma Pulse Technology is an Enhanced Oil Recovery methodology and process that has been developed to be environmentally friendly, mobile, time efficient and cost effective. The Plasma Pulse Technology is patented in the USA. We expect the Plasma Pulse Technology to continue to drive new and renewed revenue for energy producers and we believe it has the potential to become a new standard for the entire petroleum industry.

Since February 4, 2013, following the closing of the Share Exchange Agreement with the shareholders of Novas, under which we acquired all of the outstanding equity securities of Novas in exchange for 100,000,000 shares of our common stock, our primary focus has shifted to the further development of the Plasma Pulse Technology. The oil recovery technology used by Novas is based on an exclusive, perpetual royalty-bearing license (the “License Agreement”) to engage in the commercial application of the Plasma Pulse Technology entered into on January 30, 2013, as amended in March 2014 and December 23, 2014 with Novas Energy Group Limited (“Licensor”) which granted Novas the right to use the Plasma Pulse Technology in the United States and Mexico to enhance oil production. The license agreement provides Novas with the right to practice the licensed process and to utilize the Plasma Pulse Technology to provide services to third parties and for ourselves as well, and to sublicense the Plasma Pulse Technology in the United States.

On October 22, 2015, Novas entered into an operating agreement with Technovita Technologies USA, Inc. (“Technovita”) (the “Joint Venture Agreement”) through a newly formed Delaware limited liability company, NENA, whereby Novas agreed to contribute \$1,200,000 (\$600,000 to be delivered on the effective date (October 22, 2015) of the Joint Venture Agreement, \$300,000 on November 1, 2015 and \$300,000 on the two month anniversary of the Effective Date) to the capital of NENA for 60% of the membership interests of NENA and Technovita agreed to contribute an aggregate of \$800,000 to the capital of NENA for 40% of the membership interests of NENA. In terms of a side agreement entered into on November 18, 2015, the revenue and expenses incurred by Technovita prior to entering into the operating agreement have been included in the joint venture and consolidated into the Company’s results effective September 1, 2015. In October 2015, Novas entered into a sublicense agreement (the “Novas Sublicense Agreement”) with NENA and the Licensor pursuant to which NENA was granted the right, subject to certain exceptions to be the exclusive provider of the Plasma Pulse Technology for treatment of vertical wells to third parties in the United States. Subject to certain exceptions and pursuant to the terms of Sublicense Agreements (the “Technovita Sublicense Agreement”) that was entered into between Technovita, NENA and Licensor, NENA is the exclusive provider of the Plasma Pulse Technology for treatment of vertical wells to third parties in Canada. Both Novas and Technovita will retain the right to deploy the Plasma Pulse Technology on vertical wells owned by Novas or Technovita in the United States or Canada, respectively.

Although relatively new to the United States and Mexico, the Plasma Pulse Technology has been successfully utilized outside of the United States and Mexico for several years. The Plasma Pulse Technology is patented in the USA. The process utilizes a down-hole tool that is lowered into vertical wellbores to the perforated oil producing zone. When initiated, the tool delivers metallic plasma-generated, directed, non-linear, wide-band elastic oscillations at resonance frequencies to enhance oil production using the tool developed by the Licensor and enhanced by Novas. The Plasma Pulse Technology is suitable for oil wells as deep as 12,000 feet. By optimizing production efficiency combined with the resulting increased oil production we expect to extend the economic life of mature oil fields and to recover previously unrecoverable oil efficiently.

Since March 19, 2013, Novas has used the Plasma Pulse Technology to treat over forty oil and injector wells located in eight states; Louisiana, Oklahoma, Kansas, Texas, California, Tennessee, Colorado and Wyoming. The Plasma Pulse Technology has been shown to increase oil production or injection rates in many of the wells that we have treated. The initial results of this treatment have been very encouraging, however the results on the wells treated may not be indicative of the results of treatment on additional wells. We currently have six tools that we use to perform the treatments in vertical wells with a minimum of 5 ½-inch and 4 ½ casings, but not in horizontal wells.

Initially we offered our services to independent oil wells based on a joint venture model in which we received a percentage of the revenue that our customers derived from additional production resulting from the use of the Plasma Pulse Technology, we have not concluded any further agreements under this joint venture model. We also offered our services on a fee-based model and charged a service fee for use of the Plasma Pulse Technology. In 2014 we treated sixteen wells for service fees. Pursuant to the terms of the Novas Sublicense Agreement, we transferred our exclusive right to utilize the Plasma Pulse Technology to treat vertical wells in the United States to NENA. As such, NENA now has the exclusive right to use the Plasma Pulse Technology for treatment of vertical wells in the United States. We retained, however, the right to utilize the Plasma Pulse Technology to treat wells that we acquire in the United States.

In addition, it is our intention to acquire producing oil fields to generate revenues and we may use the Plasma Pulse Technology on our acquired wells to increase their production.

To date, we derived \$349,194 in revenue from our oil enhancement business, no revenue has been recognized from the joint venture arrangement. We have financed our operations primarily from sales of our securities, both debt and equity, and to a lesser extent revenue from operations and we expect to continue to obtain required capital in a similar manner. We have incurred an accumulated deficit of \$14,393,474 through December 31, 2015 and there can be no assurance that we will be able to achieve profitability.

The NENA JOINT VENTURE

On October 22, 2015, Novas entered into an operating agreement with Technovita through a newly formed Delaware limited liability company, NENA, whereby Novas agreed to contribute \$1,200,000 (\$600,000 to be delivered on the effective date (October 22, 2015) of the Joint Venture Agreement, \$300,000 on November 1, 2015 and \$300,000 on the two month anniversary of the Effective Date) to the capital of NENA for 60% of the membership interests of NENA and Technovita agreed to contribute an aggregate of \$800,000 to the capital of NENA for 40% of the membership interests of NENA. In terms of a side agreement entered into on November 18, 2015, the revenue and expenses incurred by Technovita prior to entering into the operating agreement have been included in the joint venture and consolidated into the Company's results effective September 1, 2015. To date we have contributed \$900,000 to the joint venture.

Subject to certain exceptions and pursuant to the terms of a Novas Sublicense Agreement that was entered into between Novas, NENA and the "Licensor, NENA will be the exclusive provider of the Plasma Pulse Technology to third parties in the United States for the vertical treatment of wells. Subject to certain exceptions and pursuant to the terms of the Technovita Sublicense Agreement that was entered into between Technovita, NENA and Licensor, NENA is the exclusive provider of the Plasma Pulse Technology to third parties in Canada for the vertical treatment of wells. Notwithstanding the foregoing, both Novas and Technovita have the right to deploy the Plasma Pulse Technology on wells owned by Novas or Technovita in the United States or Canada, respectively. If either Novas or Technovita terminates the Sublicense Agreement with NENA and Licensor, the non-terminating party will receive 100% of the terminating member's membership interest in NENA.

The business and affairs of NENA are to be managed by or under the direction of the Board of Directors, consisting of five (5) members, three (3) of whom to be appointed by Novas and two (2) of whom to be appointed by Technovita. Currently, the Board consists of four members, of which two of whom have been appointed by Novas. Novas retains the right to appoint an additional Board member. Board approval is required to: (i) incur any indebtedness, pledge or grant liens on any assets or guarantee, assume, endorse or otherwise become responsible for the obligations of any other person, except to the extent approved or authorized in NENA's budget; (ii) make any loan, advance or capital contribution in any person, except to the extent approved or authorized in the budget; (iii) transfer any equipment necessary in the deployment of the Vertical Technology to any third party; (iv) enter into or effect any transaction or series of related transactions involving the sale of NENA or the sale, lease, license, exchange or other disposition (including by merger, consolidation, sale of assets or similar business transaction) by NENA of any assets in excess of \$300,000; (v) appoint or remove NENA's auditors or make any changes in the accounting methods or policies of NENA (other than as required by GAAP); (vi) enter into or effect any transaction or series of related transactions involving the purchase, lease, license, exchange or other acquisition (including by merger, consolidation, acquisition of stock or acquisition of assets) by NENA of any assets and/or equity interests of any person and/ or assets in excess of \$300,000; or (v) enter into or effect any commercial transaction or series of related commercial transactions involving anticipated liabilities or revenues of NENA in excess of \$500,000 or that materially vary from NENA's existing strategy or business plan.

The Joint Venture has provided NENA with access to Technovita's experienced team, the ability to build one North American brand, the ability to leverage the strength of the combined entity expanding our geographic reach beyond the United States and into Canada.

To date NENA has treated a total of fourteen wells, two in the USA, one in Colorado and one in Kansas and twelve in Alberta, Canada. No revenue has been recognized as yet for these treatments.

Recent Events

On January 1, 2016, we entered into a three-year employment agreement with C. Brian Boutte (the "Boutte Employment Agreement") to serve as our Chief Executive Officer. Mr. Boutte also serves as our interim Chief Financial Officer and has been appointed to the boards of our subsidiaries, Novas and NENA. Under the terms of the Boutte Employment Agreement, for his service as our Chief Executive Officer, Mr. Boutte receives an annual base salary of \$265,000, and an annual performance bonus of up to 55% of his base salary, such bonus payable in cash or equity upon attainment of certain performance indicators established by our Board of Directors and Mr. Boutte. Mr. Boutte also received a \$60,000 sign on bonus upon commencement of his employment. In connection with the entry into the Boutte Employment Agreement, Mr. Boutte was granted an option award exercisable for 3,000,000 shares of our common stock, which will vest as to 1,000,000 shares on each of the one, two and three-year anniversary of the commencement of his employment with us. In the event of the sale of all of our assets or any field acquired by us during the employment period which sale occurs after the six-month anniversary of his employment and before the two-year anniversary of his termination of employment, the Boutte Employment Agreement provides that Mr. Boutte will receive a bonus equal to 3% of net cash proceeds received by us from such sale after payment of certain costs and expenses. The Boutte Employment Agreement also includes customary confidentiality obligations and inventions assignments by Mr. Boutte as well as a non-compete and non-solicitation provision.

On January 1, 2016, John Huemoeller, II resigned as our Chief Executive Officer, President and Chief Financial Officer. Mr. Huemoeller will remain as a consultant to us for a transition period of up to 90 days on a month-to-month basis at a salary of Eleven Thousand Dollars (\$11,000) a month. Mr. Huemoeller's resignation as Chief Executive Officer, President and Chief Financial Officer did not involve any disagreement with us.

On March 1, 2016, we entered into a three-year Employment Agreement with David S. Ramsey (the "Ramsey Employment Agreement") to serve as our Chief Operating Officer. Under the Ramsey Employment Agreement, for his service as our Chief Operating Officer, Mr. Ramsey will receive an annual base salary of \$220,000 and an annual performance bonus of up to 40% of his base salary, such bonus payable in cash or equity upon attainment of certain performance indicators established by our Board of Directors. In connection with the entry into the Ramsey Employment Agreement, Mr. Ramsey was granted an option award exercisable for 1,000,000 shares of our common stock, which will vest as to 333,334 shares on each of the one, two and three-year anniversary of the commencement of his employment with us. In the event of the sale of all of our assets or any field acquired by us during the employment period which sale occurs after the six-month anniversary of his employment and before the two-year anniversary of his termination of employment, the Ramsey Employment Agreement provides that Mr. Ramsey will receive a bonus equal to 2% of net cash proceeds received by the Company from such sale after payment of certain costs and expenses. The Ramsey Employment Agreement also includes customary confidentiality obligations and inventions assignments by Mr. Ramsey as well as a non-compete and non-solicitation provision.

Series C Convertible Preferred Stock Issuance

On February 19, 2015, we entered into a Series C Preferred Stock Purchase Agreement (the "Purchase Agreement") with Ervington Investment Limited, an entity organized under the laws of the Republic of Cyprus which is wholly owned by Greenleas International Holdings Ltd., which in turn is wholly owned by Harmony Trust Settlement ("Ervington"), and closed the first tranche of a private placement offering under the Purchase Agreement, raising \$5,000,000 in gross proceeds from the sale of 1,525,424 shares of our Series C Preferred Stock ("Series C Preferred Stock") at a purchase price of \$3.27777778 per share. We have agreed to use the net proceeds of the offering for research and development, commercialization of new products, sales and marketing, repayment of debt, accounts payable and administrative expenses.

On June 30, 2015, Ervington Investments closed the second tranche of a private placement offering under the purchase agreement raising an additional \$9,750,000 in gross proceeds from the sale of 2,974,576 shares of our Series C Preferred Stock at a purchase price of \$3.27777778. We have agreed to use the proceeds for the acquisition, enhancement and maintenance of an oil field and the use of our Plasma Pulse Technology, as applicable.

In connection with the Purchase Agreement, we also entered into an Investors' Rights Agreement with Ervington (the "Investors' Rights Agreement"). The Investors' Rights Agreement provides that the Holders (as defined in the Investors' Rights Agreement) of a majority of the outstanding Registerable Securities (defined therein as the shares of common stock and Series A-1 Convertible Preferred Stock ("Series A-1 Preferred Stock")) issued pursuant to the Secondary Stock Purchase Agreement (as defined below), the shares of Series C Preferred Stock issued pursuant to the Purchase Agreement and any common stock issued as dividends thereon or in exchange for such) are entitled to demand registration rights under certain circumstances and piggyback registration rights. In addition, the Investors' Rights Agreement provides that Ervington (or its assignee) has the right to designate a person to be appointed as our Chief Executive Officer, a board observer right if a representative of Ervington or its affiliate is not a member of our board of directors and certain consultation rights if a representative of Ervington or its affiliate is not a member of our board of directors so long as it holds a majority of the Registerable Securities and at least 36,000,000 shares of our common stock on an "as converted" basis. Ervington and its affiliates also have a right of first refusal to acquire their pro rata share of any New Securities (as defined in the Investors' Rights Agreement) which we propose to issue and sell.

In connection with the Purchase Agreement, Ervington also entered into a stock purchase agreement (the "Secondary Purchase Agreement") with certain of our stockholders (the "Selling Stockholders"), pursuant to which the Selling Stockholders sold to Ervington an aggregate of 7,624,990 shares of our common stock and 2,437,500 shares of our Series A-1 Preferred Stock (representing 24,375,000 shares of our common stock on an as converted basis) at a purchase price of \$.001 per share. In terms of the second closing on June 30, 2015 and in terms of the Secondary Purchase Agreement the Selling Stockholders sold an aggregate 56,677,477 shares of our common stock and 700,000 shares of our Series A-1 Preferred Stock (representing 7,000,000 shares of our common stock on an as converted basis) to Ervington. We also entered into a Stockholders Agreement with the Selling Stockholders and Ervington (the "Stockholders Agreement") providing that until a Change of Control Transaction (as defined in the Stockholders Agreement), each person a party thereto shall vote all of such person's shares of our common stock in favor of the designees appointed by Ervington and two additional directors appointed by two of the Selling Stockholders and Ervington agreed to vote its shares in favor of the two designees appointed by the two Selling Stockholders provided that the certain Selling Stockholders continue to own a certain threshold number of shares of our common stock or preferred stock convertible into our common stock. In addition, the Selling Stockholders granted Ervington certain drag along rights in the event of a Change of Control Transaction (as defined in the Stockholders Agreement) and Ervington and its affiliates were granted certain rights of first refusal.

In accordance with the terms of the Series C Preferred Stock Certificate of Designations (the "Series C Certificate of Designations"), Ervington appointed Ivan Persiyanov to serve as a director, holding two votes and after the Second tranche closing, Ervington appointed Maria Damianou to serve as a director, holding one vote. In addition, James Fuller, Mark Kalow and Dan Steffens resigned from the Board of Directors effective upon the closing.

In addition, as a condition to the consummation of the Purchase Agreement, we filed a Certificate of Designations to our Certificate of Incorporation with the Secretary of State of the State of Delaware setting forth the rights, preferences and privileges of the Series C Preferred Stock, our Bylaws were amended and restated and we entered into an Indemnification Agreement with Ivan Persiyanov.

The Series C Preferred Stock accrues dividends at the rate per annum equal to 4% of the stated price (which initially is \$3.27777778) payable annually in arrears on December 31 of each year in preference and priority to any payment of any dividend on our common stock, or any other class of preferred stock. Subject to adjustment, each share of Series C Preferred Stock is currently convertible at the option of the holder into 26.67 shares of common stock. In the event of our liquidation, dissolution or winding up and other liquidation events (as defined in the Series C Certificate of Designations), holders of Series C Preferred Stock are entitled to receive from proceeds remaining after distribution to our creditors and prior to the distribution to holders of common stock or any other class of preferred stock the (x) stated value (as adjusted for stock splits, stock dividends, reorganizations, recapitalizations and the like) held by such holder and (y) all accrued but unpaid dividends on such shares. The Series C Preferred Stock is entitled to certain weighted average anti-dilution protection as specified in the Series C Certificate of Designations.

Generally, holders of Series C Preferred Stock will, on an as-converted basis, vote together with the common stock as a single class. Upon the issuance of at least 1,500,000 shares of Series C Preferred Stock the holders of the Series C Preferred Stock as a class are entitled to elect either two directors holding one vote or one director holding two votes. Upon the issuance of an aggregate of 4,500,000 shares of Series C Preferred Stock, which issuance occurred upon the closing of the second tranche, the holders of the Series C Preferred Stock are entitled to elect either three directors holding one vote each, one director holding three votes or two directors, or one director holding two votes and another director holding one vote.

The approval by holders of a majority of the Series C Preferred Stock, voting separately as a class, will be required for the: (i) merger, sale of substantially all of our assets or our recapitalization, reorganization, liquidation, dissolution or winding up, (ii) redemption or acquisition of shares of our common stock other than in limited circumstances, (iii) declaration or payment of a dividend or distribution with respect to our capital stock, (iv) making any loan or advance, (v) amending our Certificate of Incorporation or Bylaws, (vi) authorizing or creating any new class or series of equity security, (vii) increasing the number of authorized shares for issuance under any existing stock or option plan, (viii) materially changing the nature of the business (ix) incurring any indebtedness, (x) engaging in or making investments not authorized by our board of directors, (xi) acquiring or divesting a material amount of assets, (xii) selling, assigning, licensing, pledging or encumbering our material technology or intellectual property, (xiii) entering into any corporate strategic relationship involving payment, contribution or assignment by us or to us of any assets.

Strengths and Competitive Advantages

We believe that the following are key attributes of our company:

- The ability to acquire conventional assets with existing production and upside in known hydrocarbon plays, and enhance production with selective applications of Plasma Pulse Technology.
- The Plasma Pulse Technology treatment is fast and is typically completed in a matter of hours;
- After treatment with our licensed technology, the well goes back into production immediately;
- To date, our licensed technology has been safe with in excess of 200 wells treated with the Plasma Pulse Technology with no known material damage;
- Our licensed technology does not use any chemicals or water.

History

Propell Technologies Group, Inc. (f/k/a Propell Corporation) is a Delaware corporation originally formed on January 29, 2008 as CA Photo Acquisition Corp. On April 10, 2008 Crystal Magic, Inc. ("CMI"), a Florida Corporation, merged with an acquisition subsidiary of Propell's, and we issued an aggregate of 108,000 shares to the former shareholders of CMI. On May 6, 2008, we acquired both Mountain Capital, LLC (d/b/a Arrow Media Solutions) ("AMS") and Auleron 2005, LLC (d/b/a Auleron Technologies) ("AUL") and made each a wholly owned subsidiary and issued a total of 41,987 shares of our Common Stock to the members of Mountain Capital, LLC and a total of 2,721 shares of our Common Stock to the members of AUL (the shares referenced above are in pre-split amounts, that is prior to our 50-to-1 reverse split in August 2012). In 2010 AUL and AMS were dissolved. In September 2010, CMI's assets were foreclosed upon by its largest creditor and these assets were liquidated and effective December 31, 2013, we disposed of our interest in CMI for nominal consideration. On July 6, 2012, we filed a Certificate of Designations, Rights and Preferences with the Secretary of State of the State of Delaware designating 5,000,000 preferred shares as Series A-1 Preferred Stock. On August 17, 2012, we filed an amendment to our Certificate of Incorporation, which increased the number of shares of our authorized Common Stock to 500,000,000 shares, effectuated a 50:1 reverse split of the number of shares of our outstanding common stock and changed our name to Propell Technologies Group, Inc. On February 4, 2013, we acquired all of the outstanding shares of Novas and Novas became our wholly owned subsidiary. Effective December 31, 2013, we disposed of our e-commerce line of business. On March 14, 2014, we filed a Certificate of Designations, Rights and Preferences with the Secretary of State of the State of Delaware designating 500,000 preferred shares as Series B Preferred Stock. On February 17, 2015, we filed a Certificate of Designations, Rights and Preferences with the Secretary of State of the State of Delaware designating 4,500,000 preferred shares as Series C Preferred Stock.

Available Information

Additional information about Propell is contained at our website, www.propell.com. Information contained on our website is not incorporated by reference into, and does not form any part of, this Annual Report on Form 10-K. We have included our website address as a factual reference and do not intend it to be an active link to our website. Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act are available free of charge through the investor relations page of our internet website as soon as reasonably practicable after those reports we electronically filed such material with, or furnish it to, the SEC. Our principal offices are located at 10655 Bammel North Houston Road, Suite 100, Houston, Texas, 77086. Our telephone number is (713) 227-0480 and our facsimile number is (713) 513-5700. Our fiscal year end is December 31.

Plasma Pulse Technology

On January 30, 2013, Novas entered into the exclusive, perpetual royalty bearing License Agreement with the Licensor, which was amended in March 2014 and further amended on December 23, 2014, that granted Novas the right to practice, develop, use, market and commercialize the proprietary process of the Licensor, which consists of a specially designed apparatus and certain proprietary technology, methods and processes that may be applied to enhance the production of hydrocarbon deposits using metallic plasma-generated, directed, non-linear, wide-band and elastic oscillations at resonance frequencies. The amended License Agreement provides Novas with the right to practice the licensed process and to utilize the Plasma Pulse Technology to provide services to third parties and for ourselves as well, and to sublicense the Plasma Pulse Technology in the United States and Mexico. The amended License Agreement also provides Novas with the right to design and have manufactured the apparatus and to make modifications and improvements to the Plasma Pulse Technology provided that the Licensor is provided a non-exclusive license to any such improvements and modifications and any patent rights of Novas related to the Plasma Pulse Technology. The process has been successfully utilized outside of the United States and Mexico for several years. The process utilizes a down-hole tool that is lowered into vertical wellbores to the perforated oil producing zone. When initiated, the tool delivers metallic plasma-generated, directed, non-linear, wide-band elastic oscillations at resonance frequencies to enhance oil production using the tool developed by the Licensor and enhanced by Novas. The Plasma Pulse Technology is suitable for oil wells as deep as 12,000 feet. By optimizing production efficiency combined with the resulting increased oil production we expect to extend the economic life of mature oil fields and to recover previously unrecoverable oil efficiently. Most of our tools only work in vertical wells with a minimum of 5 ½-inch casings and not in horizontal wells. We developed U.S. made tools to treat 4 ½-inch cased wells and have recently begun using the tools.

To date, we have used the Plasma Pulse Technology to treat over forty wells in the United States in eight states; Kansas, Louisiana, Oklahoma, Wyoming, California, Tennessee, Colorado and Texas, and twelve wells in Alberta, Canada. Many of the wells experienced an increase in oil production or injection rates after being treated with the Plasma Pulse Technology. Due to the fact that several wells we have treated had no prior operating history, operators that pay for the service are not required to deliver data and others have required that we maintain the confidentiality of the results of our treatments, we are unable to disclose the percent increase in oil production resulting from use of our technology for all wells that we have treated with the Plasma Pulse Technology.

On September 18, 2014, Novas entered into an exclusive limited use agreement with Pozotech Inc. (“Pozotech”), which was amended on December 23, 2014, for the exclusive right to the use of the Plasma Pulse Technology in Mexico. Pozotech has established relationships with certain companies in the oil industry in Mexico. The terms of the use agreement allow Pozotech to retain a commission per well for each well treated with the Plasma Pulse Technology due to an introduction made by Pozotech and Pozotech pays Novas a flat fee of \$25,000 per well treated upon its receipt of payment. Novas has the right to terminate the agreement upon three months’ prior written notice and if so terminated Pozotech may continue to use the Plasma Pulse Technology to perform its obligations under third party contracts then in effect but may not enter into new contracts with respect to the use of the Plasma Pulse Technology.

Numerous companies have utilized the Plasma Pulse Technology that Novas has licensed in the treatment and stimulation of oil wells throughout the Russian Federation, China, Kazakhstan, Uzbekistan and Czech Republic. The tool and subsequent well treatment have been credited with increasing oil production and injector well fluid flow in over 150 wells outside of the United States in Russia and China. It does so without any chemicals associated with hydraulic fracturing and therefore is deemed to be environmentally friendly. The treatment was created to clear the well drainage area of sedimentation clogging at the perforation zone.

The success of our application of our enhanced oil technology largely depends upon the selection of candidate wells.

The ideal candidate well requirements are as follows:

- no behind the casing flow;
- well bore inclination does not exceed 50 degrees;
- reservoir temperature is less than 110 degrees Celsius;
- porosity is no more than 30 degrees;
- permeability is at least 2-4mD;
- reservoir pressure is below 500 atm;
- presence of a drilling sump;
- fluid in the hole above the perforations;
- the number of perforation holes is greater than 10 per meter; and
- the reservoir pressure is greater than the saturation pressure.

Additionally, when selecting a target well or oil field NENA analyze the various soil formations such as limestone, sandstone, tight sand, dolomite, shale or clay. NENA also analyzes well logs and the reservoir drive system (water, gas, gravity) and water cuts. Depending upon the analysis of a candidate well a unique treatment plan is developed which includes the frequency, timing and magnitude of the plasma pulses.

Our Industry

According to the U.S. Energy Information Administration (EIA) 2014, the United States produced an estimated 3.2 billion barrels of crude oil and lease condensate in 2014 (over 8.7 million barrels/day), an increase of about 17% from 2013. This level represents the country's sixth consecutive annual production increase. Production from the Lower 48 states was 19% above the 2013 level. Alaska experienced a 2% production decline.

According to U.S. Crude Oil and Natural Gas Proved Reserves, 2014, released by the U.S. Energy Information Administration (EIA), U.S. crude oil proved reserves increased in 2014 for the sixth year in a row exceeding 39 billion barrels for the first time since 1972 with a net addition of 3.4 billion barrels of proved oil reserves (a 9% increase). U.S. natural gas proved reserves increased 10% in 2014, raising the U.S. total to a record 388.8 trillion cubic feet.

Texas added 2.1 billion barrels of crude oil and lease condensate proved reserves (the largest increase of any state in 2014), mostly located within the Texas portion of the Permian Basin and the Eagle Ford Shale play. North Dakota added 0.4 billion barrels of crude oil and lease condensate proved reserves (the second-largest increase in 2014) mostly from the Bakken Shale play.

The vast majority of US production increases and reserve additions is due to hydraulic fracturing of unconventional resources (tight sands and shales). Hydraulic fracturing is the fracturing of various rock layers by a pressurized liquid. Some hydraulic fractures form naturally—certain veins or dikes are examples—and can create conduits along which gas and petroleum from source rocks may migrate to reservoir rocks. Induced hydraulic fracturing, commonly known as fracking, is a technique in which usually a large amount of water is mixed with sand and/or chemicals (a different technique where only chemicals are used is referred to as acidizing). This mixture is injected at high pressure into faults to release petroleum, natural gas (including shale gas, tight gas, and coal seam gas), or other substances for extraction. This type of fracturing creates fractures from a wellbore drilled into reservoir rock formations.

Of the approximately 45,000 total wells drilled in the United States during 2012 we estimated that 31,500 or 70.0% were oil wells and the remainder gas wells that are not part of our target market. Of the 31,500 oil wells drilled approximately 15,750 or 50% were vertical wells. We believe that the size of the market will continue to grow for our technology as we already have the ability to treat certain existing wells. However due to the recent drop in oil prices from \$80 per barrel in December 2014 to \$45 per barrel on March 20, 2015, the number of drilling rigs have fallen by 734 from 1,803 on March 20, 2014 to 1,069 on March 20, 2015 (Baker Hughes Rig Counts). Therefore, the number of new wells that were drilled in 2015 were considerably less than the last few years.

Our Plan

On a go forward basis, we intend to acquire and grow a base of conventional producing assets by leveraging M&A and operational expertise, and by using Plasma Pulse well treatment, coupled with the expectation of a corresponding development of untapped hydrocarbon reserves once oil supply/ demand rebalances and prices rebound to produce revenue; however, there can be no assurance that we will generate sufficient revenues to cover our operating costs.

Since entering into the Sublicense Agreement with NENA, we no longer directly perform well treatment services and instead such services are performed by NENA in the USA and through the Technovita Sublicense Agreement, NENA has the exclusive right to use the Plasma Pulse Technology in Canada. The joint venture provides us with access to Technovita's experienced team, the ability to build one North American brand, the ability to leverage the strength of the combined entity expanding our geographic reach beyond the United States and into Canada. To date, we have not derived any revenue from the operations of NENA.

Intellectual Property

We license the "Plasma-Pulse Technology" from the Licensor, pursuant to the terms of an exclusive perpetual royalty bearing license we entered into in January 2013, which was amended in March 2014 and further amended on December 23, 2014. The amended license agreement provides us with the exclusive right to develop, use, market and commercialize the Plasma Pulse Technology for ourselves and/or third parties, sublicense and provide related services to third parties in the United States and Mexico including all of its states, districts, territories, possessions and protectorates. The amended license agreement also provides Novas with the right to design and have manufactured the apparatus and to make modifications and improvements to the Plasma Pulse Technology provided that the Licensor is provided a non-exclusive license to any such improvements and modifications and any patent rights of Novas related to the Plasma Pulse Technology. The license is limited to the United States and Mexico. It also provides that we will pay the Licensor royalties equal to seven and a half percent (7.5%) of Net Service Sales (as defined in the second amendment to the license agreement) and Sublicensing Consideration (as defined in the second amendment to the license agreement) and provides for a minimum royalty payment of \$500,000 per year from United States operations and \$500,000 per year from Mexican operations; however, no minimum royalty payment is due prior to the three year anniversary of the license agreement for revenue derived from the United States operations and no minimum royalty is due prior to December 31, 2015 for revenue derived from Mexico. Under certain circumstances, we have the right to make additional cash payments to cover certain royalty payment deficiencies. All royalty payments made by us as well as sublicensing revenue paid by us to Licensor are credited towards the minimum royalty payment. Royalties based on revenue derived from operations in one territory can be used to satisfy obligations for minimum royalty payments in the other territory. If the minimum royalty is not timely paid with respect to one of the two territories, the Licensor has the right to terminate the license with respect to that particular territory and if the minimum royalty payment for both territories is not paid, to terminate the license agreement. Subsequent to year end, the additional \$200,000 due to the Licensor on June 30, 2015 was waived. The Licensor is responsible for the cost of filing prosecuting and maintaining the patents and we are responsible for costs of obtaining marketing approvals. The Licensor has the right to terminate the license agreement upon our breach or default. If the Licensor dissolves, becomes insolvent or engages in or is the subject of any other bankruptcy proceeding then the Plasma Pulse Technology and patent rights in the United States shall become our property.

Marketing

To date, we have presented our technology at several conferences focused on worldwide energy concerns. We have presented at Energy Prospectus Group, the Winter North American Prospect Expo (NAPE), GHS 100 Energy Conference, HIS CERA Week 2013, See Thru Investor Convention and the Total Energy USA Conference.

Regulation

(a) General

Exploration and production operations are subject to various types of regulation at the federal, state and local levels. This regulation includes requiring permits to drill wells, maintaining bonding requirements to drill or operate wells, and regulating the location of wells, the method of drilling and casing wells, the surface use and restoration of properties on which wells are drilled, and the plugging and abandoning of wells. Our operations are also subject to various conservation laws and regulations.

Typically oil enhancements such as hydraulic fracturing operations have historically been overseen by state regulators as part of their oil and gas regulatory programs; however, the EPA has asserted federal regulatory authority over certain hydraulic fracturing activities involving diesel under the Safe Drinking Water Act and has released draft permitting guidance for hydraulic fracturing activities that use diesel in fracturing fluids in those states where EPA is the permitting authority. As a result, we may be subject to additional permitting requirements for our operations. These permitting requirements and restrictions could result in delays in operations at well sites as well as increased costs to make wells productive. In addition, legislation introduced in Congress provides for federal regulation of hydraulic fracturing under the Safe Drinking Water Act and require the public disclosure of certain information regarding the chemical makeup of hydraulic fracturing fluids. Moreover, on November 23, 2011, the EPA announced that it was granting in part a petition to initiate a rulemaking under the Toxic Substances Control Act, relating to chemical substances and mixtures used in oil and gas exploration and production. Further, on May 4, 2012, the Department of the Interior's Bureau of Land Management ("BLM") issued a proposed rule to regulate hydraulic fracturing on public and Indian land.

On August 16, 2012, the EPA published final rules that establish new air emission control requirements for natural gas and NGL production, processing and transportation activities, including New Source Performance Standards to address emissions of sulfur dioxide and volatile organic compounds, and National Emission Standards for Hazardous Air Pollutants (NESHAPS) to address hazardous air pollutants frequently associated with gas production and processing activities. Among other things, these final rules require the reduction of volatile organic compound emissions from natural gas wells through the use of reduced emission completions or "green completions" on all hydraulically fractured wells constructed or refractured after January 1, 2015. In addition, gas wells are required to use completion combustion device equipment (e.g., flaring) by October 15, 2012 if emissions cannot be directed to a gathering line. Further, the final rules under NESHAPS include maximum achievable control technology (MACT) standards for "small" glycol dehydrators that are located at major sources of hazardous air pollutants and modifications to the leak detection standards for valves. We are currently reviewing this new rule and assessing its potential impacts. Compliance with these requirements, especially the imposition of these green completion requirements, may require modifications to certain of our operations, including the installation of new equipment to control emissions at the well site that could result in significant costs, including increased capital expenditures and operating costs, and could adversely impact our business.

In addition to these federal legislative and regulatory proposals, some states such as Pennsylvania, West Virginia, Texas, Kansas, Louisiana and Montana, and certain local governments have adopted, and others are considering adopting, regulations that could restrict hydraulic fracturing in certain circumstances, including requirements regarding chemical disclosure, casing and cementing of wells, withdrawal of water for use in high-volume hydraulic fracturing of horizontal wells, baseline testing of nearby water wells, and restrictions on the type of additives that may be used in hydraulic fracturing operations. For example, the Railroad Commission of Texas adopted rules in December 2011 requiring disclosure of certain information regarding the components used in the hydraulic fracturing process. In addition, Pennsylvania's Act 13 of 2012 became law on February 14, 2012 and amended the state's Oil and Gas Act to impose an impact fee for drilling, increase setbacks from certain water sources, require water management plans, increase civil penalties, strengthen the Pennsylvania Department of Environmental Protection's (PaDEP) authority over the issuance of drilling permits, and require the disclosure of chemical information regarding the components in hydraulic fracturing fluids.

(b) OSHA and Other Laws and Regulations.

We are subject to the requirements of the federal Occupational Safety and Health Act (OSHA), and comparable state laws. The OSHA hazard communication standard, the EPA community right-to-know regulations under the Title III of CERCLA and similar state laws require that we organize and/or disclose information about hazardous materials used or produced in our operations. Also, pursuant to OSHA, the Occupational Safety and Health Administration has established a variety of standards related to workplace exposure to hazardous substances and employee health and safety.

(c) Oil Pollution Act.

The Federal Oil Pollution Act of 1990 (OPA) and resulting regulations impose a variety of obligations on responsible parties related to the prevention of oil spills and liability for damages resulting from such spills in waters of the United States. The term "waters of the United States" has been broadly defined to include inland water bodies, including wetlands and intermittent streams. The OPA assigns joint and several strict liability to each responsible party for oil removal costs and a variety of public and private damages. We believe that we substantially comply with the Oil Pollution Act and related federal regulations.

(d) Clean Water Act.

The Federal Water Pollution Control Act (Clean Water Act) and resulting regulations, which are primarily implemented through a system of permits, also govern the discharge of certain contaminants into waters of the United States. Sanctions for failure to comply strictly with the Clean Water Act are generally resolved by payment of fines and correction of any identified deficiencies. However, regulatory agencies could require us to cease construction or operation of certain facilities or to cease hauling wastewaters to facilities owned by others that are the source of water discharges. We believe that we substantially comply with the Clean Water Act and related federal and state regulations.

Competition

Competition in the oil industry is intense. We will compete with other technologies such as gas injection, polymer flooding, microbial injection and thermal methods. As a new technology, we will compete with many of the other technologies that have been proven to be economically successful in enhancing oil production in the United States. We also actively compete against other oil companies with substantial financial and other resources.

Item 1A. Risk factors

Investing in our Company involves a high degree of risk. In addition to the risks related to our business set forth in this Form 10-K, you should carefully consider the risks described below before investing in our Company. Additional risks, uncertainties and other factors not presently known to us or that we currently deem immaterial may also impair our business operations.

Risks Relating to Our Company

Our business is difficult to evaluate because we are currently focused on a new line of business and a new business strategy and have very limited operating history and limited information.

We have recently engaged in a new business line involving our Plasma Pulse Technology. We have also recently switched our business model with our entry into a Joint Venture Agreement with Technovita. There is a risk that the joint venture will be unable to successfully operate this new line of business or be able to successfully integrate it with Technovita's management and structure. The joint venture estimates of capital, personnel and equipment required for our new line of business are based on the experience of management and businesses they are familiar with. The joint venture management has limited direct experience in this new line of business. The joint venture is subject to the risks such as their ability to implement their business plan, market acceptance of the proposed business and services, under-capitalization, cash shortages, limitations with respect to personnel, financing and other resources, competition from better funded and experienced companies, and uncertainty of their ability to generate revenues. There is no assurance that the joint venture activities will be successful or will result in any revenues or profit, and the likelihood of their success must be considered in light of the stage of development. To date, we have not derived any revenue from the joint venture. Even if the joint venture generates revenue, there can be no assurance that it will be profitable. In addition, no assurance can be given that the joint venture will be able to consummate its business strategy and plans, as described herein, or that financial, technological, market, or other limitations may force the joint venture to modify, alter, significantly delay, or significantly impede the implementation of such plans. The joint venture has insufficient results for investors to use to identify historical trends or even to make quarter-to-quarter comparisons of its operating results. You should consider our prospects in light of the risk, expenses and difficulties we will encounter as an early stage company. Our revenue and income potential is unproven and our business model is continually evolving. We are subject to the risks inherent to the operation of a new business enterprise, and cannot assure you that we will be able to successfully address these risks.

We currently have limited revenues from our Plasma Pulse Technology and may not generate any revenue in the near future, if at all, from the use of our technology.

We currently have generated limited revenues from the use of our Plasma Pulse Technology. To date, we have not derived any revenue from the joint venture. The majority of the wells that were treated were treated as sample wells to demonstrate the ability of the Plasma Pulse Technology at no cost to the well owner. Therefore, there can be no assurance that well owners will determine that the price to be paid by the joint venture customers for their services, whether in the form of a cash payment or profit sharing arrangement, will be deemed to be reasonable and that customers will be willing to pay such prices.

We may not be profitable.

We expect to incur operating losses for the foreseeable future. For the years ended December 31, 2015 and 2014, respectively, we had net revenues of \$91,000 and \$190,035, respectively, from our oil recovery business. For the years ended December 31, 2015 and 2014, we sustained a net loss of \$4,331,980 and \$5,018,483, respectively. To date, we have not generated significant revenue from the Plasma Pulse Technology and NENA has not generated any revenue from the Plasma Pulse Technology. Our ability to become profitable depends on our ability to have successful operations and generate and sustain sales, while maintaining reasonable expense levels, all of which are uncertain in light of our limited operating history in our current line of business and our recent changes in business strategy.

Our future plans and operations may require that we raise additional capital.

To date, we have not generated enough revenue from operations to pay all of our expenses. During the year ended December 31, 2015 and the year ended December 31, 2014 we raised a total of \$14,750,000 from our private placement of Series C Preferred stock to Ervington consummated during February and June 2015 and \$1,103,000 during the period June to August of 2014 and an additional \$750,000 from the sale of our Series B Preferred Stock in March 2014. We have used the funds raised in our financings for working capital purposes and intend to acquire an oil well with the funds that were recently raised. However, there can be no assurance that we will be able to achieve our goals with the cash on hand or the cash generated from operations.

The joint venture may not be able to service customers with the six tools that we currently have.

The joint ventures ability to continue to service customers and expand its business is dependent upon it acquiring additional apparatuses to be utilized with the Plasma Pulse Technology. We currently have six down-hole tools that can treat 5 ½ inch cased wells and one new tool that treats 4 ½-inch cased wells and horizontal wells. If the tools should require repair the joint venture may be unable to service customers. In addition, with only nine tools, the joint venture can only treat a limited number of wells at a time and are unable to treat wells on days when the tools are in transit from one customer's well to another well. In addition, only one of the tools can treat the 4 ½-inch cased wells and horizontal wells.

There is no guarantee that the planned joint venture will be successful.

To date, Technovita has treated very limited wells with the Plasma Pulse Technology and therefore there is no guarantee that the Technovita team will be successful in meeting its milestones. Due to limited data about well treatment it is difficult to assess the revenue to be derived from the Canadian wells, which may not perform as expected and may contribute less than 40% to the revenue of the planned joint venture. We will only have a 60% interest in revenue derived from treatment of U.S. wells instead of our current 100% interest. Although Novas has the right to terminate the joint venture if certain milestones are not met, if the milestones are met there can be no assurance that the revenue derived from U.S. wells will not exceed 60% of the revenue of the joint venture. We did not receive a valuation or fairness opinion regarding the joint venture and Novas' percent ownership in the joint venture. To date, we have contributed \$900,000 to the joint venture and are required to contribute and additional \$300,000 to the joint venture that may not be recovered in the event that the joint venture dissolves. In addition, the joint venture will bear the additional costs associated with the additional Technovita management team.

There is uncertainty as to market acceptance of the Plasma Pulse Technology and products.

The Plasma Pulse Technology that we license has been utilized in the United States on a limited basis. NENA has not yet generated any revenue from the Plasma Pulse Technology and prior to sublicensing the Plasma Pulse Technology to NENA, we had not generated significant revenue from the Plasma Pulse Technology and there can be no assurance that the Plasma Pulse Technology will be accepted in the market or that NENA's commercialization efforts will be successful.

The results of the application of our technology for initial well treatments may not support future well treatments and are not necessarily predictive of future long-term results on the wells for which the initial data is favorable.

To date, we have applied the licensed Plasma Pulse Technology to treat over forty wells in the USA and an additional twelve wells in Canada, and we do not have long term results on the wells that were treated. Of such wells, we have seen improvement results in many wells. Favorable results in our early treatments may not last and may not be repeated in later treatments of other wells. Success in early treatments does not ensure that wells treated at a later date will be successful. Additionally, collecting treatment data results is not always possible as operators that pay for the service are not required to deliver data or we are required to work under non-disclosure agreements.

We rely on a license to use the Plasma Pulse Technology that is material to our business and if the agreement were to be terminated, it would halt our ability to market our technology, as well as have an immediate material adverse effect on our business, operating results and financial condition.

We have a License Agreement with the Licensor granting us the right to use certain critical intellectual property, which we have sub-licensed to NENA. If we or NENA breach the terms of this agreement, including any failure to make minimum royalty payments required thereunder, the Licensor has the right to terminate the license. If we or NENA were to lose or otherwise be unable to maintain this license on acceptable terms, or find that it is necessary or appropriate to secure new licenses from other third parties, it would halt our ability or that of NENA to market the Plasma Pulse Technology, which would have an immediate material adverse effect on our business, operating results and financial condition.

We may be unable to generate sufficient revenues to meet the minimum royalties under our license agreement.

The License Agreement with the Licensor requires us to pay aggregate minimum royalty payments of \$1,000,000 per year; however, no minimum royalty payment is due prior to (i) December 31, 2015 with respect to Mexican operations and (ii) the three-year anniversary of the license agreement with respect to the United States operations. If the minimum royalty is not timely paid, the Licensor has the right to terminate the license agreement with respect to a certain territory under certain circumstances and in certain other circumstances has the right to terminate the entire agreement. Subsequent to year end, the \$200,000 due with respect to our license to operate in Mexico was waived. To date, we have not generated enough revenue to pay minimum royalty payments. No assurance can be given that the joint venture or we will generate sufficient revenue to make these minimum royalty payments. Any failure to make the payments would permit the Licensor to terminate the license. If we were to lose or otherwise be unable to maintain this license, it would halt our ability to market our technology, which would have an immediate material adverse effect on our business, operating results and financial condition.

The beneficial ownership of a significant percentage of our common stock gives Ervington effective control of us, and limits the influence of other shareholders on important policy and management issues.

Ervington currently beneficially owns approximately 50.9% of our voting shares on a fully diluted basis (including outstanding options, warrants and convertible instruments). In addition, Ervington currently has the right to three votes on our board of directors and has appointed two members with an aggregate of three votes, which constitutes a majority of the votes on our board of directors. As a result of these appointment rights and its voting control of our company, Ervington has the power to control the outcome of all matters submitted to our shareholders for approval, including the election of our directors, our business strategy, our day-to-day operations and any proposed merger, consolidation or sale of all or substantially all of our assets. Ervington's control of our company could discourage the acquisition of our common stock by potential investors and could have an anti-takeover effect, preventing a change in control of our company that might be otherwise beneficial to our shareholders, and possibly depress the trading price of our common stock. There can be no assurance that conflicts of interest will not arise with respect to Ervington's ownership and control of our company or that any conflicts will be resolved in a manner favorable to the other shareholders of our company.

Trends in oil and natural gas prices affect the level of exploration, development, and production activity of our customers and the demand for our services and products, which could have a material adverse effect on our business, consolidated results of operations, and consolidated financial condition.

Demand for the services and products of the joint venture or oil derived from wells we acquire is particularly sensitive to the level of exploration, development, and production activity of, and the corresponding capital spending by, oil and natural gas companies, including national oil companies. The level of exploration, development, and production activity is directly affected by trends in oil and natural gas prices, which historically have been volatile and are likely to continue to be volatile.

Prices for oil and natural gas are subject to large fluctuations in response to relatively minor changes in the supply of and demand for oil and natural gas, market uncertainty, and a variety of other economic factors that are beyond our control. The recent decline in oil prices from \$80 per barrel in December 2014 to \$40 per barrel in December 2015 has resulted in a decline in oil drilling which has depressed the immediate level of exploration, development, and production activity, which could have a material adverse effect on our business, consolidated results of operations, and consolidated financial condition. Even the perception of longer-term lower oil and natural gas prices by oil and natural gas companies can similarly reduce or defer major expenditures given the long-term nature of many large-scale development projects. Factors affecting the prices of oil and natural gas include:

- the level of supply and demand for oil and natural gas, especially demand for natural gas in the United States;

- governmental regulations, including the policies of governments regarding the exploration for and production and development of their oil and natural gas reserves;
- weather conditions and natural disasters;
- worldwide political, military, and economic conditions;
- the level of oil production by non-OPEC countries and the available excess production capacity within OPEC;
- oil refining capacity and shifts in end-customer preferences toward fuel efficiency and the use of natural gas;
- the cost of producing and delivering oil and natural gas; and
- potential acceleration of development of alternative fuels.

Legislative and regulatory changes affecting the environment and the oil industry could adversely affect our business

Political, economic and regulatory influences are subjecting oil recovery efforts to potential fundamental changes that could substantially affect our results of operations. State and local governments, for example, continue to propose and pass legislation designed to reduce the impact of oil recovery efforts on the environment. We cannot predict the effect any legislation may have on our business and we can offer no assurances they will not have a material adverse effect on our business.

Various federal legislative and regulatory initiatives have been undertaken which could result in additional requirements or restrictions being imposed on hydraulic fracturing operations and possibly our operations. For example, the Department of Interior has issued proposed regulations that would apply to hydraulic fracturing operations on wells that are subject to federal oil and gas leases and that would impose requirements regarding the disclosure of chemicals used in the hydraulic fracturing process as well as requirements to obtain certain federal approvals before proceeding with hydraulic fracturing at a well site. These regulations, if adopted, could also be applicable to our operations and would establish additional levels of regulation at the federal level that could lead to operational delays and increased operating costs. At the same time, legislation and/or regulations have been adopted in several states that require additional disclosure regarding chemicals used in the hydraulic fracturing process but that include protections for proprietary information. Legislation and/or regulations are being considered at the state and local level that could impose further chemical disclosure or other regulatory requirements (such as restrictions on the use of certain types of chemicals or prohibitions on hydraulic fracturing operations and competitive operations in certain areas) that could affect our operations.

The adoption of any future federal, state, local, or foreign laws or implementing regulations imposing reporting obligations on, or limiting or banning, the hydraulic fracturing process if applicable to competitive processes such as ours, could make it more difficult to complete natural gas and oil wells and could have a material adverse effect on our liquidity, consolidated results of operations, and consolidated financial condition.

Liability for cleanup costs, natural resource damages, and other damages arising as a result of environmental laws could be substantial and could have a material adverse effect on our liquidity, consolidated results of operations, and consolidated financial condition.

We will be exposed to claims under environmental requirements for wells we acquire and treat and the joint venture will be exposed to claims under environmental requirements for wells it treats. In the United States, environmental requirements and regulations typically impose strict liability. Strict liability means that in some situations we or the joint venture could be exposed to liability for cleanup costs, natural resource damages, and other damages as a result of our or the joint ventures conduct that was lawful at the time it occurred or the conduct of prior operators or other third parties. Liability for damages arising as a result of environmental laws could be substantial and could have a material adverse effect on our liquidity, consolidated results of operations, and consolidated financial condition.

Existing or future laws, regulations, related to greenhouse gases and climate change could have a negative impact on our business and may result in additional compliance obligations with respect to the release, capture, and use of carbon dioxide that could have a material adverse effect on our liquidity, consolidated results of operations, and consolidated financial condition.

Changes in environmental requirements related to greenhouse gases and climate change may negatively impact demand for the services of the joint venture. For example, oil and natural gas exploration and production may decline as a result of environmental requirements (including land use policies responsive to environmental concerns). State, national, and international governments and agencies have been evaluating climate-related legislation and other regulatory initiatives that would restrict emissions of greenhouse gases in areas in which we conduct business. Because our business depends on the level of activity in the oil and natural gas industry, existing or future laws, regulations, treaties, or international agreements related to greenhouse gases and climate change, including incentives to conserve energy or use alternative energy sources, could have a negative impact on our business if such laws, regulations, treaties, or international agreements reduce the worldwide demand for oil and natural gas. Likewise, such restrictions may result in additional compliance obligations with respect to the release, capture, sequestration, and use of carbon dioxide that could have a material adverse effect on our liquidity, consolidated results of operations, and consolidated financial condition.

Our failure to protect our proprietary information and any successful intellectual property challenges or infringement proceedings against us could materially and adversely affect our competitive position.

We rely on a variety of intellectual property rights that the joint venture uses in its services and products. We may not be able to successfully preserve these intellectual property rights in the future, and these rights could be invalidated, circumvented, or challenged. In addition, the laws of some foreign countries in which our services and products may be sold do not protect intellectual property rights to the same extent as the laws of the United States. Our failure to protect our proprietary information and any successful intellectual property challenges or infringement proceedings against us could materially and adversely affect our competitive position and that of the joint venture.

Any future recompletion activities engaged upon by us on wells that we acquire may not be productive.

We may acquire properties upon which we believe recompletion activity will be successful. Recompletion or workovers on oil and natural gas wells involves numerous risks, including the risk that we will not encounter commercially productive oil or natural-gas reservoirs. The costs of recompleting, and operating wells are often uncertain, and operations may be curtailed, delayed, or canceled as a result of a variety of factors, including the following unexpected drilling conditions:

- pressure or irregularities in formations;
- equipment failures or accidents;
- fires, explosions, blowouts, and surface cratering;
- difficulty identifying and retaining qualified personnel;
- title problems;
- other adverse weather conditions; and
- shortages or delays in the delivery of equipment

Certain of our future activities may not be successful and, if unsuccessful, this failure could have an adverse effect on our future results of operations and financial condition.

We intend to become an exploitation and production stage company.

We intend to use the proceeds from the sale of our Series C Preferred Stock to acquire oil fields and intend to become an exploitation and production stage company which will face a high risk of business failure because of the unique difficulties and uncertainties inherent in oil and gas exploitation ventures. Potential investors should be aware of the risks and uncertainties normally encountered by oil and gas companies and the high rate of failure of such companies. The likelihood of our success must be considered in light of the problems, expenses, difficulties, complications and delays that could be encountered in connection with our planned exploitation and followed drilling. These potential problems include, but are not limited to, possible problems relating to exploitation and additional costs and expenses that may reduce our current forecast of income and asset value. Additional expenditures related to exploitation may not result in the confirmation of anticipated oil and gas reserves. Problems such as unusual or unexpected formations and other conditions are involved in mineral development and often result in unsuccessful efforts. The acquisition of additional fields will be dependent upon us possessing capital resources at that time in order to purchase and/or maintain such concessions. If no funding is available, we may be forced to cease our exploitation activities.

Our anticipated future oil drilling and producing operations will involve various risks.

Once we acquire wells and commence oil exploitation activities, we will be subject to all the risks normally incident to the operation and development of oil and natural gas properties, including:

- well blowouts, cratering, explosions and human related accidents
- mechanical, equipment and pipe failures
- adverse weather conditions and natural disasters
- civil disturbances and terrorist activities
- oil and natural gas price reductions
- environmental risks stemming from the use, production, handling and disposal of water, waste materials, hydrocarbons and other substances into the air, soil or water title problems
- limited availability of financing
- marketing related infrastructure, transportation and processing limitations
- regulatory compliance issues

We intend to maintain insurance against many potential losses or liabilities arising from well operations in accordance with customary industry practices and in amounts believed by management to be prudent. However, insurance will not protect us against all risks.

Uncertainty of economic conditions, worldwide and in the United States may have a significant negative effect on operating results, liquidity and financial condition.

Effects of change in domestic and international economic conditions could include a decline in demand for oil and natural gas resulting in decreased oil, and natural gas reserves due to curtailed drilling activity; A decline in reserves would lead to a decline in production, and either a production decline, or a decrease in oil, and natural gas prices, would have a negative impact on our cash flow, profitability and value.

There is competition in the oil and gas industry for acquisition of oil wells and we have limited financial and personnel resources with which to compete.

Competition in the oil and gas industry is extremely intense in all aspects, including but not limited to raising investment capital and obtaining qualified managerial and technical employees. We are an insignificant participant in the oil and gas industry due to our limited financial and personnel resources. Our competition includes large established oil and gas companies, with substantial capabilities and with greater financial and technical resources than we have, as well as the myriad of other small stage companies. These companies are able to pay more for development prospects and productive oil and natural gas properties and are able to define, evaluate, bid for, purchase and subsequently drill a greater number of properties and prospects than our financial or human resources permit. As a result of this competition, we may be unable to attract the necessary funding or qualified personnel. If we are unable to successfully compete for funding or for qualified personnel, our activities may be slowed, suspended or terminated, any of which would have a material adverse effect on our ability to continue operations.

Shortages of oil field equipment, services, qualified personnel and resulting cost increases could adversely affect results of operations.

The demand for qualified and experienced field personnel, geologists, geophysicists, engineers and other professionals in the oil and natural gas industry can fluctuate significantly, often in correlation with oil and natural gas prices, resulting in periodic shortages. When demand for rigs and equipment increases due to an increase in the number of wells being drilled, there have been shortages of drilling rigs, hydraulic fracturing equipment and personnel and other oilfield equipment. Higher oil and natural gas prices generally stimulate increased demand for, and result in increased prices of, drilling rigs, crews and associated supplies, equipment and services. These shortages or price increases could negatively affect the ability to drill wells and conduct ordinary operations by the operators of the Company's wells, resulting in an adverse effect on the Company's financial condition, cash flow and operating results.

Our operations will be subject to permitting requirements.

Oil drilling operations will be subject to permitting requirements, which could require us to delay, suspend or terminate our operations. Our operations, including but not limited to any exploitation program, require permits from the U.S. government. We may be unable to obtain these permits in a timely manner, on reasonable terms, or at all. If we cannot obtain or maintain the necessary permits, or if there is a delay in receiving these permits, our timetable and business plan for exploration and/or exploitation, may be materially and adversely affected.

International expansion of our business exposes us to business, regulatory, political, operational, financial and economic risks associated with doing business outside of the United States.

Our amended license agreement grants us a license, which has been sub-licensed to NENA, to utilize the Plasma Pulse Technology in Mexico and the joint venture is anticipated to conduct business in Canada. Doing business internationally involves a number of risks, including:

- multiple, conflicting and changing laws and regulations such as tax laws, export and import restrictions, employment laws, regulatory requirements and other governmental approvals, permits and licenses;
- failure by us or NENA to obtain regulatory approvals for the sale or use of our technology in various countries;
- difficulties in managing foreign operations;
- financial risks, such as longer payment cycles, difficulty enforcing contracts and collecting accounts receivable and exposure to foreign currency exchange rate fluctuations;
- reduced protection for intellectual property rights;
- natural disasters, political and economic instability, including wars, terrorism and political unrest, outbreak of disease, boycotts, curtailment of trade and other business restrictions; and
- failure to comply with the Foreign Corrupt Practices Act, including its books and records provisions and its anti-bribery provisions, by maintaining accurate information and control over activities.

Any of these risks, if encountered, could significantly harm the future international expansion and operations of the joint venture and, consequently, have a material adverse effect on our financial condition, results of operations and cash flows.

We will have limited control over the activities on properties for which we own an interest but we do not operate.

We may acquire interests in oil wells that will be operated by other companies. We will have limited ability to influence or control the operation or future development of these non-operated properties or the amount of capital expenditures that we are required to fund with respect to them. Our dependence on the operator and other working interest owners for these projects and our limited ability to influence or control the operation and future development of these properties could materially adversely affect the realization of our targeted returns on capital and lead to unexpected future costs.

The loss of key personnel and an inability to attract and retain additional personnel could affect our ability to successfully grow our business.

We are highly dependent upon the continued service and performance of our senior management. The loss of any key employees may significantly delay or prevent the achievement of our business objectives. We believe that our future success will also depend in part on our and their continued ability to identify, hire, train and motivate qualified personnel. We face intense competition for qualified individuals. We may not be able to attract and retain suitably qualified individuals who are capable of meeting our growing operational and managerial requirements, or we may be required to pay increased compensation in order to do so. Our failure to attract and retain qualified personnel could impair our ability to implement our business plan.

We may be adversely affected by actions of our competitors.

The market in the oil and gas recovery industry is highly competitive. Many of our competitors have substantially greater financial, technical and other resources than we have. We face competition from owners of oil wells as well as large oil and gas companies. The ability of the joint venture to compete effectively depends in part on market acceptance of our technology, the environmental impact of our technology and the joint venture's ability to service its customers in a timely manner. There can be no assurance that the joint venture will be able to compete effectively or that it will respond appropriately to industry trends or to activities of competitors.

Most of the potential customers of the joint venture are owners of oil wells and are subject to risks faced by those industries.

We expect the joint venture to derive a significant portion of our future revenues from the implementation of the Plasma Pulse Technology. As a result, it will be subject to risks and uncertainties that affect the oil industry, such as availability of capital, weather and environmental issues, government regulation, and the uncertainty resulting from technological change.

We have no separate independent audit committee. Our full Board of Directors functions as our audit committee and is composed of four directors, none of whom are considered to be independent. This may hinder our Board of Directors' effectiveness in fulfilling the functions of the audit committee.

Currently, we have no separate audit committee. Our full Board of Directors functions as our audit committee and is comprised of four directors, one of whom has two votes and none of whom are considered to be "independent" in accordance with the requirements of Rule 10A-3 under the Exchange Act. An independent audit committee plays a crucial role in the corporate governance process, assessing the Company's processes relating to its risks and control environment, overseeing financial reporting, and evaluating internal and independent audit processes. The lack of an independent audit committee may prevent the Board of Directors from being independent from management in its judgments and decisions and its ability to pursue the committee's responsibilities without undue influence. We may have difficulty attracting and retaining directors with the requisite qualifications. If we are unable to attract and retain qualified, independent directors, the management of our business could be compromised.

Our Board of Directors, which does not have a majority of independent directors, acts as our compensation committee, which presents the risk that compensation and benefits paid to these executive officers that are board members and other officers may not be commensurate with our financial performance.

A compensation committee consisting of independent directors is a safeguard against self-dealing by company executives. Our Board of Directors acts as the compensation committee and determines the compensation and benefits of our executive officers, administers our employee stock and benefit plans, and reviews policies relating to the compensation and benefits of our employees. Although all board members have fiduciary obligations in connection with compensation matters, our lack of an independent compensation committee presents the risk that our executive officers on the board may have influence over their personal compensation and benefits levels that may not be commensurate with our financial performance.

Trading on the OTCQB may be sporadic because it is not a stock exchange, and stockholders may have difficulty reselling their shares.

Trading in stock quoted on the OTCQB is often thin and characterized by wide fluctuations in trading prices, due to many factors that may have little to do with our operations or business prospects. Moreover, the OTCQB is not a stock exchange, and trading of securities on the OTCQB is often more sporadic than the trading of securities listed on a quotation system like NASDAQ or a stock exchange like NYSE. Accordingly, you may have difficulty reselling any of the shares you purchase from the selling stockholders.

We cannot guarantee that an active trading market will develop for our common stock.

There currently is not an active public market for our common stock and there can be no assurance that a regular trading market for our common stock will ever develop or that, if developed, it will be sustained. Therefore, purchasers of our common stock should have long-term investment intent and should recognize that it may be difficult to sell the shares, notwithstanding the fact that they are not restricted securities. We cannot predict the extent to which a trading market will develop or how liquid a market might become.

There may be future dilution of our common stock.

If we sell additional equity or convertible debt securities, those sales could result in additional dilution to our stockholders. Holders of our Series A-1 Preferred Stock have the right to convert their shares into 31,375,000 shares of common stock and; the holder of the Series B Preferred Stock has the right to convert his shares into 4,000,000 common shares and Ervington, the sole holder of the Series C Preferred Stock has the right to convert its shares of Series C Preferred Stock into 120,000,000 shares of common stock. We also have warrants outstanding that are convertible into 6,339,498 shares of our common stock.

Recent accounting changes may make it more difficult for us to sustain profitability.

We are a publicly traded company, and are therefore subject to the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"), which requires that our internal controls and procedures comply with Section 404 of the Sarbanes-Oxley Act. We expect compliance to be costly and it could impact our results of operations in future periods. In addition, the Financial Accounting Standards Board now requires us to follow the accounting standards on share based payments. Under this rule, companies must calculate and record in their statement of operations the cost of equity instruments, such as stock options or restricted stock, awarded to employees for services. We expect that we will use stock options to attract, incentivize and retain our employees and will therefore incur the resulting stock-based compensation expense. This will continue to adversely affect our operating results in future periods.

Maintaining and improving our financial controls and the requirements of being a public company may strain our resources, divert management's attention and affect our ability to attract and retain qualified board members.

As a public company, we are subject to the reporting requirements of the Exchange Act, the Sarbanes-Oxley Act and the rules and regulations of an exchange or the OTCQB. The requirements of these rules and regulations will likely continue to increase our legal, accounting and financial compliance costs, make some activities more difficult, time-consuming or costly and may also place undue strain on our personnel, systems and resources.

The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and effective internal control over financial reporting. Significant resources and management oversight are required to design, document, test, implement and monitor internal control over relevant processes and to, remediate any deficiencies. As a result, management's attention may be diverted from other business concerns, which could harm our business, financial condition and results of operations. These efforts also involve substantial accounting related costs.

We have identified material weaknesses in our internal controls, and we cannot provide assurances that these weaknesses will be effectively remediated or that additional material weaknesses will not occur in the future. If our internal control over financial reporting or our disclosure controls and procedures are not effective, we may not be able to accurately report our financial results, prevent fraud, or file our periodic reports in a timely manner, which may cause investors to lose confidence in our reported financial information and may lead to a decline in our stock price.

Our management is responsible for establishing and maintaining adequate internal control over our financial reporting, as defined in Rule 13a-15(f) under the Exchange Act. We have identified material weaknesses in our internal controls with respect to our financial statement for the year ended December 31, 2014. Our management discovered insufficient controls over review and accounting for certain complex transactions and a lack of segregation of duties.

The design of monitoring controls used to assess the design and operating effectiveness of our internal controls is inadequate.

We have begun to take actions that we believe will substantially remediate the material weaknesses identified. In response to the identification of our material weaknesses, we are in the process of expanding our finance and accounting staff. However, we cannot assure you that our internal control over financial reporting, as modified, will enable us to identify or avoid material weaknesses in the future.

We have never paid dividends and have no plans to pay dividends on our common stock in the future.

Holders of shares of our common stock are entitled to receive such dividends as may be declared by our Board of Directors. To date, we have paid no cash dividends on our shares of our preferred or common stock and we do not expect to pay cash dividends in the foreseeable future on our common stock. Our Series C Preferred Stock accrues dividends at the rate of 4% per annum of the stated price, which initially is \$3.27777778 payable annually in arrears on December 31 of each year. In addition, our Series B Preferred Stock accrues dividends at the rate of 8% per annum of the stated price, which initially is \$10.00 payable annually in arrears on December 31 of each year. Other than dividend payments on the preferred stock we intend to retain future earnings, if any, to provide funds for operations of our business. Therefore, any return investors in our preferred or common stock may have will be in the form of appreciation, if any, in the market value of their shares of common stock.

Our stock price may be volatile or may decline regardless of our operating performance.

The market price of our common stock may fluctuate significantly in response to numerous factors, many of which are beyond our control, including:

- price and volume fluctuations in the overall stock market;
- changes in operating performance and stock market valuations of other technology companies generally, or those in our industry in particular;
- the public's response to our press releases or other public announcements, including our filings with the SEC;
- announcements by us or our competitors of significant technical innovations, acquisitions, strategic partnerships, joint ventures or capital commitments;
- introduction of technologies or product enhancements that reduce the need for our products;
- market conditions or trends in our industry or the economy as a whole;
- the loss of key personnel;
- lawsuits threatened or filed against us;
- future sales of our common stock by our executive officers, directors and significant stockholders; and
- other events or factors, including those resulting from war, incidents of terrorism or responses to these events.

We may issue preferred stock with greater rights than our common stock.

Our Certificate of Incorporation authorizes the Board of Directors to issue up to 10 million shares of preferred stock, par value \$.001 per share. The preferred stock may be issued in one or more series, the terms of which may be determined by the Board of Directors at the time of issuance without further action by stockholders, and may include voting rights (including the right to vote as a series on particular matters), preferences as to dividends and liquidation, conversion and redemption rights and sinking fund provisions. Any preferred stock that is issued may rank ahead of our common stock, in terms of dividends, liquidation rights and voting rights that could adversely affect the voting power or other rights of the holders of our common stock. In the event of such an issuance, the Preferred Stock could be utilized, under certain circumstances, as a method of discouraging, delaying or preventing a change of control of our company. Any delay or prevention of a change of control transaction or changes in our Board of Directors or management could deter potential acquirers or prevent the completion of a transaction in which our stockholders could require substantial premium over the then current market price per share. We currently have 3,137,500 Series A-1 Preferred Stock outstanding, 40,000 Series B Preferred Stock outstanding and have 4,500,000 Series C Preferred Stock outstanding. The Series C Preferred Stock has the right to annual dividends in preference to all other preferred stock and the common stock and the Series B Preferred Stock is also entitled to an annual dividend. The Series A-1, B and C Preferred Stock all have liquidation preferences over the common stock. In addition the vote of a majority of the Series C Preferred Stock will be required for the (i) merger, sale of substantially all of our assets or our recapitalization, reorganization, liquidation, dissolution or winding up, (ii) redemption or acquisition of shares of our common stock other than in limited circumstances, (iii) declaration or payment of a dividend or distribution with respect to our capital stock, (iv) making any loan or advance, (v) amending our Certificate of Incorporation or Bylaws, (vi) authorizing or creating any new class or series of equity security, (vii) increasing the number of authorized shares for issuance under any existing stock or option plan, (viii) materially changing the nature of the business, (ix) incurring any indebtedness, (x) engaging in or making investments not authorized by the Board of Directors, (xi) acquiring or divesting a material amount of assets (xii) selling, assigning, licensing, pledging or encumbering our material technology or intellectual property, and (xiii) entering into any corporate strategic relationship involving payment, contribution or assignment by us or to us of any assets. The vote of two-thirds of the Series A-1 Preferred Stock is also required to take certain actions similar to those set forth above.

If we fail to meet the new eligibility requirements of the OTC Market Group, we will no longer be eligible to have our common stock quoted on the OTCQB.

If we fail to maintain a minimum bid price of \$.01 per share one day per each thirty consecutive days, our stock will no longer be eligible to be traded on the OTCQB and will be traded on the pink sheets. Effective May 1, 2014, the OTC Market Group implemented new eligibility standards for companies traded on the OTCQB that include enhanced disclosure requirements. Investors of companies that do not meet the eligibility requirements will not have the benefit of the additional disclosure

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The Company leased approximately 2,300 square feet of office space in Houston, Texas, the original term of the lease agreement terminated on January 31, 2014 with automatic renewals for six month periods unless 60 days written notice is given prior to renewal. The rental is \$2,200 per month. This lease was automatically renewed on October 1, 2015 to January 31, 2016. This lease has subsequently terminated as the Company has entered into a lease agreement for another property.

We lease a loft space in Houston, Texas from a related party in terms of a lease agreement entered into on September 1, 2015 and expiring on May 31, 2016. The lease provides for automatic renewal on a month-to-month basis unless 60 days written notice is given to terminate the lease. The monthly rental is \$3,260 per month.

We entered into lease agreement for approximately 3,733 square feet of office and warehouse space in Houston, the term of the lease is for 39 months commencing on March 1, 2016 and terminating on May 31, 2019. The lease provides for the first month to be rent-free, the fourteenth month to be rent-free and the twenty-seventh month to be rent-free. Monthly rentals, including estimated operating costs, for the first 12 months, excluding the free rental month amount to approximately \$3,410 per month, escalating at a rate of 1.7% per annum, after excluding the free rental months.

We do not own any real property. We believe that we have adequate space for our anticipated needs and that suitable additional space will be available at commercially reasonable prices as needed.

Item 3. Legal Proceedings.

There are no material legal proceedings that are pending or have been threatened against us of which management is aware.

Item 4. Mine Safety Disclosures

Not Applicable.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

(a) Price Range of Common Stock

Since April 2010 our common stock has traded on the OTCQB under the symbol PROP. From April 23, 2010 until the date of this report, our common stock traded on the OTC Bulletin Board. Prior to that date, there was no active market for our common stock. The following table sets forth the high and low sale prices for our common stock for the periods indicated.

	<u>High</u>	<u>Low</u>
Fiscal Year 2015		
First Quarter	\$ 0.25	0.11
Second Quarter	\$ 0.15	0.13
Third Quarter	\$ 0.21	0.11
Fourth Quarter	\$ 0.18	0.05
Fiscal Year 2014		
First Quarter	\$ 0.46	0.15
Second Quarter	\$ 0.30	0.21
Third Quarter	\$ 0.25	0.15
Fourth Quarter	\$ 0.22	0.14

The last reported sale price of our common stock on the OTC Bulletin board on March 24, 2016 was \$0.07 per share.

Holders

As of March 24, 2016, there were approximately 125 holders of record of our common stock.

Dividend Policy

We have not paid any cash dividends on our common stock to date, and we have no intention of paying cash dividends on our common stock in the foreseeable future. Whether we declare and pay dividends is determined by our board of directors at their discretion, subject to certain limitations imposed under Delaware corporate law. The timing, amount and form of dividends, if any, will depend on, among other things, our results of operations, financial condition, cash requirements and other factors deemed relevant by our board of directors. The Series C Preferred Stock accrue dividends at the rate per annum equal to 4% of the Stated Price (which initially is \$3.27777778) payable annually in arrears on December 31 of each year. The dividends are in preference and priority to any payment of any dividend on common stock, or any other class of preferred stock. The holders of the Series C Preferred Stock are entitled to receive cumulative dividends ratably with the declaration or payment of dividends on the common stock on an as converted basis. The holders of the Series B Preferred Stock are entitled to receive out of any assets legally available therefor cumulative dividends at the rate of eight percent (8%) per annum of the stated value (which initially is \$10.00), accrued daily and payable annually in arrears on December 31 of each year.

(b) Recent Sales of Unregistered Securities; Uses of Proceeds from Registered Securities

We did not sell any equity securities during the year ended December 31, 2015 in transactions that were not registered under the Securities Act other than as previously disclosed in our filings with the Securities and Exchange Commission.

All other sales of unregistered securities have been previously disclosed in our filings with the Securities and Exchange Commission.

(c) **Securities Authorized for Issuance under Equity Compensation Plans**

Propell Corporation 2008 Stock Option Plan

Our board of directors adopted the Propell Corporation 2008 Stock Option Plan (the “Plan”) in April 2008 to promote our long-term growth and profitability by (i) providing our key directors, officers and employees with incentives to improve stockholder value and contribute to our growth and financial success and (ii) enable us to attract, retain and reward the best available persons for positions of substantial responsibility. A total of 2,100,000 shares of our common stock have been reserved for issuance upon exercise of options granted pursuant to the Plan. The Plan allows us to grant options to our employees, officers and directors and those of our subsidiaries; provided that only our employees and those of our subsidiaries may receive incentive stock options under the Plan. We have granted a total of 380,950 options as of December 31, 2015 under the Plan. In addition, we granted 10,000,000 shares of restricted stock to John Huemoeller that were not issued pursuant to the Plan, of which 5,000,000 shares was vested as of December 31, 2015, the remaining 5,000,000 vested on January 1, 2016 when the employment agreement with John Huemoeller terminated. John Zotos was also granted 3,000,000 shares of restricted stock that were not issued pursuant to the plan, 2,000,000 of the shares were vested as of December 31, 2015 and the remaining 1,000,000 shares vest on March 31, 2016. The restricted stock grants were in lieu of the options that had previously been granted to Messrs. Huemoeller and Zotos, which options were canceled on December 5, 2014.

Set forth below is detail with respect to issuances under the Plan.

Plan category	Number of securities issued under equity compensation plan	Weighted-average exercise price of outstanding options	Number of securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders	380,950	\$ 0.90	1,719,050
Equity compensation plans not approved by security holders	-	-	-
Total	380,950	0.90	1,719,050

On January 1, 2016, we issued 3,000,000 five-year common stock options exercisable at a price of \$0.09 per share to our newly appointed CEO, Brian Boutte. These options vest as to 1,000,000 on the first anniversary of the grant date, 1,000,000 on the second anniversary of the grant date and a further 1,000,000 on the third anniversary of the grant date.

On March 1, 2016, we issued 1,000,000 five-year common stock options exercisable at a price of \$0.08 per share to our newly appointed COO, David Ramsey. These options vest as to 1,000,000 on the first anniversary of the grant date, 1,000,000 on the second anniversary of the grant date and a further 1,000,000 on the third anniversary of the grant date.

Issuer Purchases of Equity Securities

There were no issuer purchases of equity securities during the fiscal year ended December 31, 2015.

Item 6. Selected Financial Data

This item is omitted as not required for smaller reporting companies.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis is intended as a review of significant factors affecting our financial condition and results of operations for the periods indicated. The discussion should be read in conjunction with our consolidated financial statements and the notes presented herein and the risk factors and the financial statements and the other information set forth in our Annual Report on Form 10-K for the year ended December 31, 2015. In addition to historical information, the following Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that involve risks and uncertainties. Our actual results could differ significantly from those anticipated in these forward-looking statements as a result of certain factors discussed herein and any other periodic reports filed and to be filed with the SEC.

Cautionary Note Regarding Forward-Looking Statements

This report and other documents that we file with the SEC contain forward-looking statements that are based on current expectations, estimates, forecasts and projections about our future performance, our business, our beliefs and our management's assumptions. Statements that are not historical facts are forward-looking statements. Words such as "expect," "outlook," "forecast," "would," "could," "should," "project," "intend," "plan," "continue," "sustain", "on track", "believe," "seek," "estimate," "anticipate," "may," "assume," and variations of such words and similar expressions are often used to identify such forward-looking statements, which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are not guarantees of future performance and involve risks, assumptions and uncertainties, including, but not limited to, those described in this Annual Report on Form 10-K and other reports that we file or furnish with the SEC. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those indicated or anticipated by such forward-looking statements. Accordingly, you are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date they are made. Except to the extent required by law, we undertake no obligation to update publicly any forward-looking statements after the date they are made, whether as a result of new information, future events, changes in assumptions or otherwise.

Overview and Financial Condition

Our Company

We are engaged in the commercial application of a proprietary Plasma Pulse Technology to enhance the recovery of oil in the United States and Mexico. We began introducing the Plasma Pulse Technology in the United States through Novas on a limited basis in March 2013. Prior to this, all of our revenue had been derived from our e-commerce and other lines of business, which we discontinued, effective December 31, 2013, to enable us to focus all of our attention to our oil recovery business.

Since February 4, 2013, our primary focus has been to the further development of our licensed oil recovery technology. The Plasma Pulse Technology used by Novas, which has been sublicensed to NENA for use in the United States, is based on an exclusive, perpetual royalty-bearing license to engage in the commercial application of the proprietary Plasma Pulse Technology entered into on January 30, 2013, as amended in March 2014 and December 23, 2014 with the Licensor which granted Novas the right to use the Plasma Pulse Technology in the United States and Mexico to enhance oil production. The License Agreement provides Novas with the right to practice the licensed process and to utilize the Plasma Pulse Technology to provide services to third parties and for ourselves as well, and to sublicense the Plasma Pulse Technology in the United States. The process utilizes a down-hole tool that is lowered into vertical wellbores to the perforated oil producing zone. When initiated, the tool delivers metallic plasma-generated, directed, non-linear, wide-band elastic oscillations at resonance frequencies to enhance oil production using the tool developed by the Licensor and enhanced by Novas. The Plasma Pulse Technology is suitable for oil wells as deep as 12,000 feet. By optimizing production efficiency combined with the resulting increased oil production we expect to extend the economic life of mature oil fields and to recover previously unrecoverable oil efficiently.

During 2014, we offered our services to independent oil wells based on a joint venture model in which we received a percentage of the revenue that our customers derived from additional production resulting from the use of the Plasma Pulse Technology, we have not concluded any further agreements under this joint venture model. We also offered our services on a fee based model and charged a service fee for use of the Plasma Pulse Technology. In 2014 we treated sixteen wells for service fees. Pursuant to the terms of the Novas Sublicense Agreement, we no longer have the right to utilize the Plasma Pulse Technology to treat vertical wells in the United States and instead NENA now has the exclusive right to use the Plasma Pulse Technology for treatment of vertical wells in the United States. We do have the right to utilize the Plasma Pulse Technology to treat wells that we acquire in the United States. It is our intention to acquire oil fields to generate revenues and to use the Plasma Pulse Technology on our acquired wells to increase their production.

To date, we derived \$349,194 in revenue from our oil enhancement business, no revenue has been recognized from the joint venture arrangement. We have financed our operations primarily from sales of our securities, both debt and equity, and to a lesser extent revenue from operations and we expect to continue to obtain required capital in a similar manner. We have incurred an accumulated deficit of \$14,393,474 through December 31, 2015 and there can be no assurance that we will be able to achieve profitability.

On October 22, 2015, Novas entered into an operating agreement with Technovita through the newly formed Delaware limited liability company, NENA whereby Novas agreed to contribute \$1,200,000 (\$600,000 to be delivered on the effective date (October 22, 2015) of the Joint Venture Agreement, \$300,000 on November 1, 2015 and \$300,000 on the two month anniversary of the Effective Date) to the capital of NENA for 60% of the membership interests of NENA and Technovita agreed to contribute an aggregate of \$800,000 to the capital of NENA for 40% of the membership interests of NENA.

Subject to certain exceptions and pursuant to the terms of the Novas Sublicense Agreement, NENA is the exclusive provider of the Plasma Pulse Technology to third parties in the United States for the treatment of vertical wells. Subject to certain exceptions and pursuant to the terms of Technovita Sublicense Agreement, NENA is the exclusive provider of the Vertical Technology to third parties in Canada. Notwithstanding the foregoing, both Novas and Technovita retained the right to deploy the Vertical Technology on wells owned by Novas or Technovita in the United States or Canada, respectively. If either Novas or Technovita terminates the Sublicense Agreement with NENA and Licensor, the non-terminating party will receive 100% of the terminating member's membership interest in NENA.

Management Discussion and Analysis of financial condition

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statement as of December 31, 2015 and December 31, 2014, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent liabilities at the financial statement date and reported amounts of revenue and expenses during the reporting period. On an on-going basis we review our estimates and assumptions. Our estimates are based on our historical experience and other assumptions that we believe to be reasonable under the circumstances. Actual results are likely to differ from those estimates under different assumptions or conditions.

Results of Operations for the year ended December 31, 2015 and December 31, 2014

Net revenues

Net revenues were \$91,000 and \$190,035 for the year ended December 31, 2015 and 2014 respectively, a decrease of \$99,035 or 52.1%. The revenues consist of \$91,000 earned on the treatment of several wells in the USA by Novas prior to the entry into of the Novas Sublicense Agreement. The revenue from the prior year represented amortization of a once off licensing fee and initial set up revenues for a well treatment project undertaken in Mexico of \$40,000, which has subsequently been terminated and renegotiated with another vendor and revenue from the treatment of several wells in the USA amounting to \$150,027. Revenue has been sporadic as the business is being developed and comparison to prior periods during this development stage has limited value in aiding a business analysis.

There has been no recognizable revenue produced by the joint venture for the current year, primarily due to the current market conditions faced by the oil and gas industry, with market prices of hydrocarbon products currently at multi-year low points.

Cost of goods sold

Cost of goods sold was \$272,650 and \$232,912 for the year ended December 31, 2015 and 2014, respectively, an increase of \$39,738 or 17.0%. Cost of goods sold during the current year, primarily represents engineering services provided by third party contractors to Novas which were contracted on a monthly basis and is not correlated to the revenues earned and non-recoverable well treatments costs incurred by the NENA joint venture. Cost of goods sold in the prior year represents non-recoverable set up fees including engineering costs and travel costs incurred on the Mexico project, offset by cost recovery fees charged to our customer.

Gross (loss)

Gross (loss) was \$(181,650) and \$(42,877) for the year ended December 31, 2015 and 2014, respectively, an increase of \$138,773 or 323.6%. This primarily represents engineering services provided by third party contractors and non-recoverable treatment costs incurred by the NENA joint venture, which have been expensed.

Total expenses

Total expenses were \$4,085,060 and \$4,148,365 for the year ended December 31, 2015 and 2014, respectively, a decrease of \$63,305 or 1.5%. Total expenses consisted primarily of the following:

- Stock based compensation expense was \$1,606,572 and \$2,765,470 for the year ended December 31, 2015 and 2014, respectively, a decrease of \$1,158,898 or 41.9%. The current year charge includes a charge of \$1,536,572 for restricted stock issued to our former Chief Executive Officer, John Huemoeller, including an accelerated charge of \$571,429 upon termination of his employment, which resulted in the remaining restricted shares becoming fully vested on January 1, 2016. In the prior year, the charge included \$540,000 for restricted stock issued to one of our directors, John Zotos, in terms of a consulting agreement entered into with him and a charge of \$302,347 for shares issued to certain consultants and advisors for work performed, and a further \$1,439,502 for the amortization of stock options, primarily issued to John Huemoeller and John Zotos which were cancelled on December 5, 2014 and replaced with the restricted stock awards;
- General and administrative expenditure was \$742,559 and \$653,962 for the year ended December 31, 2015 and 2014, respectively, an increase of \$88,597 or 13.5%. This increase was offset by a decrease in travel expenditure of \$80,704 over the prior year due to a reduction in travel to Mexico; in the prior year we were setting up operation in Mexico. Payroll expenses increased by \$135,066 primarily due to the salaries and wage expense incurred in NENA, the joint venture arrangement we entered into in October 2015, insurance expense increased by 18,972 due to increased coverage and the additional insurance expense incurred on the NENA joint venture and rent expense increased by \$21,751 due to the NENA joint venture entered into in October 2015 and an increase in the rental expense incurred on the apartment lease for our former Chief Executive Officer, in the previous year only a portion of the apartment was sub-let.
- Professional fees were \$1,162,754 and \$435,549 for the year ended December 31, 2015 and 2014, respectively, an increase of \$727,205 or 167.0%. The increase is primarily due to (i) recruitment costs of \$220,242, incurred to recruit our newly appointed Chief Executive Officer and the vice president of the NENA joint venture; (ii) contractors fees of \$264,265 incurred in the NENA joint venture on contract personnel used to operate the venture; (iii) an increase in legal expenditure of \$167,960 primarily due to the legal costs incurred in consummating the Series C Preferred Stock financing by Ervington Investments; and (iv) legal expenses of \$42,495 spent on filing patents over the Plasma Pulse Technology.
- Consulting fees were \$390,914 and \$204,091 for the year ended December 31, 2015 and 2014, respectively, an increase of \$186,823 or 91.5%, primarily due to consulting fees incurred by the NENA joint venture, consultants were employed by the joint venture as part of its management infrastructure.

Other (expense) income

Other expense in the current year included severance costs incurred in terms of the termination of the employment agreement with our previous CEO. In the prior year other income of \$150,000 consisted of a gain realized on the forgiveness of the license fee accrual by the licensor.

Amortization of debt discount and finance costs

Amortization of debt discount and finance costs was \$52,662 and \$527,830 for the year ended December 31, 2015 and 2014, respectively. All debt was repaid during the first quarter of the current year. In the prior year, the amortization of debt and finance costs, included a penalty interest of \$122,399 on the early settlement of convertible debt before conversion took place, the amortization of debt discount on long-term notes of \$295,979 which includes the accelerated amortization of debt discount on long term notes which were converted into common stock during the prior year, the amortization of \$56,913 on short-term convertible notes which was also accelerated due to the conversion and repayment of some of the outstanding short-term notes into equity and an interest accrual of \$52,173.

Change in fair value of derivatives

The change in fair value of derivative liabilities was \$18,455 and \$449,411 for the year ended December 31, 2015 and 2014, respectively, an increase of \$467,866 or 104.1%. The current year movement was due to the elimination of the remaining derivative liability on the repayment and conversion of all outstanding convertible notes. In the prior year the derivative liability movement reflected a mark-to-market of equities issued to short-term note holders who converted their debt to equity at deeply discounted prices based on variable priced conversion rates which was offset by a mark-to-market credits on the remaining short-term convertible notes and a new derivative liabilities raised on short term debt issued in the prior year.

Net loss

We incurred a net loss of \$4,331,980 and \$5,018,483 for the year ended December 31, 2015 and 2014, a decrease of \$686,503 or 13.7%, respectively and which consists of the various revenue and expense items discussed above.

A deemed preferred stock dividend of \$2,456,781 and \$1,604,335 has been disclosed in the statement of operations for the year ended December 31, 2015 and 2014, respectively. This amount represents the in-the-money value of the conversion feature of the Series C and the Series B Preferred Stock as of the date of issue. These shares of Series C and Series B Preferred Stock are convertible into common stock at an exercise price of \$0.12291665 and \$0.10 per share, respectively.

A deemed dividend of \$460,734 has been disclosed in the statement of operations for the year ended December 31, 2015. This amount represents the dividends that are due, but remain undeclared, to Series B and Series C preferred stock holders for the year ended December 31, 2015.

Liquidity and Capital Resources.

To date, our primary sources of cash have been funds raised from the sale of our securities and the issuance of convertible and non-convertible debt. We raised gross proceeds of \$14,750,000 from the sale of our Series C Preferred Stock in February 2015 and June 2015. In addition, we also raised temporary debt in the aggregate principal amount of \$125,000 from the sale of our debt securities, this debt together with all other outstanding interest bearing debt in the aggregate principal amount of \$296,000, including interest and early settlement penalty interest thereon was repaid on February 20, 2015 out of the proceeds raised from the sale of the Series C Preferred Stock.

We have spent \$438,157 on plant and equipment for the year ended December 31, 2015, primarily on improvements to the down-hole tool and the development of seven new down-hole tools suitable for the smaller cased American wells.

We have incurred an accumulated deficit of \$14,393,474 through December 31, 2015 and incurred negative cash flow from operations of \$2,956,543 for the year ended December 31, 2015. We have spent, and need to continue to spend, substantial amounts in connection with implementing our business strategy, including our planned product development effort.

Our primary commitments include the minimum commitments under the license agreements and our commitment to invest a further \$300,000 in NENA, over and above the \$900,000 invested in NENA as of December 31, 2015, based on their cash flow needs.

Our primary financial commitments on the date hereof are payments owed under the License Agreement. The minimum commitments due under the license agreement for the next five years are summarized as follows:

	<u>Amount</u>
2016	\$ 1,000,000
2017	1,000,000
2018	1,000,000
2019	1,000,000
2020	1,000,000
	<u>\$ 5,000,000</u>

Off Balance Sheet Arrangements

There are no off balance sheet arrangements.

Critical Accounting Policies

Management believes that the critical accounting policies and estimates discussed below involve the most complex management judgments due to the sensitivity of the methods and assumptions necessary in determining the related asset, liability, revenue and expense amounts. Specific risks associated with these critical accounting policies are discussed throughout this Management Discussion & Analysis, where such policies have a material effect on reported and expected financial results. For a detailed discussion of the application of these and other accounting policies, refer to the individual Notes to the Financial Statements for the year ended December 31, 2015

Revenue Recognition

The Company records revenue when all of the following have occurred: (1) persuasive evidence of an arrangement exists, (2) the service is completed without further obligation, (3) the sales price to the customer is fixed or determinable, and (4) collectability is reasonably assured.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions, which are evaluated on an ongoing basis, that affect the amounts reported in the consolidated financial statements and accompanying notes. Management bases its estimates on historical experience and on various other assumptions that it believes are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the amounts of revenues and expenses that are not readily apparent from other sources. Actual results could differ from those estimates and judgments. In particular, significant estimates and judgments include those related to: the estimated useful lives for plant and equipment, the fair value of warrants and stock options granted for services or compensation, estimates of the probability and potential magnitude of contingent liabilities, derivative liabilities, the valuation allowance for deferred tax assets due to continuing operating losses, those related to revenue recognition and the allowance for doubtful accounts.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the consolidated financial statements, which management considered in formulating its estimate could change in the near term due to one or more future confirming events. Accordingly, the actual results could differ significantly from our estimates.

Fair Value of Financial Instruments

We adopted the guidance of Accounting Standards Codification (“ASC”) 820 for fair value measurements which clarifies the definition of fair value, prescribes methods for measuring fair value, and establishes a fair value hierarchy to classify the inputs used in measuring fair value as follows:

Level 1-Inputs are unadjusted quoted prices in active markets for identical assets or liabilities available at the measurement date.

Level 2-Inputs are unadjusted quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs derived from or corroborated by observable market data.

Level 3-Inputs are unobservable inputs which reflect the reporting entity’s own assumptions on what assumptions the market participants would use in pricing the asset or liability based on the best available information.

The carrying amounts reported in the balance sheets for cash, accounts receivable, prepaid expenses, deposits, accounts payable, accrued liabilities, notes payable, and convertible notes payable approximate fair value due to the relatively short period to maturity for these instruments. The recorded derivative liabilities during the years ended December 31, 2015 were noted as subject to level III fair value measurements. The Company did not identify any other assets or liabilities that are required to be presented on the balance sheets at fair value in accordance with the accounting guidance.

ASC 825-10 “*Financial Instruments*” allows entities to voluntarily choose to measure certain financial assets and liabilities at fair value (fair value option). The fair value option may be elected on an instrument-by-instrument basis and is irrevocable, unless a new election date occurs. If the fair value option is elected for an instrument, unrealized gains and losses for that instrument should be reported in earnings at each subsequent reporting date. The Company did not elect to apply the fair value option to any outstanding instruments.

Contingencies

Certain conditions may exist as of the date the financial statements are issued, which may result in a loss to us but which will only be resolved when one or more future events occur or fail to occur. Our management assesses such contingent liabilities, and such assessment inherently involves an exercise of judgment.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in our financial statements. If the assessment indicates that a potential material loss contingency is not probable but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, together with an estimate of the range of possible loss if determinable and material would be disclosed. Loss contingencies considered to be remote by management are generally not disclosed unless they involve guarantees, in which case the guarantee would be disclosed.

Recently Issued Accounting Standards

For a discussion of the adoption and potential impacts of recently issued accounting standards, refer to the “Recent Accounting Pronouncements” section of Note 2, “Accounting policies and estimates,” in the Notes to Financial Statements.

Report of the Independent Registered Public Accounting Firm

To the Board of Directors and shareholders
Propell Technologies Group Inc.

We have audited the accompanying consolidated balance sheets of Propell Technologies Group, Inc. (the “Company”) as of December 31, 2015, and the related consolidated statements of operations, stockholders’ deficit and cash flows for the year ended December 31, 2015. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, an audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company as of December 31, 2015, and the results of its operations and its cash flows for the year ended December 31, 2015, in conformity with generally accepted accounting principles in the United States.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 ORGANIZATION AND DESCRIPTION OF BUSINESS

a) Organization

Propell Technologies Group, Inc. (formerly known as Propell Corporation) (the “Company”), is a Delaware corporation originally formed on January 29, 2008 as CA Photo Acquisition Corp. On April 10, 2008 Crystal Magic, Inc. (“CMI”), a Florida Corporation, merged with an acquisition subsidiary of Propell’s, and the Company issued an aggregate of 180,000 shares to the former shareholders of CMI. On May 6, 2008, the Company acquired both Mountain Capital, LLC (doing business as Arrow Media Solutions) (“AMS”) and Auleron 2005, LLC (doing business as Auleron Technologies) (“AUL”) and made each a wholly owned subsidiary and issued a total of 41,897 shares of the Company’s common stock to the members of Mountain Capital, LLC and a total of 2,722 shares of the Company’s common stock to the members of AUL. In 2010 AUL and AMS were dissolved and the operations of CMI were discontinued. On February 4, 2013, the Company entered into a Share Exchange Agreement with Novas Energy (USA), Inc. (“Novas”) whereby the Company exchanged 100,000,000 shares of its common stock for 100,000,000 shares of common stock in Novas. After the consummation of the share exchange, Novas became a wholly owned subsidiary of the Company. As a result of the share exchange the shareholders of Novas obtained the majority of the outstanding shares of the Company. As such, the exchange is accounted for as a reverse merger or recapitalization of the Company and Novas was considered the acquirer for accounting purposes.

b) Description of the business

The Company, through its wholly owned subsidiary, Novas, and majority owned subsidiary, NENA, is an innovative technology and services company whose aim is to improve oil production by introducing modern and innovative technologies. Novas has a unique Plasma-Pulse Treatment (“PPT”) technology, patented in the USA, which is a new Enhanced Oil Recovery methodology and process that has been developed to be environmentally friendly, mobile, time efficient and cost effective.

On October 22, 2015, Novas Energy USA, Inc. (“Novas”), a wholly owned subsidiary of Propell Technologies Group, Inc. (the “Company”), entered into an operating agreement with Technovita Technologies USA, Inc. (the “Joint Venture Agreement”) through a newly formed Delaware limited liability company, Novas Energy North America, LLC (“NENA”), whereby Novas agreed to contribute \$1,200,000 (\$600,000 delivered on the effective date (October 22, 2015) of the Joint Venture Agreement, \$300,000 on November 1, 2015 and \$300,000 on the two month anniversary of the Effective Date) to the capital of NENA for 60% of the membership interests of NENA and Technovita agreed to contribute an aggregate of \$800,000 to the capital of NENA for 40% of the membership interests of NENA. In terms of a side agreement entered into on November 18, 2015, the revenue and expenses incurred by Technovita prior to entering into the operating agreement, have been included in the joint venture and consolidated into the Company’s results effective September 1, 2015.

Subject to certain exceptions and pursuant to the terms of a sublicense agreement (the “Novas Sublicense Agreement”) that was entered into between Novas, NENA and Novas Energy Group Inc. (the “Licensor”), the licensor of Plasma Pulse Technology currently used by Novas and Technovita, NENA is the exclusive licensor of PPT for the treatment of vertical wells in the United States. Subject to certain exceptions and pursuant to the terms of Sublicense Agreements (the “Technovita Sublicense Agreement”) that was entered into between Technovita, NENA and Licensor, NENA is the exclusive licensor of PPT for the treatment of vertical wells in Canada. Notwithstanding the foregoing, both Novas and Technovita will retain the right to deploy the PPT Technology on vertical wells owned by Novas or Technovita in the United States or Canada, respectively. If either Novas or Technovita terminates the Sublicense Agreement with NENA and Licensor, the non-terminating party will receive 100% of the terminating member’s membership interest in NENA.

The business and affairs of NENA are to be managed by or under the direction of the Board of Directors, consisting of five (5) members, three (3) of whom shall be appointed by Novas and two (2) of whom shall be appointed by Technovita. Board approval is required to: (i) incur any indebtedness, pledge or grant liens on any assets or guarantee, assume, endorse or otherwise become responsible for the obligations of any other person, except to the extent approved or authorized in NENA’s budget; (ii) make any loan, advance or capital contribution in any person, except to the extent approved or authorized in the budget; (iii) transfer any equipment necessary in the deployment of the Vertical Technology to any third party; (iv) enter into or effect any transaction or series of related transactions involving the sale of NENA or the sale, lease, license, exchange or other disposition (including by merger, consolidation, sale of assets or similar business transaction) by NENA of any assets in excess of \$300,000; (v) appoint or remove NENA’s auditors or make any changes in the accounting methods or policies of NENA (other than as required by GAAP); (vi) enter into or effect any transaction or series of related transactions involving the purchase, lease, license, exchange or other acquisition (including by merger, consolidation, acquisition of stock or acquisition of assets) by NENA of any assets and/or equity interests of any person and/ or assets in excess of \$300,000; or (v) enter into or effect any commercial transaction or series of related commercial transactions involving anticipated liabilities or revenues of NENA in excess of \$500,000 or that materially vary from NENA’s existing strategy or business plan.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

2 ACCOUNTING POLICIES AND ESTIMATES

a) Basis of Presentation

The accompanying financial statements have been prepared in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”).

All amounts referred to in the notes to the financial statements are in United States Dollars (\$) unless stated otherwise.

b) Principles of Consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiary in which it has a majority voting interest. All significant inter-company accounts and transactions have been eliminated in the consolidated financial statements. The entities included in these consolidated financial statements are as follows:

Propell Technologies Group, Inc. – Parent Company
Nova Energy USA Inc. (wholly owned)
Novas Energy North America, LLC (60% owned)

c) Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions, which are evaluated on an ongoing basis, that affect the amounts reported in the consolidated financial statements and accompanying notes. Management bases its estimates on historical experience and on various other assumptions that it believes are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the amounts of revenues and expenses that are not readily apparent from other sources. Actual results could differ from those estimates and judgments. In particular, significant estimates and judgments include those related to: the estimated useful lives for plant and equipment, the fair value of warrants and stock options granted for services or compensation, estimates of the probability and potential magnitude of contingent liabilities, derivative liabilities, the valuation allowance for deferred tax assets due to continuing operating losses, those related to revenue recognition and the allowance for doubtful accounts.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the consolidated financial statements, which management considered in formulating its estimate could change in the near term due to one or more future confirming events. Accordingly, the actual results could differ significantly from our estimates.

d) Contingencies

Certain conditions may exist as of the date the financial statements are issued, which may result in a loss to the Company but which will only be resolved when one or more future events occur or fail to occur. The Company’s management assesses such contingent liabilities, and such assessment inherently involves an exercise of judgment.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company’s financial statements. If the assessment indicates that a potential material loss contingency is not probable but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, together with an estimate of the range of possible loss if determinable and material would be disclosed. Loss contingencies considered to be remote by management are generally not disclosed unless they involve guarantees, in which case the guarantee would be disclosed.

e) Fair Value of Financial Instruments

The Company adopted the guidance of Accounting Standards Codification (“ASC”) 820 for fair value measurements which clarifies the definition of fair value, prescribes methods for measuring fair value, and establishes a fair value hierarchy to classify the inputs used in measuring fair value as follows:

Level 1-Inputs are unadjusted quoted prices in active markets for identical assets or liabilities available at the measurement date.

Level 2-Inputs are unadjusted quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs derived from or corroborated by observable market data.

Level 3-Inputs are unobservable inputs which reflect the reporting entity’s own assumptions on what assumptions the market participants would use in pricing the asset or liability based on the best available information.

The carrying amounts reported in the balance sheets for cash, accounts receivable, prepaid expenses, deposits, accounts payable, accrued liabilities, notes payable, and convertible notes payable approximate fair value due to the relatively short period to maturity for these instruments. The recorded derivative liabilities during the year ended December 31, 2014 was noted as subject to level III fair value measurements. The Company did not identify any other assets or liabilities that are required to be presented on the balance sheets at fair value in accordance with the accounting guidance.

ASC 825-10 “*Financial Instruments*” allows entities to voluntarily choose to measure certain financial assets and liabilities at fair value (fair value option). The fair value option may be elected on an instrument-by-instrument basis and is irrevocable, unless a new election date occurs. If the fair value option is elected for an instrument, unrealized gains and losses for that instrument should be reported in earnings at each subsequent reporting date. The Company did not elect to apply the fair value option to any outstanding

instruments.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

2 ACCOUNTING POLICIES AND ESTIMATES (continued)

f) Risks and Uncertainties

The Company's operations will be subject to significant risk and uncertainties including financial, operational, regulatory and other risks associated, including the potential risk of business failure. The recent global economic crisis has caused a general tightening in the credit markets, lower levels of liquidity, increases in the rates of default and bankruptcy, and extreme volatility in credit, equity and fixed income markets. These conditions not only limit the Company's access to capital, but also make it difficult for its customers, vendors and the Company to accurately forecast and plan future business activities.

The Company's operations are carried out in the USA, Mexico and Canada. Accordingly, the Company's business, financial condition and results of operations may be influenced by the political, economic and legal environment in the USA, Mexico and Canada and by the general state of those economies. The Company's results may be adversely affected by changes in governmental policies with respect to laws and regulations, anti-inflationary measures, and rates and methods of taxation, among other things.

g) Recent Accounting Pronouncements

In August 2015, FASB issued Accounting Standards Update ("ASU") No.2015-14, "*Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date*" defers the effective date ASU No. 2014-09 for all entities by one year. Public business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in Update 2014-09 to annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Earlier application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. All other entities should apply the guidance in Update 2014-09 to annual reporting periods beginning after December 15, 2018, and interim reporting periods within annual reporting periods beginning after December 15, 2019. All other entities may apply the guidance in ASU No. 2014-09 earlier as of an annual reporting period beginning after December 15, 2016, including interim reporting periods within that reporting period. All other entities also may apply the guidance in Update 2014-09 earlier as of an annual reporting period beginning after December 15, 2016, and interim reporting periods within annual reporting periods beginning one year after the annual reporting period in which the entity first applies the guidance in ASU No. 2014-09. We are currently reviewing the provisions of this ASU to determine if there will be any impact on our results of operations, cash flows or financial condition.

In April 2015, FASB issued Accounting Standards Update ("ASU") No. 2015-03, Interest – *Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs*, to simplify presentation of debt issuance costs by requiring that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The ASU does not affect the recognition and measurement guidance for debt issuance costs. For public companies, the ASU is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early application is permitted. This updated guidance is not expected to have a material impact on our results of operations, cash flows or financial condition.

Any new accounting standards, not disclosed above, that have been issued or proposed by FASB that do not require adoption until a future date are not expected to have a material impact on the financial statements upon adoption.

h) Reporting by Segment

No segmental information is required as the Company currently only has one segment of business, the Plasma Pulse Technology for the petroleum industry.

Revenues to date are insignificant.

i) Cash and Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less at the time of purchase to be cash equivalents. At December 31, 2015 and December 31, 2014, respectively, the Company had no cash equivalents.

The Company minimizes credit risk associated with cash by periodically evaluating the credit quality of its primary financial institution. The balance at times may exceed federally insured limits. At December 31, 2015, the Company had cash balances of \$11,700,143, which exceeded the federally insured limits by \$10,877,045. At December 31, 2014, the balance did not exceed the federally insured limit.

j) Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable are reported at realizable value, net of allowances for doubtful accounts, which is estimated and recorded in the period the related revenue is recorded. The Company has a standardized approach to estimate and review the collectability of its receivables based on a number of factors, including the period they have been outstanding. Historical collection and payer reimbursement experience is an integral part of the estimation process related to allowances for doubtful accounts. In addition, the Company regularly assesses the state of its billing operations in order to identify issues, which may impact the collectability of these receivables or reserve estimates. Revisions to the allowance for doubtful accounts estimates are recorded as an adjustment to bad debt expense. Receivables deemed uncollectible are charged against the allowance for doubtful accounts at the time such receivables are written-off. Recoveries of receivables previously written-off are recorded as credits to the allowance for doubtful accounts. There were no recoveries during the period ended December 31, 2015.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

2 ACCOUNTING POLICIES AND ESTIMATES (continued)

k) Inventory

The Company had no inventory as of December 31, 2015 or December 31, 2014.

l) Plant and Equipment

Plant and equipment is stated at cost, less accumulated depreciation. Plant and equipment with costs greater than \$1,000 are capitalized and depreciated. Depreciation is computed using the straight-line method over the estimated useful lives of the assets. The estimated useful lives of the assets are as follows:

Description	Estimated Useful Life
Office equipment and furniture	2 to 5 years
Leasehold improvements and fixtures	Lesser of estimated useful life or life of lease
Plant and equipment	2 to 3 years
Plasma pulse tools	5 years

The cost of repairs and maintenance is expensed as incurred. When assets are retired or disposed of, the cost and accumulated depreciation are removed from the accounts, and any resulting gains or losses are included in income in the year of disposition.

m) Intangibles

All of our intangible assets are subject to amortization. We evaluate the recoverability of intangible assets periodically by taking into account events or circumstances that may warrant revised estimates of useful lives that indicates the asset may be impaired. Where intangibles are deemed to be impaired we recognize an impairment loss measured as the difference between the estimated fair value of the intangible and its book value.

i) License Agreements

License agreements acquired by the Company are reported at acquisition value less accumulated amortization and impairments.

ii) Amortization

Amortization is reported in the income statement on a straight-line basis over the estimated useful life of the intangible assets, unless the useful life is indefinite. Amortizable intangible assets are amortized from the date that they are available for use. The estimated useful life of the license agreement is five years which is the expected period for which we expect to derive a benefit from the underlying license agreements.

n) Long-Term Assets

Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If such assets are considered impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets.

o) Revenue Recognition

The Company records revenue when all of the following have occurred: (1) persuasive evidence of an arrangement exists, (2) the service is completed without further obligation, (3) the sales price to the customer is fixed or determinable, and (4) collectability is reasonably assured.

p) Share-Based Payment Arrangements

Generally, all forms of share-based payments, including stock option grants, restricted stock grants and stock appreciation rights are measured at their fair value on the awards' grant date, based on the estimated number of awards that are ultimately expected to vest. Share-based compensation awards issued to non-employees for services rendered are recorded at either the fair value of the services rendered or the fair value of the share-based payment, whichever is more readily determinable. The expense resulting from share-based payments is recorded in operating expenses in the consolidated statement of operations.

q) Income Taxes

Income taxes are computed using the asset and liability method. Under the asset and liability method, deferred income tax assets and liabilities are determined based on the differences between the financial reporting and tax bases of assets and liabilities and are measured using the currently enacted tax rates and laws. A full valuation allowance is provided for the amount of deferred tax assets that, based on available evidence, are not expected to be realized. It is the Company's policy to classify interest and penalties on income taxes as interest expense or penalties expense. As of December 31, 2015, there have been no interest or penalties incurred on income taxes.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

2 ACCOUNTING POLICIES AND ESTIMATES (continued)

r) Net Loss per Share

Basic net loss per share is computed on the basis of the weighted average number of common shares outstanding during the period.

Diluted net loss per share is computed on the basis of the weighted average number of common shares and common share equivalents outstanding. Dilutive securities having an anti-dilutive effect on diluted net loss per share are excluded from the calculation (See Note 16, below).

Dilution is computed by applying the treasury stock method for options and warrants. Under this method, options and warrants are assumed to be exercised at the beginning of the period (or at the time of issuance, if later), and as if funds obtained thereby were used to purchase common shares at the average market price during the period.

Dilution is computed by applying the if-converted method for convertible preferred shares. Under this method, convertible preferred stock is assumed to be converted at the beginning of the period (or at the time of issuance, if later), and preferred dividends (if any) will be added back to determine income applicable to common stock. The shares issuable upon conversion will be added to weighted average number of common shares outstanding. Conversion will be assumed only if it reduces earnings per share (or increases loss per share).

Any common shares issued as a result of the issue of stock options and warrants would come from newly issued common shares from our remaining authorized shares.

s) Comprehensive income

Comprehensive income is defined as the change in equity of a company during a period from transactions and other events and circumstances excluding transactions resulting from investments from owners and distributions to owners. For the Company, comprehensive income for the periods presented includes net loss.

t) Related parties

Parties are considered to be related to the Company if the parties that, directly or indirectly, through one or more intermediaries, control, are controlled by, or are under common control with the Company, or own in aggregate, on a fully diluted basis 5% or more of the Company's stock. Related parties also include principal owners of the Company, its management, members of the immediate families of principal owners of the Company and its management and other parties with which the Company may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests. The Company shall disclose all related party transactions. All transactions shall be recorded at fair value of the goods or services exchanged. Property purchased from a related party is recorded at the cost to the related party and any payment to or on behalf of the related party in excess of the cost is reflected as a distribution to related party.

u) Reclassification

Certain reclassifications have been made to the prior year financial statement numbers to conform to the current presentation of the financial statements.

3 PREPAID EXPENSES

Prepaid expenses consisted of the following as of December 31, 2015 and December 31, 2014:

	<u>December 31, 2015</u>	<u>December 31, 2014</u>
Prepaid insurance	\$ 28,180	\$ 8,144
Expenses in excess of billings	155,606	-

Less: accumulated depreciation	<u>(124,245)</u>	<u>(57,052)</u>
Property and equipment, net	<u>\$ 690,538</u>	<u>\$ 319,574</u>

Depreciation expense was \$67,193 and \$30,170 for the years ended December 31, 2015 and 2014, respectively.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

5 INTANGIBLES

Licenses

Novas licenses the “Plasma-Pulse Technology” (“the Technology”) from Novas Energy Group Limited, the Licensor, pursuant to the terms of an exclusive perpetual royalty bearing license it entered into in January 2013, which was amended on March, 2014. The amended license agreement provides Novas with the exclusive right to develop, use, market and commercialize the Technology for itself and/or third parties, sublicense and provide services to third parties related to the Technology in the United States and Mexico including all of its states, districts, territories, possessions and protectorates. The amended license agreement also provides Novas with the right to design and have manufactured the apparatus and to make modifications and improvements to the Technology provided that the Licensor is provided a non-exclusive license to any such improvements and modifications and any patent rights of Novas related to the Technology. The license is limited to the United States and Mexico. It also provides that Novas will pay the Licensor royalties equal to seven and a half percent (7.5%) of Net Service Sales (as defined in the license agreement) and Non-Royalty Sublicensing Consideration (as defined in the license agreement) and provides for a minimum royalty payment of \$500,000 per year from United States operations and \$500,000 per year from Mexican operations; however, no minimum royalty payment is due prior to the three year anniversary of the license agreement for revenue derived from the United States operations and no minimum royalty is due prior to December 31, 2015 for revenue derived from Mexico. Revenue derived from operations in one territory can be used to satisfy obligations for minimum royalty payments in the other territory. All royalty payments made by Novas as well as sublicensing revenue paid by Novas to the Licensor are credited towards the minimum royalty payment. If the minimum royalty is not timely paid, the Licensor has the right to terminate the license with respect to a particular territory and if the minimum royalty payment for both territories is not paid, to terminate the license agreement. Novas was obligated to pay an initial license fee of \$150,000 on or prior to June 30, 2014, this fee was subsequently waived by the Licensor with effect from July 30, 2014, the additional \$200,000 which was due to the Licensor on June 30, 2015 was waived, subsequent to year-end. The Licensor is responsible for the cost of filing prosecuting and maintaining the patents and Novas is responsible for costs of obtaining marketing approvals. The Licensor has the right to terminate the license agreement upon Novas’ breach or default. If the Licensor dissolves, becomes insolvent or engages in or is the subject of any other bankruptcy proceeding then the technology and patent rights in the United States shall become our property.

Subject to certain exceptions and pursuant to the terms of the Novas Sublicense Agreement that was entered into on October 22, 2015, between Novas, NENA and the Licensor of the Plasma Pulse Technology currently used by Novas and Technovita, NENA will be the exclusive provider of the Vertical Technology (as defined in the Joint Venture Agreement entered into on October 22, 2015) to third parties in the United States. Subject to certain exceptions and pursuant to the terms of Sublicense Agreements (the “Technovita Sublicense Agreement”) that was entered into between Technovita, NENA and Licensor, NENA is the exclusive provider of the Vertical Technology to third parties in Canada. Notwithstanding the foregoing, both Novas and Technovita will retain the right to deploy the Vertical Technology on wells owned by Novas or Technovita in the United States or Canada, respectively. If either Novas or Technovita terminates the Sublicense Agreement with NENA and Licensor, the non-terminating party will receive 100% of the terminating member’s membership interest in NENA.

Intangibles consisted of the following as of December 31, 2015 and 2014, respectively:

	<u>December 31, 2015</u>	<u>December 31, 2014</u>
License agreements	\$ 350,000	\$ 350,000
Website development	8,000	8,000

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

6 ACCOUNTS PAYABLE - RELATED PARTY

Accounts payable to related parties includes the following:

	<u>December 31, 2015</u>	<u>December 31, 2014</u>
Technovita Technologies Corp.	\$ 1,000	\$ -
Energy Conservation Management	-	-
Other	-	-
	<u>\$ 1,000</u>	<u>\$ -</u>

Technovita Technologies Corp., is the 40% shareholder in the NENA joint venture which the Company entered into. This payable represents expenses paid on behalf of the joint venture by Technovita.

Energy Conservation Corp is a third party contractor associated with the joint venture.

7 ACCRUED LIABILITIES AND OTHER PAYABLES

Accrued liabilities consisted of the following as of December 31, 2015 and 2014, respectively:

	<u>December 31, 2015</u>	<u>December 31, 2014</u>
Payroll liabilities	\$ 38,063	\$ 35,823
Severance accrual	31,109	-
Accrued Royalties	14,653	4,603
License fees payable	200,000	200,000
Other	7,122	-
	<u>\$ 290,947</u>	<u>\$ 240,426</u>

Subsequent to year-end, the license fee payable to Novas BVI for the rights to use the plasma pulse technology in Mexico was waived.

The severance accrual relates to accrued severance costs due to John Huemoeller, whose employment with the Company was terminated on January 1, 2016.

8 NOTES PAYABLE

Notes payable consisted of the following as of December 31, 2015 and 2014, respectively:

<u>Description</u>	<u>Interest Rate</u>	<u>Maturity</u>	<u>December 31, 2015</u>	<u>December 31, 2014</u>

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

9 SHORT-TERM CONVERTIBLE NOTES PAYABLE (continued)

LG Capital Funding, LLC

On October 31, 2014, the Company issued a note in the principal amount of \$107,000 to LG Capital Funding, LLC (“LG”) upon receipt of \$100,000 from LG. The terms of the note provided for an original issue discount of 7% amounting to \$7,000 which was added to the face value of the note. The note carried an interest charge of 8% per annum. The note was convertible into common stock at any time, at the holder’s option, in whole or in part, at a conversion price equal to 62% of the lowest bid prices in the 10 trading days prior to conversion. The note had a maturity date of October 30, 2015. The holder was not entitled to exercise any conversion right that would result in the holder owning more than 9.9% of the Company’s common stock. The Convertible Note was redeemable by the Company within 180 days of the issuance date, after a 3-day notice period, in which notice period the holder could elect to exercise the conversion feature of the note, at a premium over the principal amount due of 10%, plus any interest earned thereon, subject to the holders approval. The conversion price of the note had anti-dilutive provisions which would increase the redemption penalty of the note to 150% of the principal outstanding plus accrued and unpaid interest thereon, or allow conversion immediately prior to the dilutive event taking place.

On February 20, 2015, the unsecured promissory note issued to LG in the principal amount of \$107,000 was repaid for \$125,677, inclusive of interest, original issue discounts and early settlement penalty accrued thereon. The Company has no further obligations under this note.

KBM Worldwide, Inc.

On December 10, 2014, the Company issued an unsecured convertible note to KBM Worldwide, Inc. (“KBM”) with a face value of \$84,000, in exchange for \$80,000 in cash, including an original issue discount of \$4,000. The note was convertible into common stock of the Company and bore interest at the rate of 8% per annum, which interest was payable in cash or common stock, at the election of the holder, and had a maturity date of September 12, 2015. The conversion price, as well as the formula for determining the number of shares needed to repay the note and any interest thereon was 58% of the average of the lowest closing price for any three trading days during the last ten-day trading period prior to conversion or payment of interest. The holder could only convert the note following the expiration of 180 days from the date of issuance, December 10, 2014. The holder was not entitled to any conversion right that would result in the holder owning more than 4.99% of the Company’s common stock. This note could be prepaid by the Company from the date of issuance to 180 days after issuance date at a prepayment penalty ranging from 110% to 135% of the balance outstanding, including interest thereon, dependent upon the age of the note.

On February 20, 2015, the unsecured promissory note issued to KBM on December 10, 2014 with a face value of \$84,000 was repaid for \$102,107, inclusive of interest, fees and an early settlement penalty accrued thereon. The Company has no further obligations under this note.

10 DERIVATIVE FINANCIAL LIABILITY

Certain of the short-term convertible notes disclosed in note 9 above, had variable priced conversion rights with no fixed floor price and would re-price dependent on the share price performance over varying periods of time. This gave rise to a derivative financial liability, which was valued at \$224,442 at inception of the convertible notes using a Black-Scholes valuation model. The value of this derivative financial liability is re-assessed at each financial reporting period, with any movement thereon recorded in the statement of operations in the period in which it is incurred or the convertible debt is converted into equity.

Upon repayment or conversion of the outstanding notes, the derivative financial liability is no longer required.

The movement in derivative liabilities is as follows:

	<u>December 31, 2015</u>	<u>December 31, 2014</u>
Opening balance	\$ 18,455	\$ 237,799
Derivative financial liability arising on short-term notes with variable conversion prices	-	23,060
Conversion of derivative liability for stock issued at a discount	-	(668,756)
Fair value adjustments to derivative financial liability	(18,455)	426,352
	<u>\$ -</u>	<u>\$ 18,455</u>

The following assumptions were used in the Black-Scholes valuation model:

	<u>Year ended December 31, 2014</u>
Stock price over the period	\$0.17 – \$ 0.23
Risk free interest rate	0.13% to 0.25%
Expected life of short-term notes payable	9 to 14 months
Expected volatility	95.24% - 119.45%
Expected dividend rate	0

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

11 LONG-TERM CONVERTIBLE NOTES PAYABLE

Long Term Convertible Notes payable consisted of the following as of December 31, 2015 and 2014, respectively:

Description	Interest Rate	Maturity	December 31, 2015	December 31, 2014
Notes payable	6%	November 19, 2017	\$ -	\$ 11,250
Accrued interest			-	1,470
Unamortized debt discount			-	(6,500)
Total long-Term Convertible Notes Payable			\$ -	\$ 6,220

The convertible notes payable consisted of notes issued to a number of private principals (“the Notes”). The Notes bore interest at the rate of 6% per annum and were due on November 19, 2017. The Notes were convertible into common stock at a fixed conversion price of \$0.02 per share.

On February 6, 2015, the remaining convertible note with an aggregate principal amount of \$11,250, inclusive of interest of \$1,539, totaling \$12,789 was converted into 639,432 common shares at a conversion price of \$0.02 per share.

12 STOCKHOLDERS’ EQUITY (DEFICIT)

a) Common Stock

The Company has authorized 500,000,000 common shares with a par value of \$0.001 each, and issued and has outstanding 268,558,931 shares of common stock as of December 31, 2015.

The following common shares were issued by the Company during the year ended December 31, 2015:

- i) an aggregate of 639,432 shares of Common Stock to convertible note holders upon conversion of an aggregate of \$12,789 of long-term convertible notes, inclusive of interest thereon, at a share price of \$0.02 per share;
- ii) an aggregate of 3,750,000 shares of Common Stock were issued upon the conversion of 375,000 shares of Series A-1 Preferred stock in terms of a conversion notice received from a Series A-1 stockholder at a conversion factor of 10 Common shares for one Series A-1 Preferred share.
- iii) an aggregate of 3,500,000 shares of Common Stock were issued upon the conversion of 35,000 shares of Series B Preferred stock in terms of a conversion notice received from the Series B stockholder at a conversion factor of 100 Common shares for one Series B Preferred share.
- iv) an aggregate of 500,000 shares of Common Stock were issued for consulting services which were valued at a fair market price of \$70,000.

Included in the Common stock outstanding are 13,000,000 restricted shares of common stock issued as follows:

- (a) An aggregate of 10,000,000 shares of restricted common stock were issued to our former Chief Executive Officer in terms of an employment agreement entered into with him. These shares are restricted. As of December 31, 2015, 5,000,000 shares have already vested. The employment agreement with Mr. Huemoeller was terminated on January 1, 2016 resulting in the immediate vesting of the remaining 5,000,000 restricted shares. These restricted shares were valued at the closing price of the common stock on February 4, 2015, the date of approval of the amended and restated employment agreement with our former Chief Executive officer. Refer to the related party disclosure in note 17 below.
- (b) An aggregate of 3,000,000 shares of restricted common stock were issued to our Director, John Zotos, in terms of a consulting agreement entered into with him. These shares are restricted and vested as to 1,000,000 shares on March 31, 2015, 1,000,000 on September 30, 2015 with the remaining 1,000,000 vesting on March 31, 2016. These restricted shares were valued at the closing price of the common stock on December 5, 2014, the date of approval of the consulting agreement with John Zotos. Refer to the related party disclosure in note 17 below.

Our former Chief Executive Officer was entitled to an additional 1,500,000 shares of restricted common stock which was due to vest in two equal tranches of 750,000 common shares each on January 1, 2016 and 2017. Due to the termination of Mr. Huemoeller’s employment agreement, these shares will not be issued and are no longer available to Mr. Huemoeller.

The restricted stock granted and exercisable at December 31, 2015 is as follows:

Grant date Price	Restricted Stock Granted		Restricted Stock Vested	
	Number Granted	Weighted Average Fair Value per Share	Number Vested	Weighted Average Fair Value per Share

\$	0.15	10,000,000		10,000,000	
	0.18	3,000,000		2,000,000	
		<u>13,000,000</u>	\$	<u>0.16</u>	\$
				<u>12,000,000</u>	<u>0.16</u>

The Company has recorded an expense of \$1,536,571 and \$620,429 for the year ended December 31, 2015 and 2014, relating to the restricted stock awards. There will be no further expense, related to these restricted shares.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

12 STOCKHOLDERS' EQUITY (DEFICIT) (continued)

b) Preferred Stock

The Company has 10,000,000 authorized preferred shares with a par value of \$0.001 each with 5,000,000 preferred shares designated as Series A-1 Convertible Preferred Stock ("Series A-1 Shares"), 500,000 preferred shares designated as Series B Preferred Stock and on February 19, 2015, the Company amended its articles of incorporation, designating the remaining 4,500,000 preferred shares as Series C Preferred Stock.

i) Series A-1 Convertible Preferred Stock

The Company has designated 5,000,000 preferred shares as Series A-1 Convertible Preferred Stock ("Series A-1 Shares"), with 3,137,500 Series A-1 Shares issued and outstanding which are convertible into 31,375,000 shares of common stock.

During the year ended December 31, 2015, holders of 375,000 Series A-1 shares converted their holdings into 3,750,000 shares of the Company's Common Stock at a conversion ratio of 10 common shares to 1 Series A-1 Share.

The rights, privileges and preferences of the Series A-1 Shares are summarized as follows;

Conversion

Each Series A-1 Share has the following conversion rights:

- (a) Each share of the Series A-1 Shares is convertible into ten shares of Common Stock.
- (b) There shall be no adjustment made to the conversion ratio of the Series A-1 Shares for any stock split, stock dividend, combination, reclassification or other similar event.

Company Redemption

The Series A-1 Shares are non-redeemable by the Company.

Voting Rights

Each holder of Series A-1 Shares is entitled to vote on all matters submitted to a vote of the stockholders of the Company and shall be entitled to that number of votes equal to the number of shares of Common Stock into which such holder's shares of Series A-1 Shares could then be converted.

Dividends

Until such time that any dividend is paid to the holders of Common Stock, the holders of Series A-1 Shares shall be entitled to a dividend in an amount per share equal to that which such holders would have been entitled to receive had they converted all of the shares of Series A-1 Shares into Common Stock immediately prior to the payment of such dividend

Liquidation Preference

Each share of Series A-1 Shares is entitled to a liquidation preference of \$0.08 per share

No Circumvention

The approval of the holders of at least 2/3 (66.6%) of the outstanding shares of the Series A-1 Shares, voting together separately as a class, is required for:

- (a) the merger, sale of all, or substantially all of the assets or intellectual property, recapitalization, or reorganization of the Company;
- (b) the authorization or issuance of any equity security having any right, preference or priority superior to or on a parity with the Series A-1 Shares;
- (c) the redemption, repurchase or acquisition of any of the Company's equity securities or the payment of any dividends or distributions thereon;
- (d) any amendment or repeal of the Company's Articles of Incorporation or Bylaws that would have an adverse effect on the rights, preferences or privileges of the Series A-1 Shares; and
- (e) the making of any loan or advance to any person except in the ordinary course of business.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

12 STOCKHOLDERS' EQUITY (DEFICIT) (continued)

b) Preferred Stock (continued)

ii) Series B Convertible Preferred Stock

The Company has designated 500,000 preferred shares as Series B Convertible Preferred Stock ("Series B Shares"), with 40,000 Series B Shares issued and outstanding which are convertible into 4,000,000 shares of common stock.

The Company issued 75,000 Series B shares in March 2014 for gross proceeds of \$750,000.

During the year ended December 31, 2015, the holder of 35,000 Series B shares converted his holding into 3,500,000 shares of the Company's Common Stock at a conversion ratio of 100 common shares per Series B Share.

The rights, privileges and preferences of the Series B Shares are summarized as follows:

Conversion

The holders of the Series B Preferred Shares shall have conversion rights as follows:

- (a) Each share of the Series B Shares is convertible at any time prior to the issuance of a redemption notice by the Company into such number of shares of Common Stock by dividing the Stated value (\$10) of the Series B Shares by \$0.10 and is subject to adjustment for dividends or distributions made in common stock, the issue of securities convertible into common stock, stock splits, reverse stock splits, or reclassifications of common stock. No adjustments will be made to the conversion rights or conversion price for any reorganization other than to be entitled to receive the same benefits as if the shares were converted immediately prior to such reorganization. No conversion will take place if the holder of the Series B Shares will beneficially own in excess of 4.99% of the shares of Common Stock outstanding immediately after conversion. As of the date hereof, each Series B Share converts into 100 shares of common stock.
- (b) The conversion right of the holders of Series B Shares are exercised by the surrender of the certificates representing shares to be converted to the Company, accompanied by written notice electing conversion.
- (c) No fractional shares of Common Stock or script will be issued upon conversion of Series B Shares. The Company will pay a cash adjustment in respect to such fractional interest based upon the fair value of a share of Common Stock, as determined in good faith by the Company's Board of Directors.
- (d) All shares of Common Stock issued upon conversion of Series B Shares will upon issuance be validly issued, fully paid and non-assessable. All certificates representing Series B Shares surrendered for conversion shall be appropriately canceled on the books of the Company and the shares so converted represented by such certificates shall be restored to the status of authorized but unissued shares of preferred stock of the Company.

Company Redemption

The Company has the right, at any time after the date the Series B Shares have been issued, to redeem all or a portion of any Holder's Series B Shares at a price per Series B Share equal to the issue price per Series B Share multiplied by 120%

Voting Rights

Each holder of Series B Shares is entitled to vote on all matters submitted to a vote of the stockholders of the Company and is entitled to votes equal to the number of shares of Common Stock into which Series B Shares could be converted, and the holders of shares of Series B Shares and Common Stock shall vote together as a single class on all matters submitted to the stockholders of the Company.

Dividends

- (a) The holders of the Series B Shares are entitled to receive cumulative dividends at the rate of eight percent per annum of the issue price per share, accrued daily and payable annually in arrears on December 31st of each year ("Dividend Date"). Such dividends accrue on any given share from the day of original issuance of such share. Such dividends are cumulative, whether or not declared by the Board of Directors, but are non-compounding.
- (b) Any dividend payable on a dividend payment date may be paid, at the option of the Company, either (i) in cash or (ii) in shares of common stock at an issue price of \$0.10 per common share.
- (c) Nothing contained herein is deemed to establish or require any payment or other charges in excess of the maximum permitted by applicable law.
- (d) In the event that pursuant to applicable law or contract the Company is prohibited or restricted from paying in cash the full dividends to which the holders of the Series B Shares are entitled, the cash amount available pursuant to applicable law or contract will be distributed among the holders of the Series B Shares ratably in proportion to the full amounts to which they would otherwise be entitled and any remaining amount due to holders of the Series B Shares will be payable in cash.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

12 STOCKHOLDERS' EQUITY (DEFICIT) (continued)

b) Preferred Stock (continued)

ii) Series B Convertible Preferred Stock (continued)

Liquidation Preference

In the event of any liquidation, dissolution or winding up of the Company, either voluntary or involuntary, the holders of the Series B Shares are entitled to receive, prior and in preference to any distribution of any assets of the Company to the holders of any other preferred stock of the Company and subordinate to any distribution to the Series A-1 Shares, and prior and in preference to any distribution of any assets of the Company to the holders of the Common Stock, the amount of 120% of the issue price per share. In addition, the Series B holder has agreed to vote to subordinate the series B Preferred stock liquidation preferences to the Series C Preferred stock preferences.

No Circumvention

The Company may not amend its certificate of incorporation, or participate in any reorganization, sale or transfer of assets, consolidation, merger, dissolution, issue or sale of securities or any other voluntary action for the purpose of avoiding or seeking to avoid the observance or performance of any of the terms to be observed or performed by the Company.

We have undeclared dividends on the Series B Preferred stock amounting to \$91,529 as of December 31, 2015. If the dividends are paid in stock, the beneficial conversion feature of these undeclared dividends will be recorded upon the declaration of these dividends. The computation of loss per common share for the year ended December 31, 2015 takes into account these undeclared dividends.

iii) Series C Convertible Preferred Stock

The Company has designated 4,500,000 preferred shares as Series C Convertible Preferred Stock ("Series C Shares"), with 4,500,000 Series C Shares issued and outstanding which are convertible into 120,000,000 shares of common stock (a conversion price of \$0.12291665 per share).

On February 19, 2015, the Company entered into a Series C Preferred Stock Purchase Agreement (the "Purchase Agreement") with Ervington Investment Limited, an entity organized under the laws of the Republic of Cyprus who is wholly owned by Greenleas International Holdings Ltd., which in turn is wholly owned by Harmony Trust Settlement, and closed the first tranche of a private placement offering under the Purchase Agreement, raising \$5,000,000 in gross proceeds from the sale of 1,525,424 shares of our Series C Preferred Stock ("Series C Preferred Stock") at a purchase price of \$3.277777778 per share. The Company agreed to use the net proceeds of the offering for research and development, commercialization of new products, sales and marketing, repayment of debt, accounts payable and administrative expenses.

In terms of the Purchase Agreement, the Company sold to Ervington an additional 2,974,576 shares of Series C Preferred Stock for additional gross proceeds to us of \$9,750,000 on June 30, 2015. The proceeds of the second closing are to be used by us for the acquisition, enhancement and maintenance of an oil field for deployment of our Plasma Pulse Technology.

The Company valued the beneficial conversion rights of the first tranche of Series C Convertible Preferred Stock issued on February 19, 2015 to be the right to the additional effective common shares as converted utilizing the opening market price of the common stock of \$0.15 per share. Such computation valued the beneficial conversion rights to be \$1,101,696 for purposes of presenting the net loss to common stock holders. The Company valued the beneficial conversion rights of the second tranche of Series C Convertible Preferred Stock issued on June 30, 2015, to be the right to the additional effective common shares as converted utilizing the open market price of the common stock of \$0.014 per share. Such computation valued the beneficial conversion rights to be \$1,355,085 for purposes of presenting the net loss to common stockholders.

In connection with the Purchase Agreement, the Company also entered into an Investors' Rights Agreement with Ervington (the "Investors' Rights Agreement"). The Investors' Rights' Agreement provides that the Holders (as defined in the Investors' Rights Agreement) of a majority of the outstanding Registerable Securities (defined therein as the shares of common stock and Series A-1 Convertible Preferred Stock ("Series A-1 Preferred Stock") issued pursuant to the Secondary Stock Purchase Agreement (as defined below), the shares of Series C Preferred Stock issued pursuant to the Purchase Agreement and any common stock issued as dividends thereon or in exchange for such) are entitled to demand registration rights under certain circumstances and piggyback registration rights. In addition, the Investors' Rights Agreement provides that Ervington (or its assignee) has the right to designate a person to be appointed as the Company's Chief Executive Officer, a board observer right if a representative of Ervington or its affiliate is not a member of our board of directors and certain consultation rights if a representative of Ervington or its affiliate is not a member of our board of directors so long as it holds a majority of the Registerable Securities and at least 36,000,000 shares of our common stock on an "as converted" basis. Ervington and its affiliates also have a right of first refusal to acquire their pro rata share of any New Securities (as defined in the Investors' Rights Agreement) which we propose to issue and sell.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

12 STOCKHOLDERS' EQUITY (DEFICIT) (continued)

b) Preferred Stock (continued)

iii) Series C Convertible Preferred Stock (continued)

In connection with the Purchase Agreement, Ervington also entered into a stock purchase agreement (the "Secondary Purchase Agreement") with certain of our stockholders (the "Selling Stockholders"), pursuant to which the Selling Stockholders sold to Ervington an aggregate of 7,624,990 shares of our common stock and 2,437,500 shares of our Series A-1 Preferred Stock (representing 24,375,000 shares of our common stock on an as converted basis) at a purchase price of \$.001 per share on the closing of the first tranche on February 19, 2015. In terms of the Secondary Purchase Agreement the Selling Stockholders also sold to Ervington on July 6, 2015, after the second closing an additional 56,677,477 shares of our common stock and 700,000 shares of our Series A-1 Preferred Stock (representing 7,000,000 shares of our common stock on an as converted basis) on the closing of the second tranche on July 6, 2015.

The Company also entered into a Stockholders Agreement with the Selling Stockholders and Ervington (the "Stockholders Agreement") providing that until a Change of Control Transaction (as defined in the Stockholders Agreement), each person a party thereto shall vote all of such person's shares of our common stock in favor of the designees appointed by Ervington and two additional directors appointed by two of the Selling Stockholders and Ervington agreed to vote its shares in favor of the two designees appointed by the two Selling Stockholders provided that the certain Selling Stockholders continue to own a certain threshold number of shares of our common stock or preferred stock convertible into our common stock. In addition, the Selling Stockholders granted Ervington certain drag along rights in the event of a Change of Control Transaction (as defined in the Stockholders Agreement) and Ervington and its affiliates were granted certain rights of first refusal.

In accordance with the terms of the Series C Preferred Stock Certificate of Designations (the "Series C Certificate of Designations"), Ervington appointed Ivan Persiyonov to serve as a director, holding two votes and Maria Damianou was appointed to serve as a director during July 2015, holding one vote. In addition, James Fuller, Mark Kalow and Dan Steffens resigned from the Board of Directors effective upon the closing.

In addition, as a condition to the consummation of the Purchase Agreement, the Company filed a Certificate of Designations to our Certificate of Incorporation with the Secretary of State of the State of Delaware setting forth the rights, preferences and privileges of the Series C Preferred Stock, our Bylaws were amended and restated and we entered into an Indemnification Agreement with Ivan Persiyonov.

The terms attached to the Series C Preferred Stock ("Series C Share") are summarized below:

Conversion

Subject to adjustment for stock splits, stock dividends, reorganizations and recapitalizations and similar transactions, each Series C Share is currently convertible at the option of the holder into 26.67 shares of common stock.

Company Redemption

The Series C Shares are not subject to redemption by the Company.

Voting Rights

Generally, holders of Series C Shares will, on an as-converted basis, vote together with the common stock as a single class.

Upon the issuance of at least 1,500,000 shares of Series C Preferred Stock the holders of the Series C Preferred Stock, as a class, are entitled to elect either two directors holding one vote or one director holding two votes. Upon the issuance of an aggregate of 4,500,000 shares of Series C Preferred Stock, the holders of the Series C Preferred Stock are entitled to elect either three directors holding one vote each, one director holding three votes or two directors with one director holding two votes and another director holding one vote.

Dividends

The Series C Shares accrue dividends at the rate per annum equal to 4% of the stated price (which initially is \$3.27777778) payable annually in arrears on December 31 of each year in preference and priority to any payment of any dividend on our common stock, or any other class of preferred stock.

Liquidation Preference

In the event of our liquidation, dissolution or winding up and other liquidation events (as defined in the Series C Certificate of Designations), holders of Series C Shares are entitled to receive from proceeds remaining after distribution to our creditors and prior to the distribution to holders of common stock or any other class of preferred stock the (x) stated value (as adjusted for stock splits, stock dividends, reorganizations, recapitalizations and the like) held by such holder and (y) all accrued but unpaid dividends on such shares.

Anti-Dilution

The Series C Shares are entitled to certain weighted average anti-dilution protection as specified in the Series C Certificate of Designations.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

12 STOCKHOLDERS' EQUITY DEFICIT (continued)

b) Preferred Stock (continued)

iii) Series C Convertible Preferred Stock (continued)

No Circumvention

The approval by holders of a majority of the Series C Shares, voting separately as a class, will be required for the following:

- (i) merger, sale of substantially all of our assets or our recapitalization, reorganization, liquidation, dissolution or winding up;
- (ii) redemption or acquisition of shares of our common stock other than in limited circumstances;
- (iii) declaration or payment of a dividend or distribution with respect to our capital stock;
- (iv) making any loan or advance;
- (v) Amending the Company's Certificate of Incorporation or Bylaws;
- (vi) authorizing or creating any new class or series of equity security;
- (vii) increasing the number of authorized shares for issuance under any existing stock or option plan;
- (viii) materially changing the nature of the business
- (ix) incurring any indebtedness;
- (x) engaging in or making investments not authorized by our board of directors;
- (xi) acquiring or divesting a material amount of assets;
- (xii) selling, assigning, licensing, pledging or encumbering our material technology or intellectual property;
- (xiii) entering into any corporate strategic relationship involving payment, contribution or assignment by the Company or to the Company of any assets.

The Company has undeclared dividends on the Series C Preferred stock amounting to \$369,205 as of December 31, 2015. The computation of loss per common share for the year ended December 31, 2015 takes into account these undeclared dividends.

c) Stock Options

i) Plan options

The Company's Board of Directors approved the Company's 2008 Stock Option Plan (the "Stock Plan") for the issuance of up to 5,000,000 shares of common stock to be granted through incentive stock options, nonqualified stock options, stock appreciation rights, dividend equivalent rights, restricted stock, restricted stock units and other stock-based awards to officers, other employees, directors and consultants of the Company and its subsidiaries. After the reverse stock split in August 2012, a total of 100,000 shares were available for grant. Subsequent to the reverse split the Board of Directors approved an increase in the number of awards available for grant to 2,100,000 shares. The exercise price of stock options under the Stock Plan is determined by the Board of Directors, and may be equal to or greater than the fair market value of the Company's common stock on the date the option is granted. Options become exercisable over various periods from the date of grant, and generally expire ten years after the grant date.

At December 31, 2015 and 2014, there were 380,950 Plan options issued and outstanding, respectively, under the Stock Option Plan.

The vesting provisions for these stock options are determined by the board of directors at the time of grant, there are no unvested options outstanding as of December 31, 2015.

No options were issued during the year ended December 31, 2015.

In the event of the employees' termination, the Company will cease to recognize compensation expense.

PROPELL TECHNOLOGIES GROUP, INC.

c) Stock Options (continued)

ii) Non-Plan Stock Options

Subsequent to year end, On January 1, 2016, the Company granted, to its newly appointed Chief Executive Officer, 3,000,000 common stock, non-plan options (that are not covered by the Company's Stock Option Plan), with an exercise price of \$0.09 per share. These options vest as to 1,000,000 on the first anniversary of the grant date; 1,000,000 on the second anniversary of the grant date and a further 1,000,000 on the third anniversary of the grant date.

Subsequent to year end, on March 1, 2016, the Company granted, to its newly appointed Chief Operating Officer, 1,000,000 common stock, non-plan options (that are not covered by the Company's Stock Option Plan), with an exercise price of \$0.08 per share. These options vest as to 333,334 on the first anniversary of the grant date; 333,333 on the second anniversary of the grant date and a further 333,333 on the third anniversary of the grant date.

In the event of the employees' termination, the Company will cease to recognize compensation expense.

A summary of all of our option activity during the period January 1, 2014 to December 31, 2015 is as follows:

	Shares Underlying Options	Exercise price per share	Weighted average exercise price
Outstanding January 1, 2014	11,452,960	0.25 to \$ 25.00	\$ 0.30

	<u>380,950</u>	4.45	<u>\$ 0.90</u>	<u>380,950</u>	<u>\$ 0.90</u>	4.45	

No options were granted for the year ended December 31, 2015.

The Company has applied fair value accounting for all share based payment awards since inception. The fair value of each option or warrant granted is estimated on the date of grant using the Black-Scholes option-pricing model. There is no deferred compensation recorded upon initial grant date, instead, for employees, the fair value of the share-based payment is recognized ratably over the stated vesting period. For consultants, the fair value is recognized as expense immediately.

The Company has recorded an expense of \$1,536,571 and \$1,769,170 for the year ended December 31, 2015 and 2014 relating to options issued.

(d) Warrants

A summary of all of our warrant activity during the period January 1, 2014 to December 31, 2015 is as follows:

	Shares Underlying Warrants	Exercise price per share	Weighted average exercise price

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

13 EQUITY BASED COMPENSATION

Equity based compensation is made up of the following:

	<u>Year ended</u> <u>December 31, 2015</u>	<u>Year ended</u> <u>December 31, 2014</u>
Stock option compensation charge	\$ -	\$ 1,769,170
Restricted stock award compensation charge	1,536,572	620,429
Stock issued for services rendered	70,000	348,971
Stock awards in lieu of directors' fees	-	27,000
	<u>\$ 1,606,572</u>	<u>\$ 2,765,570</u>

14 OTHER (EXPENSE) INCOME

Other (expense) income includes a severance cost provision of \$31,109 in terms of the termination of employment of our previous CEO. The gain realized in the prior year was as a result of debt forgiveness by our Technology Licensor of \$150,000.

15 INCOME TAXES

A reconciliation of the U.S. Federal statutory income tax rate to the effective income tax rate is as follows:

	<u>Year ended</u> <u>December 31, 2015</u>	<u>Year ended</u> <u>December 31, 2014</u>
	%	%
Tax expense at the federal statutory rate	34	34
State tax expense, net of federal tax effect	5	5
Permanent timing differences	(18)	(28)
Deferred income tax asset valuation allowance	(21)	(11)
	<u>-</u>	<u>-</u>

Significant components of the Company's deferred income tax assets are as follows:

	<u>December 31, 2015</u>	<u>December 31, 2014</u>
Deferred income tax assets		
Net operating losses	\$ 3,196,000	\$ 2,180,000
Valuation allowance	(3,196,000)	(2,180,000)
Net deferred income tax assets	<u>\$ -</u>	<u>\$ -</u>

The valuation allowance for deferred income tax assets as of December 31, 2015 and December 31, 2014 was \$3,196,000 and \$2,180,000, respectively. The net change in the deferred income tax assets valuation allowance was an increase of \$1,018,000 and \$570,000 for Fiscal 2015 and 2014, respectively.

As of December 31, 2015, the prior three years remain open for examination by the federal or state regulatory agencies for purposes of an audit for tax purposes.

Our net operating loss carry-forwards of \$8,137,000 begin to expire in 2030 and continue to expire through 2035. In assessing the realizability of deferred income tax assets, management considers whether or not it is more likely than not that some portion or all deferred income tax assets will be realized. The ultimate realization of deferred income tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the projected future taxable income and tax planning strategies in making this assessment.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

16 NET LOSS PER SHARE

Basic loss per share is based on the weighted-average number of common shares outstanding during each period. Diluted loss per share is based on basic shares as determined above plus common stock equivalents, including convertible preferred shares and convertible notes as well as the incremental shares that would be issued upon the assumed exercise of in-the-money stock options using the treasury stock method. The computation of diluted net loss per share does not assume the issuance of common shares that have an anti-dilutive effect on net loss per share. For the year ended December 31, 2015 and 2014, all stock options, unvested restricted stock awards, warrants, convertible preferred stock and convertible notes were excluded from the computation of diluted net loss per share. Dilutive shares which could exist pursuant to the exercise of outstanding stock instruments and which were not included in the calculation because their affect would have been anti-dilutive are as follows:

	Year ended December 31, 2015 (Shares)	Year ended December 31, 2014 (Shares)
Options to purchase shares of common stock	380,950	380,950
Restricted stock awards – unvested	1,000,000	13,000,000
Warrants to purchase shares of common stock	6,339,498	6,339,498
Series A-1 convertible preferred shares	31,375,000	35,125,000
Series B convertible preferred shares	4,000,000	7,500,000
Series C convertible preferred shares	120,000,000,	-
Convertible long term notes	-	636,010
	163,095,448	69,981,458

17 RELATED PARTY TRANSACTIONS

On February 4, 2015, the Company entered into an Amended and Restated Employment Agreement (the “Employment Agreement”) with John Huemoeller II, that superseded the Company’s prior Employment Agreement with Mr. Huemoeller that was previously entered into on December 5, 2014 (the “Prior Agreement”).

Under the Employment Agreement, which had a stated term of three (3) years, for his continued service as the Chief Executive Officer and President of the Company, Mr. Huemoeller would continue to receive the same annual base salary of \$180,000 provided for under the Prior Agreement and would be entitled to bonuses at the discretion of the Company based on performance. The new Employment Agreement restated a previous grant to Mr. Huemoeller of 10,000,000 shares of the Company’s restricted stock, which would vest on the following schedule: 1,250,000 shares vested on January 1, 2015 and thereafter 1,250,000 shares would vest on each quarter anniversary, commencing April 1, 2015 for seven (7) quarters. The restricted stock grant was in lieu of the options that had previously been granted to Mr. Huemoeller, which options were canceled on December 5, 2014. The Employment Agreement also provided that Mr. Huemoeller would receive a restricted stock grant of 750,000 shares of stock on an annual basis commencing January 1, 2016, which will vest upon issuance. In the event of a Change of Control (as defined in the Employment Agreement), termination without Cause (as defined in the Employment Agreement), termination due to disability (as defined in the Employment Agreement), death or termination by Mr. Huemoeller for Good Reason (as defined in the Employment Agreement), Mr. Huemoeller would receive: (i) a severance payment equal to two (2) months base salary together with payment of medical insurance or COBRA payments for two (2) months after termination; and (ii) all restricted stock grants that had been issued to Mr. Huemoeller will immediately vest. If Mr. Huemoeller terminated his employment at any time prior to January 1, 2016 Without Good Reason (as defined in the Employment Agreement) or is terminated for Cause (as defined in the Employment Agreement) then 5,000,000 of any restricted stock grants would immediately vest. The Employment Agreement also includes customary confidentiality obligations and inventions assignments by Mr. Huemoeller.

The Employment Agreement with Mr. Huemoeller, was terminated on January 1, 2016 by mutual consent, the remaining 5,000,000 unvested restricted stock vested immediately upon termination and Mr. Huemoeller was paid his two months severance in terms of the agreement and his medical insurance was maintained for a period of two months, in terms of the agreement. The restricted stock grant of 750,000 shares on January 1, 2016 and 2017 was forfeited.

On December 5, 2014, the Company entered into a consulting agreement with John Zotos (“Zotos”), our director for a two-year period. In terms of the agreement, Zotos will provide consulting services to the Company for a consideration of \$5,000 per month and the grant of 3,000,000 restricted shares of which 2,000,000 were vested as of December 31, 2015 and the remaining 1,000,000 will vest on March 31, 2016. Early termination of the agreement by either party will result in immediate vesting of the remaining unvested shares. The Company will also reimburse the consultant for all out of pocket expenses incurred whilst performing his duties. The consulting agreement also includes customary confidentiality obligations and invention assignments by Mr. Zotos.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

17 RELATED PARTY TRANSACTIONS (continued)

On January 1, 2016, the “Company entered into a three-year Employment Agreement with C. Brian Boutte (the “Boutte Employment Agreement”) to serve as the Company’s Chief Executive Officer. Mr. Boutte will also serve as the Company’s interim Chief Financial Officer. Under the Boutte Employment Agreement, for his service as the Chief Executive Officer of the Company, Mr. Boutte will receive an annual base salary of \$265,000, a sign on bonus of \$60,000 and an annual performance bonus of up to 55% of his base salary, such bonus payable in cash or equity upon attainment of certain performance indicators established by the Company’s Board of Directors and Mr. Boutte. In connection with the entry into the Boutte Employment Agreement, Mr. Boutte was granted an option award exercisable for 3,000,000 shares of the Company’s common stock, which will vest as to 1,000,000 shares on each of the one, two and three-year anniversary of the commencement of his employment with the Company. In the event of the sale of all of the Company’s assets or any field acquired by the Company during the employment period which sale occurs after the six-month anniversary of his employment and before the two-year anniversary of his termination of employment, the Employment Agreement provides that Mr. Boutte will receive a bonus equal to 3% of net cash proceeds received by the Company from such sale after payment of certain costs and expenses. In the event that Mr. Boutte’s employment is terminated Without Cause (as defined in the Boutte Employment Agreement), by Mr. Boutte for Good Reason (as defined below), Disability (as defined in the Boutte Employment Agreement) or upon his death, if any occur after the one-year anniversary of his employment, Mr. Boutte is entitled to receive a severance payment equal to one year’s base salary, any bonus earned which remains unpaid at such time and reimbursement of expenses. In the event of a Change of Control (as defined in the Boutte Employment Agreement), Mr. Boutte will receive a severance payment equal to one year’s base salary, any bonus earned which remains unpaid at such time and reimbursement of expenses. In addition, if a Change of Control occurs after the one-year anniversary of the commencement of his employment with the Company, all of Mr. Boutte’s options shall immediately vest. The Boutte Employment Agreement also includes customary confidentiality obligations and inventions assignments by Mr. Boutte as well as a non-compete and non-solicitation provision. If his employment is terminated for Cause (as defined below) or by him Without Good Reason (as defined in the Boutte Employment Agreement), Mr. Boutte is entitled to receive his annual base salary through the date of termination and any bonus earned but unpaid. For purpose of the Boutte Employment Agreement, “Good Reason” is defined as (i) any material and substantial breach of the Boutte Employment Agreement by the Company; (ii) a Change in Control (as defined in the Boutte Employment Agreement) occurs and Mr. Boutte’s employment is terminated at any time within the six (6) month period on or immediately following the Change in Control; (iii) a reduction in Mr. Boutte’s Annual Base Salary as in effect at the time in question, or any other failure by the Company to comply with the compensation terms of the Boutte Employment Agreement; or (iv) the Boutte Employment Agreement is not assumed by a successor to the Company. For purposes of the Boutte Employment Agreement, “Cause” is defined as (i) acts of embezzlement or misappropriation of funds or fraud; (ii) conviction of a felony or other crime involving moral turpitude, dishonesty or theft; (iii) a material violation by Mr. Boutte of any provision of the Boutte Employment Agreement, including willful failure to perform assigned tasks, willful and unauthorized disclosure of Company material confidential information; (iv) being under the influence of drugs (other than prescription medicine or other medically related drugs to the extent that they are taken in accordance with their directions) during the performance of Mr. Boutte’s duties and that performance of his duties is affected; (v) engaging in behavior that would constitute grounds for liability for harassment (as proscribed by the U.S. Equal Employment Opportunity Commission Guidelines or any other applicable state or local regulatory body) or other egregious conduct that violates laws governing the workplace; or (vi) willful failure to perform his assigned tasks, where such failure is attributable to the fault of Mr. Boutte, gross insubordination or dereliction of fiduciary obligations which, to the extent it is curable by Mr. Boutte, is not cured by Mr. Boutte within thirty (30) days of receiving written notice of such violation by the Company.

On March 1, 2016, the Company entered into a three-year Employment Agreement with David S. Ramsey (the “Ramsey Employment Agreement”) to serve as the Company’s Chief Operating Officer. Under the Ramsey Employment Agreement, for his service as the Chief Operating Officer of the Company, Mr. Ramsey will receive an annual base salary of \$220,000, and an annual performance bonus of up to 40% of his base salary, such bonus payable in cash or equity upon attainment of certain performance indicators established by the Company’s Board of Directors. In connection with the entry into the Ramsey Employment Agreement, Mr. Ramsey was granted an option award exercisable for 1,000,000 shares of the Company’s common stock, which will vest as to 333,334 shares on the one-year anniversary and 333,333 shares on each of the two and three-year anniversary of the commencement of his employment with the Company. In the event of the sale of all of the Company’s assets or any field acquired by the Company during the employment period which sale occurs after the six-month anniversary of his employment and before the two-year anniversary of his termination of employment, the Ramsey Employment Agreement provides that Mr. Ramsey will receive a bonus equal to 2% of net cash proceeds received by the Company from such sale after payment of certain costs and expenses. In the event that Mr. Ramsey’s employment is terminated Without Cause (as defined in the Ramsey Employment Agreement), by Mr. Ramsey for Good Reason (as defined below), Disability (as defined in the Ramsey Employment Agreement) or upon his death, if any occur after the one-year anniversary of his employment, Mr. Ramsey is entitled to receive a severance payment equal to one year’s base salary, any bonus earned which remains unpaid at such time and reimbursement of expenses. In the event of a Change of Control (as defined in the Ramsey Employment Agreement), Mr. Ramsey will receive a severance payment equal to one year’s base salary, any bonus earned which remains unpaid at such time and reimbursement of expenses. In addition, if a Change of Control occurs after the one-year anniversary of the commencement of his employment with the Company, all of Mr. Ramsey’s options shall immediately vest. The Ramsey Employment Agreement also includes customary confidentiality obligations and inventions assignments by Mr. Ramsey as well as a non-compete and non-solicitation provision. If his employment is terminated for Cause (as defined below) or by him Without Good Reason (as defined in the Ramsey Employment Agreement), Mr. Ramsey is entitled to receive his annual base salary through the date of termination and any bonus earned but unpaid. For purposes of the Ramsey Employment Agreement, “Good Reason” is defined as (i) any material and substantial breach of the Ramsey Employment Agreement by the Company; (ii) a Change in Control (as defined in the Ramsey Employment Agreement) occurs and Mr. Ramsey’s employment is terminated at any time within the six (6) month period on or immediately following the Change in Control; (iii) a reduction in Mr. Ramsey’s Annual Base Salary as in effect at the time in question, or any other failure by the Company to comply with the compensation terms of the Employment Agreement; or (iv) the Ramsey Employment Agreement is not assumed by a successor to the Company. For purposes of the Employment Agreement, “Cause” is defined as (i) acts of embezzlement or misappropriation of funds or fraud; (ii) conviction of a felony or other crime involving moral turpitude, dishonesty or theft; (iii) a material violation by Mr. Ramsey of any provision of the Ramsey Employment Agreement,

including willful failure to perform assigned tasks, willful and unauthorized disclosure of Company material confidential information; (iv) being under the influence of drugs (other than prescription medicine or other medically related drugs to the extent that they are taken in accordance with their directions) during the performance of Mr. Ramsey's duties and that performance of his duties is affected; (v) engaging in behavior that would constitute grounds for liability for harassment (as proscribed by the U.S. Equal Employment Opportunity Commission Guidelines or any other applicable state or local regulatory body) or other egregious conduct that violates laws governing the workplace; or (vi) willful failure to perform his assigned tasks, where such failure is attributable to the fault of Mr. Ramsey, gross insubordination or dereliction of fiduciary obligations which, to the extent it is curable by Mr. Ramsey, is not cured by Mr. Ramsey within thirty (30) days of receiving written notice of such violation by the Company.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

18 COMMITMENTS AND CONTINGENCIES

The Company disposed of its Crystal Magic, Inc. subsidiary effective December 31, 2013. In terms of the sale agreement entered into by the Company, the purchaser has been indemnified against all liabilities whether contingent or otherwise, claimed by third parties, this includes claims by creditors of the Company amounting to \$372,090 and claims against long-term liabilities of \$848,916. Management does not consider it likely that these claims will materialize and accordingly no provision has been made for these contingent liabilities.

The Company leased approximately 2,300 square feet of office space in Houston, Texas, the original term of the lease agreement terminated on January 31, 2014 with automatic renewals for six month periods unless 60 days written notice is given prior to renewal. The rental was \$2,200 per month. This lease terminated on January 31, 2016 and has not been renewed.

The future minimum lease installments under this agreement as of December 31, 2015 to January 31, 2016 (the automatic renewal period) is \$2,200.

The Company leases a loft space in Houston, Texas from a related party in terms of a lease agreement entered into on September 1, 2015 and expiring on May 31, 2016. The lease provides for automatic renewal on a month to month basis unless 60 days written notice is given to terminate the lease. The monthly rental is \$3,260 per month.

The future minimum lease installments under this agreement as of December 31, 2015 to May 31, 2016 is \$16,300.

The Company is committed to investing a further \$300,000 in NENA, over and above the \$900,000 invested in NENA as of December 31, 2015, based on their cash flow needs.

The Company entered into lease agreement for approximately 3,733 square feet of office and warehouse space in Houston, the term of the lease is for 39 months commencing on March 1, 2016 and terminating on May 31, 2019. The lease provides for the first month to be rent free, the fourteenth month to be rent free and the twenty-seventh month to be rent free. Monthly rentals, including estimated operating costs, for the first 12 months, excluding the free rental month amount to approximately \$3,410 per month, escalating at a rate of 1.7% per annum, after excluding the free rental months.

The future minimum lease installments under this agreement as of December 31, 2015 to June 30, 2019 is approximately \$124,859.

The future minimum operating lease commitments are as follows:

	<u>Amount</u>
2016	49,190
2017	37,974
2018	38,560
2019	17,635
	<u>\$ 143,359</u>

In terms of the license agreement commitments disclosed in note 5 above, the minimum commitments due under the amended license agreement entered into on January 30, 2013, for the next five years, are summarized as follows:

	<u>Amount</u>
2016	\$ 1,000,000
2017	1,000,000
2018	1,000,000
2019	1,000,000
2020	1,000,000
	<u>\$ 5,000,000</u>

Subsequent to year-end, the \$200,000 license fee which was due on June 30, 2015 was waived by the Licensor.

PROPELL TECHNOLOGIES GROUP, INC.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

19 JOINT VENTURE

On October 22, 2015, Novas entered into an operating agreement with Technovita (the "Joint Venture Agreement"), NENA, whereby Novas agreed to contribute \$1,200,000 (\$600,000 to be delivered on the effective date (October 22, 2015) of the Joint Venture Agreement, \$300,000 on November 1, 2015 and \$300,000 on the two month anniversary of the Effective Date) to the capital of NENA for 60% of the membership interests of NENA and Technovita agreed to contribute an aggregate of \$800,000 to the capital of NENA for 40% of the membership interests of NENA. In terms of a side agreement entered into on November 18, 2015, the revenue and expenses incurred by Technovita and the Company prior to entering into the operating agreement, have been included in the joint venture and consolidated into the Company's results effective September 1, 2015.

Subject to certain exceptions and pursuant to the terms of a sublicense agreement (the "Novas Sublicense Agreement") that was entered into between Novas, NENA and Novas Energy Group Inc. (the "Licensor"), the licensor of Plasma Pulse Technology currently used by Novas and Technovita, NENA will be the exclusive provider of the Vertical Technology (as defined in the Joint Venture Agreement) to third parties in the United States. Subject to certain exceptions and pursuant to the terms of Sublicense Agreements (the "Technovita Sublicense Agreement") that was entered into between Technovita, NENA and Licensor, NENA is the exclusive provider of the Vertical Technology to third parties in Canada. Notwithstanding the foregoing, both Novas and Technovita will retain the right to deploy the Vertical Technology on wells owned by Novas or Technovita in the United States or Canada, respectively. If either Novas or Technovita terminates the Sublicense Agreement with NENA and Licensor, the non-terminating party will receive 100% of the terminating member's membership interest in NENA.

The business and affairs of NENA are to be managed by or under the direction of the Board of Directors, consisting of five (5) members, three (3) of whom shall be appointed by Novas and two (2) of whom shall be appointed by Technovita. Board approval is required to: (i) incur any indebtedness, pledge or grant liens on any assets or guarantee, assume, endorse or otherwise become responsible for the obligations of any other person, except to the extent approved or authorized in NENA's budget; (ii) make any loan, advance or capital contribution in any person, except to the extent approved or authorized in the budget; (iii) transfer any equipment necessary in the deployment of the Vertical Technology to any third party; (iv) enter into or effect any transaction or series of related transactions involving the sale of NENA or the sale, lease, license, exchange or other disposition (including by merger, consolidation, sale of assets or similar business transaction) by NENA of any assets in excess of \$300,000; (v) appoint or remove NENA's auditors or make any changes in the accounting methods or policies of NENA (other than as required by GAAP); (vi) enter into or effect any transaction or series of related transactions involving the purchase, lease, license, exchange or other acquisition (including by merger, consolidation, acquisition of stock or acquisition of assets) by NENA of any assets and/or equity interests of any person and/or assets in excess of \$300,000; or (v) enter into or effect any commercial transaction or series of related commercial transactions involving anticipated liabilities or revenues of NENA in excess of \$500,000 or that materially vary from NENA's existing strategy or business plan.

20 SUBSEQUENT EVENTS

On January 1, 2016, the Company terminated its employment agreement with its former Chief Executive Officer, as disclosed in Note 17 above.

On January 1, 2016, the Company entered into an employment agreement with a new Chief Executive Officer, as disclosed in Note 17 above.

On March 1, 2016, the Company entered into an employment agreement with a Chief Operating Officer, as disclosed in Note 17 above.

Subsequent to year-end, the \$200,000 license fee due to the Novas BVI for the rights to use the Plasma Pulse technology in Mexico was waived by the Licensor.

In accordance with ASC 855-10, the Company has analyzed its operations subsequent to December 31, 2015 to the date these financial statements were issued, and has determined that it does not have any material subsequent events to disclose in these financial statements.

Item 9. Changes and Disagreements with Accountants on Accounting and Financial Disclosure

On February 3, 2016 the “Company retained RBSM LLP (“RBSM”) as its independent registered public accounting firm responsible for auditing its financial statements, to replace Liggett & Webb P.A. (“LW”) who was dismissed as its independent registered public accounting firm responsible for auditing its financial statements. LW’s reports on the Company’s financial statements as of and for the two years ended December 31, 2014 and 2013, did not contain an adverse opinion or disclaimer of opinion, and were not qualified or modified as to uncertainty, audit scope, or accounting principles. The decision to dismiss LW and the selection of RBSM was unanimously approved by the Company’s board of directors. During the years ended December 31, 2014 and 2013, and in the subsequent interim period through February 3, 2016 (the date of dismissal of LW), there were no disagreements with LW on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which disagreements, if not resolved to the satisfaction of LW, would have caused it to make reference to the subject matter of the disagreement in connection with its reports on the Company’s financial statements for such years. During the year ended December 31, 2014 and in the subsequent interim period through February 3, 2016, there were no events otherwise reportable under Item 304(a)(1)(v) of Regulation S-K. During the Company’s two most recent years and in the subsequent interim period through February 3, 2016, the Company did not consult with RBSM regarding the application of accounting principles to a specified transaction, either contemplated or proposed, or the type of audit opinion that might be rendered on the Company’s financial statements, and neither a written report nor oral advice was provided that was an important factor considered by the Company in reaching a decision as to the accounting, auditing or financial reporting issue, or with any of the matters outlined in Item 304(a)(2)(ii) of Regulation S-K. The Company provided LW with a copy of this Current Report on Form 8-K prior to its filing with the SEC, and requested LW furnish the Company with a letter addressed to the SEC stating whether it agrees with the statements made by the Company above, and if not, stating the respects in which it does not agree.

There have been no disagreements on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure with our independent auditors for the period ended December 31, 2015.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

We have adopted and maintains disclosure controls and procedures that are designed to provide reasonable assurance that information required to be disclosed in the reports filed under the Exchange Act, such as this Annual Report on Form 10-K, is collected, recorded, processed, summarized and reported within the time periods specified in the rules of the SEC. Our disclosure controls and procedures are also designed to ensure that such information is accumulated and communicated to management to allow timely decisions regarding required disclosure. As required under Exchange Act Rule 13a-15, our management, including the Chief Executive Officer who also serves as our Principal Financial Officer, after evaluating the effectiveness of disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this Annual Report on Form 10-K, have concluded that based on such evaluation, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer, as appropriate, to allow timely decisions regarding required disclosure. Our Chief Executive Officer has concluded, that as of the date of the filing of this Annual Report, our disclosure controls and procedures are effective and that all material weaknesses and significant deficiencies have been completely remediated due to the retention of an additional bookkeeper and a consultant who are integrally involved in the preparation of the financial statements and all disclosure.

Changes in Internal Control

There has been no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) that occurred during our quarter ended December 31, 2015 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Internal Controls

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13(a)-15. Internal control over financial reporting is defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act as a process designed by, or under the supervision of, our Chief Executive Officer who is also our Chief Financial Officer, and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles, and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorization of our management and directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisitions, use or disposition of our assets that could have a material effect on the financial statements.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. It is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. It also can be circumvented by collusion or improper management override.

Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process certain safeguards to reduce, though not eliminate, this risk.

Management has used the framework set forth in the report entitled *Internal Control – Integrated Framework* published by the Committee of Sponsoring Organizations of the Treadway Commission, known as COSO, to evaluate the effectiveness of our internal control over financial reporting. Based upon this assessment, management has concluded that our internal control over financial reporting was effective as of and for the year ended December 31, 2015.

This Annual Report on Form 10-K does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to rules of the Securities Exchange Commission that permit us to provide only management's report in this Annual Report on Form 10-K.

Item 9B. Other Information

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Directors and Executive Officers

The directors, officers and key employees of the Company are as follows:

Name	Age	Position
C Brian Boutte (1)	60	Chief Executive Officer/Interim Chief Financial Officer
Davis S Ramsey (2)	57	Chief Operating Officer
John W. Huemoeller II (3)	60	Director (Former Chief Executive Officer/President/Chairman)
John Zotos (4)	59	Secretary, Director
Ivan Persiyanov (5)	35	Director
Maria Damianou (6)	39	Director

- (1) On January 1, 2016, Mr. Boutte was appointed as our Chief Executive Officer and Interim Chief Financial Officer
- (2) On March 1, 2016, Mr. Ramsey was appointed as our Chief Operation Officer
- (3) On January 1, 2016, Mr. Huemoeller resigned as our Chief Executive Officer/President and Chairman of the Board. Mr. Huemoeller remains a director of our board.
- (4) On March 6, 2013, Mr. Zotos was appointed as our Secretary and a director.
- (5) On February 17, 2015, Mr. Persiyanov, the designee of the Series C Preferred Stockholders was appointed as a director to fill the vacancy created by the resignation of Messrs. Fuller, Steffens and Kalow. Mr. Persiyanov has two votes on all matters presented to the board.
- (6) On July 6, 2015, Ms. Damianou was appointed as a director of our Company.

The business experience, principal occupations and employment of each of the above persons during at least the last five years are set forth below.

C Brian Boutte

Mr. Boutte has extensive experience in the oil and gas industry. From July 29, 2013 until July 28, 2015, Mr. Boutte served in various positions with SK Innovation Company, Ltd affiliated entities, including as the Senior Vice President of the US E&P Division and the President of SK E&P America Inc. Mr. Boutte served as a Vice President of Hunt Consolidated Inc. from 2008 until July 2013 and from 2006 until 2008 as Vice President of Hunt Oil Company's International Exploration.

David S Ramsey

Mr. Ramsey has extensive experience in the oil and gas industry. Since July 2014 until February 2016, Mr. Ramsey served as the Operations Manager of Tecpetrol International S.A. From 2011 until 2014, he served as Senior Production Engineer/ Engineering Manager at SK E&P. Prior to his employment at SK E&P Company, from 2009 until 2011, Mr. Ramsey served in various positions at Dune Energy Inc. including as the Engineering Manager and Senior Production Engineer and prior to his employment at Dune Energy, Mr. Ramsey served in various positions at Cabot Oil and Gas Corp.

John W. Huemoeller II

Mr. Huemoeller has served as a director since March 6, 2013 and also served as our Chief Executive Officer and President, as well as Chief Financial Officer and the Chief Executive Officer of Novas from March 6, 2013 until January 1, 2016. Mr. Huemoeller has over 30 years experience in investment banking, finance, sales and marketing. Mr. Huemoeller began his career as an investment advisor in 1982 with M.L. Stern & Company a municipal bond firm in California and became a registered principal in 1985 managing retail brokers. He has previously been registered with various state insurance boards, as well as with the Chicago Board of Trade as a commodities broker. Mr. Huemoeller has held positions at Smith Barney, Drexel Burnham, Prudential Securities, and Paine Webber and has extensive experience in stocks, bonds, commodities, mergers and acquisitions, leveraged buyouts and private placement transactions.

From April 2012 to present, Mr. Huemoeller has been the President of Joshua Tree Capital Inc., an independent corporate finance advisory firm specializing in providing strategic capital formation guidance to public and private small cap oil and gas companies. From March 2009 to April 2012, Mr. Huemoeller was a FINRA-registered investment banker focused on all aspects of taking company's public, deal structure and Institutional placement of both debt and equity transactions with Buckman, Buckman and Reid. From August 2008 to March 2009, Mr. Huemoeller worked with Greenstone Holdings Group, LLC; an advisory firm with an emphasis on helping Chinese companies go public in the United States from January 2008 to July 2008, Mr. Huemoeller worked at Aspenwood Capital, a division of Green Drake Securities as an Investment Banker. Mr. Huemoeller previously served as Chairman and CEO of HumWare Media Corp, a publicly traded software development, media and technology company which he started in 1998 and was responsible for acquisition strategies and the day-to-day corporate operations. Mr. Huemoeller is co-author of U.S. Patent #5,855,005. Mr. Huemoeller completed various studies in the Bachelor of Business Administration Program at the University of Minnesota and has previously held Series 3, 7, 24, 63 and 79 Securities Licenses.

Mr. Huemoeller's financial experience, specifically with oil and gas companies, provides him with the attributes that make him a valuable member of the Company's Board of Directors. His service on other public company board's brings to us important knowledge regarding corporate governance.

John Zotos

Mr. Zotos was appointed as a director on March 6, 2013. He also serves as a director of Novas. Since July 2007, he has served as a principal and a managing partner of JC Holdings, LLC, a company engaged in the business of buying, selling and managing heavy equipment and commercial real estate.

Mr. Zotos brings to the Board significant business experience. Mr. Zotos' prior business experience, especially his experience in the on line industry, gives him a broad and extensive understanding of our operations and our industry. Due to his business background, he has a broad understanding of the operational, financial and strategic issues facing public companies.

Ivan Persiyanov

Mr. Persiyanov was appointed a director on February 17, 2015. Mr. Persiyanov currently serves as an investment director at Millhouse Capital, responsible for originating and leading the execution of private equity and venture capital projects in robotics, oil service and other industries. From July 2008 until joining Millhouse in April 2014, Mr. Persiyanov served as an investment director of Rusnano Capital, responsible for originating and leading the execution of private equity and venture capital projects in chemical, construction robotics, alternative energy robotics. Prior to joining Rusnano Capital, Mr. Persiyanov served as a consultant to Ernst & Young, a manager at GE Money Bank and a senior analyst at Citibank. Mr. Persiyanov has a Master in Finance degree from the New Economic School and a mathematics degree and partial Ph.D. in mathematics from Moscow State University. Mr. Persiyanov currently serves as a director of Georezonans LLC, a methane degassing service company and served as a director of Optogan CJSC from June 2013 until June 2014, Beneq Oy from July 2013 until April 2014 and LED, Microsensor Nt LLC from July 2013 until April 2014.

Mr. Persiyanov's prior business experience, especially his experience in the oil industry, gives him a broad and extensive understanding of our operations and our industry. Due to his business background, he has a broad understanding of the operational, financial and strategic issues facing public companies.

Maria Damianou

Ms. Damianou was appointed as a director on July 6, 2016.

Since 1993, Ms. Damianou, age 39, has worked for the Meritservus Group of Companies, most recently in the position of Manager. Meritservus is a Cyprus-based financial and fiduciary services firm that focuses on providing services to business entities, including the following: tax structuring advice, corporate administration and accounting services, trust, fiduciary and other related services as well as brokerage and custodian services. Prior to joining Meritservus, Ms. Damianou was employed by Deloitte & Touche from 1993-2005 where she worked with the administration and management of companies in the corporate services department. Meritservus became wholly independent from Deloitte & Touche in January 2005. Ms. Damianou received a Diploma with honors in Languages and Commercial in 1993 from St. Mary's School in Limassol, Cyprus. Ms. Damianou will bring to the Company and the Board of Directors her extensive knowledge of administration and management of corporations, including accounting, financial reporting, corporate law and taxation expertise.

Due to her business background, Ms. Damianou has a broad understanding of the operational, accounting, financial and strategic issues facing companies in our industry.

Term of Office

Our directors hold office until the next annual general meeting of our shareholders or until removed from office in accordance with our bylaws. Our officers are appointed by our Board of Directors and hold office until removed by the board. In connection with the sale of the Series C Preferred Stock to Ervington, we entered into a Stockholders Agreement with Ervington and certain of our stockholders providing that until a Change of Control Transaction (as defined in the Stockholders Agreement), each person a party thereto will vote all of such person's shares of our common stock in favor of the designees appointed by Ervington (Ervington currently has the right to appoint two designees and will have the right to appoint three designees upon its acquisition of an aggregate of 4,500,000 shares of Series C Preferred Stock) and two additional directors appointed by two of the Selling Stockholders and Ervington agreed to vote its shares in favor of the two designees appointed by the two Selling Stockholders provided that the certain Selling Stockholders continue to own a certain threshold number of shares of our common stock or preferred stock convertible into our common stock.

Employment Agreements

On January 1, 2016, the "Company entered into a three-year Employment Agreement with C. Brian Boutte (the "Boutte Employment Agreement") to serve as the Company's Chief Executive Officer. Mr. Boutte will also serve as our interim Chief Financial Officer. Under the Boutte Employment Agreement, for his service as our Chief Executive Officer, Mr. Boutte receives an annual base salary of \$265,000, and an annual performance bonus of up to 55% of his base salary, such bonus payable in cash or equity upon attainment of certain performance indicators established by our Board of Directors and Mr. Boutte. Upon commencement of employment, Mr. Boutte received a sign on bonus of \$60,000. In connection with the entry into the Boutte Employment Agreement, Mr. Boutte was granted an option award exercisable for 3,000,000 shares of our common stock, which vest as to 1,000,000 shares on each of the one, two and three-year anniversary of the commencement of his employment. In the event of the sale of all of our assets or any field acquired by us during the employment period which sale occurs after the six-month anniversary of his employment and before the two-year anniversary of his termination of employment, the Boutte Employment Agreement provides that Mr. Boutte will receive a bonus equal to 3% of net cash proceeds received by us from such sale after payment of certain costs and expenses. In the event that Mr. Boutte's employment is terminated Without Cause (as defined in the Boutte Employment Agreement), by Mr. Boutte for Good Reason (as defined below), Disability (as defined in the Boutte Employment Agreement) or upon his death, if any occur after the one-year anniversary of his employment, Mr. Boutte is entitled to receive a severance payment equal to one year's base salary, any bonus earned which remains unpaid at such time and reimbursement of expenses. In the event of a Change of Control (as defined in the Boutte Employment Agreement), Mr. Boutte will receive a severance payment equal to one year's base salary, any bonus earned which remains unpaid at such time and reimbursement of expenses. In addition, if a Change of Control occurs after the one-year anniversary of the commencement of his employment with us, all of Mr. Boutte's options shall immediately vest. The Boutte Employment Agreement also includes customary confidentiality obligations and inventions assignments by Mr. Boutte as well as a non-compete and non-solicitation provision. If his employment is terminated for Cause (as defined below) or by him Without Good Reason (as defined in the Boutte Employment Agreement), Mr. Boutte is entitled to receive his annual base salary through the date of termination and any bonus earned but unpaid. For purpose of the Boutte Employment Agreement, "Good Reason" is defined as (i) any material and substantial breach of the Employment Agreement by the Company; (ii) a Change in Control (as defined in the Employment Agreement) occurs and Mr. Boutte's employment is terminated at any time within the six (6) month period on or immediately following the Change in Control; (iii) a reduction in Mr. Boutte's Annual Base Salary as in effect at the time in question, or any other failure by us to comply with the compensation terms of the Boutte Employment Agreement; or (iv) the Boutte Employment Agreement is not assumed by a successor to us. For purposes of the Boutte Employment Agreement, "Cause" is defined as (i) acts of embezzlement or misappropriation of funds or fraud; (ii) conviction of a felony or other crime involving moral turpitude, dishonesty or theft; (iii) a material violation by Mr. Boutte of any provision of the Boutte Employment Agreement, including willful failure to perform assigned tasks, willful and unauthorized disclosure of our material confidential information; (iv) being under the influence of drugs (other than prescription medicine or other medically related drugs to the extent that they are taken in accordance with their directions) during the performance of Mr. Boutte's duties and that performance of his duties is affected; (v) engaging in behavior that would constitute grounds for liability for harassment (as proscribed by the U.S. Equal Employment Opportunity Commission Guidelines or any other applicable state or local regulatory body) or other egregious conduct that violates laws governing the workplace; or (vi) willful failure to perform his assigned tasks, where such failure is attributable to the fault of Mr. Boutte, gross insubordination or dereliction of fiduciary obligations which, to the extent it is curable by Mr. Boutte, is not cured by Mr. Boutte within thirty (30) days of receiving written notice of such violation by us.

On March 1, 2016, we entered into a three-year Employment Agreement with David S. Ramsey (the "Ramsey Employment Agreement") to serve as our Chief Operating Officer. Under the Ramsey Employment Agreement, for his service as our Chief Operating Officer, Mr. Ramsey receives an annual base salary of \$220,000, and an annual performance bonus of up to 40% of his base salary, such bonus payable in cash or equity upon attainment of certain performance indicators established by our Board of Directors. In connection with the entry into the Ramsey Employment Agreement, Mr. Ramsey was granted an option award exercisable for 1,000,000 shares of our common stock, which vests as to 333,334 shares on the one-year anniversary and 333,333 shares on each of the two and three-year anniversary of the commencement of his employment with us. In the event of the sale of all of our assets or any field acquired by us during the employment period which sale occurs after the six-month anniversary of his employment and before the two-year anniversary of his termination of employment, the Ramsey Employment Agreement provides that Mr. Ramsey will receive a bonus equal to 2% of net cash proceeds received by us from such sale after payment of certain costs and expenses. In the event that Mr. Ramsey's employment is terminated Without Cause (as defined in the Ramsey Employment Agreement), by Mr. Ramsey for Good Reason (as defined below), Disability (as defined in the Ramsey Employment Agreement) or upon his death, if any occur after the one-year anniversary of his employment, Mr. Ramsey is entitled to receive a severance payment equal to one year's base salary, any bonus earned which remains unpaid at such time and reimbursement of expenses. In the event of a Change of Control (as defined in the Ramsey Employment Agreement), Mr. Ramsey will receive a severance payment equal to one year's base salary, any bonus earned which remains unpaid at such time and reimbursement of expenses. In addition, if a Change of Control occurs after the one-year anniversary of the commencement of his employment with us, all of Mr. Ramsey's options shall immediately vest. The Ramsey Employment Agreement also includes customary confidentiality obligations and inventions assignments by Mr. Ramsey as well as a non-compete and non-solicitation provision. If his employment is terminated for Cause (as defined below) or by him Without Good Reason (as defined in the Ramsey Employment Agreement), Mr. Ramsey is entitled to receive his annual base salary through the date of termination and any bonus earned but

unpaid. For purposes of the Ramsey Employment Agreement, "Good Reason" is defined as (i) any material and substantial breach of the Ramsey Employment Agreement by us; (ii) a Change in Control (as defined in the Ramsey Employment Agreement) occurs and Mr. Ramsey's employment is terminated at any time within the six (6) month period on or immediately following the Change in Control; (iii) a reduction in Mr. Ramsey's Annual Base Salary as in effect at the time in question, or any other failure by us to comply with the compensation terms of the Ramsey Employment Agreement; or (iv) the Ramsey Employment Agreement is not assumed by a successor to us. For purposes of the Ramsey Employment Agreement, "Cause" is defined as (i) acts of embezzlement or misappropriation of funds or fraud; (ii) conviction of a felony or other crime involving moral turpitude, dishonesty or theft; (iii) a material violation by Mr. Ramsey of any provision of the Ramsey Employment Agreement, including willful failure to perform assigned tasks, willful and unauthorized disclosure of our material confidential information; (iv) being under the influence of drugs (other than prescription medicine or other medically related drugs to the extent that they are taken in accordance with their directions) during the performance of Mr. Ramsey's duties and that performance of his duties is affected; (v) engaging in behavior that would constitute grounds for liability for harassment (as proscribed by the U.S. Equal Employment Opportunity Commission Guidelines or any other applicable state or local regulatory body) or other egregious conduct that violates laws governing the workplace; or (vi) willful failure to perform his assigned tasks, where such failure is attributable to the fault of Mr. Ramsey, gross insubordination or dereliction of fiduciary obligations which, to the extent it is curable by Mr. Ramsey, is not cured by Mr. Ramsey within thirty (30) days of receiving written notice of such violation by us.

Consulting Agreement

On January 1, 2016, we entered into a consulting agreement with John Huemoeller, our director on a month to month basis for up to a three-month period. Pursuant to the agreement, Mr. Huemoeller will provide consulting services to us for a consideration of \$11,000 per month. We also agreed to continue to pay the monthly lease payments for the apartment that he currently occupies. We will also reimburse the consultant for all out of pocket expenses incurred while performing his duties.

Employees

At December 31, 2015 we had one full-time employee and one part-time employee.

Director Independence

Although our common stock is not listed on any national securities exchange, for purposes of independence we use the definition of independence applied by the NASDAQ Stock Market. The Board has determined that none of our directors is independent. Mr. Persiyanov is not “independent” due to his position at Millhouse Capital and Mr. Huemoeller and Mr. Zotos are not independent due to their current positions with our company and Novas, Ms. Damianou is considered to be an independent director.

Audit Committee and Audit Committee Financial Expert

Our board of directors acts as our audit committee. Ivan Persiyanov is an “audit committee financial expert,” as that term is defined in Item 407(d) of Regulation S-K promulgated under the Securities Act.

Upon evaluating our internal controls, our board of directors determined that our internal controls are adequate to ensure that financial information is recorded, processed, summarized and reported in a timely and accurate manner in accordance with applicable rules and regulations of the SEC.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act requires our directors and executive officers, and persons who own more than 10% of a registered class of our equity securities, to file with the SEC initial reports of ownership and reports of changes in ownership of our common stock and other equity securities of Propell. Officers, directors and greater than 10% shareholders are required by the SEC regulations to furnish us with copies of all Section 16(a) forms they file. These filings are publicly available on the SEC's website at www.sec.gov. Based solely on our review of the copies of such forms received by us and our review of the SEC's website, we believe that during fiscal year ended December 31, 2015, all filing requirements applicable to our officers, directors and greater than 10% percent beneficial owners were complied with.

Code of Ethics

We have established and maintain a Code of Ethics which is applicable to all employees, officers, and directors. Our policy is designed to deter wrongdoing and to promote honest and ethical conduct and compliance with all applicable laws and regulations. It also communicates our expectations of our employees and helps enable us to provide accurate and timely disclosure in our filings with the SEC and other public communications. In addition, the policy incorporates guidelines pertaining to topics such as environmental compliance, health and safety compliance; diversity and non-discrimination; vendor relations, employee privacy; and business continuity.

We will provide any person without charge, upon written or oral request to our corporate headquarters, a copy of our Code of Ethics.

Item 11. Executive Compensation

The following table discloses the compensation that was paid to our executive officers in the years ended December 31, 2015 and 2014.

Name and Principal Position	Fiscal Year	Salary (\$)	Bonus (\$)	Stock Awards (\$)	Option Awards (\$)	Non-Equity Incentive Plan Compensation (\$)	Non-Qualified Deferred Compensation Earnings (\$)	All Other Compensation (\$)	Totals (\$)
<i>John Huemoeller</i> CEO and Director (1)(2) (3)	2015	180,000	-	-	-	-	-	6,845	186,845
	2014	180,000	-	1,725,000	-	-	-	-	1,905,000

(1) The amounts disclosed as all other compensation includes medical insurance costs paid on behalf of Mr. Huemoeller by the Company.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The following table indicates beneficial ownership of our common stock, ownership of our Series A-1 Preferred Stock and the total voting power of our shareholders as of March 15, 2016, by: (1) each person known by us to be the owner of more than 5% of our outstanding shares of Common Stock; (2) each person known to us to be the owner of more than 5% of our outstanding shares of Series A-1 Preferred Stock; (3) each of our directors; (4) each of our executive officers; and (5) all of our directors and executive officers as a group. In general, “beneficial ownership” includes those shares a person has sole or shared power to vote or transfer (whether or not owned directly) and rights to acquire common stock through the exercise of stock options or warrants that are exercisable currently or become exercisable within 60 days of March 15, 2016. Except as indicated otherwise, the person’s name in the table below have sole voting and investment power with respect to all shares shown as beneficially owned by them.

Unless otherwise specified, the address of each of the individuals listed below is c/o Propell Technologies Group, Inc., 10655 Bammel North Houston Road, Houston, Texas, 77086.

<u>Name</u>	<u>Amount and Nature of Beneficial Ownership of Common Stock</u>	<u>Percent of Common Stock Beneficially Owned (1)</u>	<u>Percentage of Total Voting Power (2)</u>
Directors and officers			
C Brian Boutte	- (3)	-	-
David S Ramsey	- (4)	-	-
John Huemoeller	10,000,000 (5)	3.7%	2.4%
John Zotos	3,160,000 (6)	1.2%	*
Ivan Persiyarov	-	-	-
Maria Damianou	-	-	-
5% Shareholders			
Ervington Investment Limited	215,677,467 (7)**	51.4%	50.9%
Charles Hoogland	4,000,000 (8)***	1.5%	*
All officers and directors as a group (6 persons)	13,160,000	4.9%	3.1%

* Less than 1%

** Includes all of the outstanding shares of Series A-1 and Series C Preferred Stock on an “as converted” basis”.

*** Includes all of the outstanding shares of Series B Preferred Stock on an “as converted basis”.

(1) Based on 268,558,931 shares of common stock issued and outstanding as of March 15, 2016.

(2) Based on the voting rights attached to each class of shares, which vote as a single class together with common stockholders. Each share of common stock exercises one vote per share, each Series A-1 Preferred Stock exercises ten votes per share (for an aggregate of 31,375,000 votes based on 3,137,500 outstanding Series A-1 Preferred Stock) each Series B Preferred Stock exercises one hundred votes per share (for an aggregate of 4,000,000 votes based on 40,000 outstanding Series B Preferred Stock) on an “as converted basis” and each share of Series C Preferred Stock has 26.67 votes for an aggregate of 120,000,000 votes. The outstanding and vested shares of common stock and preferred stock, as of March 15, 2016 are entitled to an aggregate of 423,933,931 votes.

(3) Mr. Boutte was issued stock options exercisable for 3,000,000 common shares, pursuant to the terms of an employment contract entered into on January 1, 2016, of which 1,000,000 will vest on January 1, 2017, a further 1,000,000 on January 1, 2018 and the remaining 1,000,000 on January 1, 2019, provided he remains employed by us. As of March 15, 2016, none of the shares underlying the options had vested.

(4) Mr. Ramsey was issued stock options exercisable for 1,000,000 common shares, pursuant to the terms of an employment contract entered into on March 1, 2016, of which 333,334 will vest on March 1, 2017, a further 333,333 on March 1, 2018 and the remaining 333,333 on March 1, 2019, provided he remains employed by us. As of March 15, 2016, none of the shares underlying the options had vested.

- (5) Includes 10,000,000 shares of common stock. Mr. Huemoeller was granted 10,000,000 shares of our restricted stock of which 5,000,000 were vested as of December 31, 2015. The remaining 5,000,000 vested on January 1, 2016 upon termination of Mr. Huemoeller's employment agreement on January 1, 2016.
- (6) Includes 3,000,000 shares of common stock. Mr. Zotos was granted 3,000,000 shares of restricted stock of which 2,000,000 were vested as of December 31, 2015. The remaining 1,000,000 shares vest on March 31, 2016. Also includes 160,000 shares of common stock owned by the wife of Mr. Zotos.
- (7) Includes 64,302,467 shares of common stock, 3,137,500 Series A-1 Preferred Stock, convertible into 31,375,000 shares of our common stock; and 4,500,000 shares of Series C Preferred Stock, convertible into 120,000,000 shares of common stock. Ervington owns all of the outstanding shares of Series A-1 and Series C Preferred Stock. The common stock, Series A-1 and Series C preferred stock is beneficially owned is Greenleas International Holdings Ltd., which in turn is wholly owned by Harmony Trust Settlement. The address of the beneficial owner is Eftapaton Court, 256 Makarios Avenue CY-3105 Limassol, Cyprus.
- (8) Includes 40,000 shares of our Series B Preferred Stock convertible into 4,000,000 shares of our common stock. The 40,000 shares of Series B Preferred Stock represents 100% of the outstanding shares of Series B Preferred Stock. The address of the beneficial owner is Charles Hoogland, 2440 S. Willemoore, Springfield, Illinois 62704.

Item 13. Certain Relationships and Related Transactions, and Director Independence

We leased approximately 2,300 square feet of office space in Houston, Texas from a common stock holder. The original term of the lease agreement terminated on January 31, 2014 with automatic renewals for six month periods unless 60 days written notice is given prior to renewal. The lease expired on January 31, 2016 after notice was given that we would not renew the lease. The rental was \$2,200 per month.

We lease a loft space in Houston, Texas from a related party in terms of a lease agreement entered into on September 1, 2015 and expiring on May 31, 2016. The lease provides for automatic renewal on a month to month basis unless 60 days written notice is given to terminate the lease. The monthly rental is \$3,260 per month.

Other than disclosed above or our compensation arrangements with executive officers, none of our directors and executive officers nor any person who beneficially owns, directly or indirectly, shares equaling more than 5% of our common stock, nor any members of the immediate family (including spouse, parents, children, siblings, and in-laws) of any of the foregoing persons, has any material interest, direct or indirect, in any transaction that we have entered into since our incorporation or any proposed transaction.

Item 14. Principal Accountant Fees and Services

On February 3, 2016, the Company engaged RBSM LLP as our independent registered public accounting firm.

The following is a summary of the fees billed to the Company by its prior independent registered public accounting firm, Liggett & Webb, P.A. for professional services rendered for the fiscal years 2015 and 2014:

Service	Fiscal 2015	Fiscal 2014
Audit Fees	\$ 34,500	\$ 41,250
Audit-related Fees	-	-
Tax Fees	4,000	3,750
All Other Fees	-	-
	<u>\$ 38,500</u>	<u>\$ 45,000</u>

PART IV

CERTIFICATION PURSUANT TO RULE 13a-14 OR RULE 15d-14 OF THE SECURITIES EXCHANGE ACT OF 1934,

AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, C Brian Boutte, certify that:

1. I have reviewed this Annual Report on Form 10-K of Propell Technologies Group, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles; and
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
